7 1 ACTING CHAIRMAN MAMARY: Okay. So I 1 changed. 2 2 guess our application, 244 Old Tappan Road. MS. PRICE: I agree, Bob, 3 MR. REGAN: Diane, is the chairman wholeheartedly. 4 arriving? 4 And as we have done in the past, I 5 MS. FROHLICH: He should be here supplied Diane with a copy of the last transcript. 6 shortly, but he said to start. 6 So everything should be up and 7 7 MR. REGAN: Okay. available and we're ready to proceed from there. COUNCILMAN GALLAGHER: I'll be stepping 8 8 We also supplied our new set of plans 9 9 on October 3rd of -- October -- Dynamic Engineering down. 10 MR. REGAN: Yes, because the 10 submitted new plans, original date of May 18, '21. 11 D variances are implicated, so the Class I and 11 MR. REGAN: Revised 9/26? 12 12 Class III members --MS. PRICE: Right, 9/26, that set. 13 MS. FROHLICH: And Councilman Boyce. 13 MR. REGAN: Are you going to want them 14 14 (Whereupon, Councilman Gallagher and marked? 15 Councilman Boyce recuse themselves and step 15 MS. PRICE: I think I would like them 16 off the dais.) 16 marked at this point. 17 MS. PRICE: Hi. 17 MR. REGAN: We're up to A-31, I think. 18 18 If I'm wrong on that, let me know. All set? MS. PRICE: Let's see... 19 19 Good evening, Gail Price from the firm MR. SKRABLE: Mr. Chairman, just while 20 of Price, Meese, Shulman & D'Arminio again for the 20 21 21 you're figuring that out, I will not be here for the application of CSH at 244 Old Tappan Road. 22 I'm back for this evening for our 22 December meeting. testimony of our professional planner who I expect 23 23 If we get through planning tonight and 24 will tie together all of our prior witnesses' 24 start question, public questions and then get into 25 testimony in conjunction with the proofs that are 25 public comment, I'm not sure that it's critical I be 8 1 required pursuant to the Municipal Land Use Law to 1 here. justify the grant of the required variances, as well 2 I think the board knows where I stand 3 as the site plan that's been presented. 3 on the drainage aspects of the project, but I just 4 Before I do that, I just -- I went back want to let you know that schedule-wise. 5 5 in my binder and I saw that we filed this application ACTING CHAIRMAN MAMARY: Okav. 6 on December 22nd of '21, so it's been a long time. 6 Thank you. MR. REGAN: The first hearing was 7 7 MS. PRICE: A-31. 8 February 9th. 8 (Whereupon, Engineering Plans prepared 9 9 MS. PRICE: Right. by Dynamic Engineering, Last Revised 9/26/22 is marked as Exhibit A-31 for identification.) 10 Our first hearing was in February of 10 '21. 11 11 MS. PRICE: And that was filed together 12 So it's definitely our hope, of course, 12 with the updated stormwater management report, last 13 with the rights, you know, of the public's input that 13 revised September 22nd. 14 14 we can wind this application down to a conclusion in I don't know if we need to mark that as 15 this calendar year before spanning yet another year 15 a separate or --16 into '23. 16 MR. REGAN: If you want to, we'll do 17 MR. REGAN: I think that's important, 17 it. because you never know whether the membership of the 18 MS. PRICE: Okay. 18 19 board will change with the new year, depending on 19 MR. REGAN: A-32. 20 appointments or resignations or whatever. 20 (Whereupon, Updated Stormwater 21 21 MS. PRICE: Right. Management Report, Last Revised 9/22/22 is 22 MR. REGAN: It's always good, 22 marked as Exhibit A-32 for identification.) 23 23 MS. PRICE: So if I could, unless there particularly with a significant application with 24 multiple hearings, that it be completed before the 24 are any questions of me, I'd like to call George current board may possibly have its membership 25 Williams, our planner, for testimony.

are seeking this evening and I visited the project
 site, I and my staff on several occasions.
 Finally, I have attended, as I

mentioned, a couple of the hearings for this matter and/or my staff for additional hearings and I did review the transcript for those occasions when we were not at or in attendance.

