

To the towns of the Pascack and Northern Valley regions:

More lawn signs are now available. Please feel free to re-post the below on your town's website. We will be calling you to make sure you're in receipt of this email and to see how many lawn signs you would like delivered to your municipal building. Thank you!

Re-opening a full service hospital at the former Pascack Valley Hospital will continue to be our focus until the doors are officially opened. The people living and working in the Pascack and Northern Valley regions have spoken and our mission is to make certain their voices are heard and quality healthcare is accessible in this much deserving area. Collectively, we can achieve uncommon results.

Hackensack University Medical Center remains committed to accomplishing what the community desires – to effectively open a 128-bed hospital.

Please show your support by placing a Re-Open Our Hospital Now sign on your lawn.

Your voices need to be heard! Signs are available at your town's municipal buildings or by calling 201-996-3760.

Thank you for your commitment to this project to bring quality healthcare home.