Lastly, I did review with particular attention your board planner's report first dated October 11th of 2021 and the revised memo, if I have this correct, February 4th of this year.

Q. And then from there you proceeded to look at the application for development specifically based upon the knowledge that you gleaned from Old Tappan's documents, correct?

A. That's is correct.

17 Q. So from your perspective, we've heard
18 from the civil engineer, from the architect, from the
19 landscape architect, a variety of witnesses.

What is your role in an application?

A. So -- and this will not be unfamiliar for this board.

My role as the planner is to provide the requisite statutory proofs on the record.

Typically, in my experience and my

firm's experience we build upon all of the testimony you've heard from the prior witnesses.

In fact, in many cases they establish the predicate for my professional planning opinion and so what I would like to do is state a few things for the record. I'll try not to be redundant, but there are two instances during my testimony where you

8 will hear some repeated information. The first will

 $\boldsymbol{9}$ $\,$ be simple statement for the record and the second

10 will probably be when I recap some of that testimony

that you heard from the prior witnesses for this

matter.

Q. So why don't you start us off with how you started with your analysis?

A. So, again, for the record this is property commonly referred to as 244 Old Tappan Road as read into the record by the chairperson and identified in the municipal tax records as Block 1606, Lot 3 and it's located in the RA-40 residential one-family district.

That is important, because that's whatdrives the need for our variances.

I won't go through the details of the
project, that was covered at length by the applicant,
the site engineer and the project architect. You

know that this is an application for an
 assisted-living development.

3 (Whereupon, Chairman Weidmann is now in4 attendance at 7:25 p.m.)

THE WITNESS: Worth repeating, however,

is the benefit of the 10 percent of the total bed
count will be Medicaid eligible and to that end, 10
of the 100 beds proposed will satisfy our Certificate
of Need for the affordable housing obligation under

the state statutory law.So other than that, I won't go throughthe details of the project.

What I would like to do, if it's okay
to go into that now, is the recap. I'm going to
begin with taking a little bit of license and say to
the board, as I mentioned earlier I have had the
opportunity to work with the applicant and its
representative in the form of Joe McElwee and I would
begin by saying that this is an applicant, for me a

client that is a pleasure to work with.

What you see of Mr. McElwee as a representative of the applicant is what you get. He is that way in every community in which Capitol Seniors Housing enters. That's important for a few reasons.

First, this is an applicant, for me a
 client, that encourages its team to be as creative
 and comprehensive as possible, sparing no expense,
 and I think you've seen evidence of that.

Also, a good neighbor. As planners, and I think your board planner will agree, we are trained to engage with the community, if possible. I don't always get clients that agree with that, but Capitol Seniors Housing does and that's evidence in the testimony you heard from Mr. McElwee earlier about his efforts to reach out to some of the stakeholders in the area.

In my opinion, as a professional planner, that kind of engagement with the neighborhood actually makes for a better product moving in.

17 Some of the results of this engagement
18 resulted in benefits that accrued not just to the
19 applicant or the site, but to the community as a
20 whole.
21 I will repeat this on one or two

I will repeat this on one or two occasions, but examples are: The widening of Old Tappan Road, for example, the regrading of a street to help with runoff.

Q. Just let me stop you there.

That widening of Old Tappan Road makes for a safer circulation pattern and comports with other portions of Old Tappan Road.

Again, this is being done at the expense of the applicant and is not triggered by our development, but is certainly evidence of being a good neighbor.

Similarly, we were made aware of the drainage issue that resulted and this is what counsel mentioned a few moments ago down on Holbrook Court causing issues for residents there and the applicant agreed to re-grade so that that can fix the crown.

So that would no longer be an issue for that resident or residents. Again, not generated by this application, but certainly something that demonstrates this applicant's desire to be a good neighbor.

Landscaping, careful inventory of the specimens and code compliant replacement plan, the special attention given to the specimen selections. Mr. Lagenstein provided significant testimony about that and agreed to comport with what the ordinance requirement is and had an exchange with your board planner about how to satisfy your requirements for

landscaping.

I would just submit that based on the plans you've received, that landscaping buffering is

4

stations as well.

Finally, and I will close this out, our traffic expert testified, again, that the -- from a traffic expert perspective that this use is a low traffic generator. The proposed widening of Old Tappan Road is an added safety benefit and the extra parking spaces provided on this site will more than satisfy the real demand for parking on this site and we added the, I believe the electric vehicle charging

Perhaps, most importantly, this a less intense traffic generator than some of the permitted uses that could go on the site, such as a school or a daycare and that goes to just how appropriate this site is for the proposed use as an assisted-living

18 19 facility.

20 With that, Commissioners, I'm going to 21 recite the reliefs that are captured in your report. 22 They've been testified to by our site engineer

23 before, but for the record they are the D-1 use

24 variance.

25 Again, as this board knows, a D-1 use 1 variance is required when the proposed use, in this

2 case an assisted-living facility is not among the

permitted uses in the zone district.

4 There are several bulk and area

5 deviations. I will submit to the board that in my

6 opinion those deviations or C variances could be

subsumed under the granting of the D-1 use variance,

8 but we feel so confident and strongly about the

9 C variances that I'll offer proofs in support of

10 those as well.

11 Those C variances, as you know, begin

12 with the improved lot coverage. Allowed is 30

13 percent. We come in slightly above that at

14 33.4 percent.

15 Maximum floor area, allowed is 8,400.

16 This is where you see a larger delta. We come at

17 81,342 square feet and I'll explain why that delta is

18 a bit larger than the others.

19 Maximum height of building to the ridge

20 line. The allowed height is 35 feet, 2-and-a-half

21 stories. We're very close to that by the way. We

22 meet the standard in terms of height. We come in at

23 34-feet-5-inches and three stories. So it's the

24 three stories that we do not comport with.

25 Loading spaces, four are required.

1 We're proposing one.

> 2 Side yard -- rear yard buffer, required

3 62.2, proposed 47.9.

4 Side yard buffer, 40.1 required,

20.1 feet is being proposed. 5

6 Commissioners, lastly, the sign.

7 Ground sign area, required is 30 square feet. We

8 propose 37.1. And I'll talk about that when I get to

9 the proofs.

10 And, lastly, the distance from the

11 bottom of the sign display area to the ground,

12 required is 4 feet, we're proposing 2 feet.

13 So that's the recitation of the

reliefs. What I would like to do is just talk 14

15 generally first about some of the planning issues and

16 then go into the proofs.

> Q. That's perfect.

18 Α. This is the fact that we're here

19 requesting a D-1 use variance is not uncommon in my

20 experience.

17

21 There are a number of municipalities

22 that do not have specific regulations and standards

23 for this particular use.

24 The state defines an assisted-living

25 facility as follows: A licensed -- a facility

licensed by the department of health to provide apartment style housing, dining and assisted-living services when needed.

Apartment units offer at a minimum, one unfurnished room, a private bathroom, a kitchenette, a lockable door on the unit entrance.

In our planner's dictionary, the definition provided is: A special combination of housing, supportive services, personalized assistance and healthcare designed to respond to the individual needs of those who need help with the activities of daily living. A facility with a central or private kitchen, dining, recreational and other facilities with separate bedrooms or living quarters where the emphasis of the facility remains residential.

Commissioners, that is what's before

Commissioners, that is what's beforeyou this evening.

Again, with the number of amenities that have been described and then focused on providing a quality option for this housing typology.

Q. And that use has been recognized by the Certificate of Need that you referenced from the state?

23 state?

A. That's correct.

MS. PRICE: And just for the record,

the Certificate of Need is A-22 that the witness has referred to.

3 THE WITNESS: I believe it's dated June4 of this year, but it's marked in the record.

5 BY MS. PRICE:

Q. Yes, June 29th.

7 A. Very briefly, there are a number of8 articles that speak to this land use.

One that we used in our preparation is a zoning update or zoning newsletter. It's called "Zoning Obstacles Facing a Developer of Senior Housing Options."

And it notes that, again, this is not uncommon to find municipalities that don't have specific regulations for its land use and it's likely due to the fact that the demand for such housing has increased so rapidly in recent years as elderly individuals and their families seek senior housing within continuing care communities, retirement communities.

This is exactly the demographic trend that's occurring in Old Tappan and, I would say, just about all over the country.

Typically, I don't discuss the MasterPlan until it's time to go through the proofs,

particularly the second prong of the negative
 criteria, but in this particular instance, it's
 probably good to set the stage with some references
 to your 2016 Master Plan Reexamine Report.

There are a number of sections that speak generally to the importance of addressing the needs of seniors in Old Tappan and then there are some very specific goals and objectives that in my opinion as a professional planner would be advanced if you were to grant our application.

The first is Goal 3, senior citizen residential where it speaks to the encouraging of age-restricted housing with varying levels of care within reason and with the specific controls that accompany conditional land uses.

In the alternative and if so desired, these facilities could provide with their own land use and zoning designation and that comes from page 15.

Goal No. 4, to provide a variety of housing types and densities that insure a balanced housing supply as one component of this goal, Old Tappan Borough recognizes the particular housing needs of its citizens with special needs, this goal statement should be interpreted broadly to

specifically include encouraging a delivery of
 special needs affordable housing.

And, Commissioners, perhaps, even more
on point, Goal No. 5, create opportunities to
encourage the creation of both market rate and
affordable senior housing. A policy statement for
that goal, and I quote, that:

"The baby boom generation continues to age, Old Tappan has witnessed an aging of its population. There's a general lack of housing design to service the unique housing needs of older residents and while senior housing has been developed in the Borough to meet this need, Old Tappan should continue to encourage developers or the public sector to provide such housing, especially to meet the needs of older Old Tappan residents who seek housing design specifically for your needs."

Commissioners, that is spot on for what's before you this evening. This is a housing topology on a continuum of housing that is dedicated to that population cohort.

Q. And the language that you just read,you've taken directly from Old Tappan's documents,correct?

A. That's correct, on page 46.

So based on that, Commissioners, on the review of the land use documents, the review of the site plan, site plan application, in my professional opinion there is ample planning support for the requested relief and I guess that's a good segue into addressing the variances now.

Q. Great.

21

A. And I'll take a sip of water.

10 Q. And you'll address both positive and11 negative as required by the land use law?

A. Yes.

In fact, this board is aware there's aparticular guideline for inherently beneficial uses,but I'll get to that in a second.

Generally speaking, as this board knows, a D-1 use variance requires the satisfaction of both the affirmative criteria and the negative criteria.

20 The affirmative criteria can be deduced
21 by a showing of special reasons. Special reasons are
22 the use is inherently beneficial, which we submit
23 this is, that the granting of our relief would
24 advance the purposes of zoning, which I submit this
25 would, that the use is particularly suited for the
30

particular site.

I would argue that this is, althoughthat's not a requirement for inherently beneficialuses.

And lastly, Commissioners, if you were to deny our application, it would constitute an undue hardship on the applicant. We're not submitting that's one of the special reasons today.

That's all balanced with the negative criteria, which this board knows is a two-prong test.

The first prong is that if you were to approve our application, there would be no substantial detriment to the public good.

I'm going to say, parenthetically, in my opinion there would absolutely be no substantial detriment and that word comes directly from the Municipal Land Use Law.

In fact, I would argue no detriment given all of the agreements that have been made by this applicant to perfect not only the development scheme, but some off-track approvals as well.

The other prong is no substantialimpairment to the zone plan.

24 It's kind of why I began with25 references to your Master Plan early on. In my

opinion, there's no substantial impairment to thezone plan.

In fact, I would argue if you grant our
relief, this board would actually be advancing some
goals and objectives of your plan.

I mentioned inherently beneficial. The
Municipal Land Use Law under 40:55D-4 provides a
definition for "inherently beneficial uses" and I'm
going to read that definition.

"It is a use, which is universally considered of value to the community because it fundamentally serves the public good and promotes the general welfare. Such a use includes, but is not limited to a hospital, a school, a childcare center, a group home, wind or solar energy facility or structure.

Inherently beneficial uses presumptively

So I gave you what the positive and negative criteria were. Inherently beneficial uses have the advantage of presumptively satisfying the affirmative criteria. Therefore, they don't have to show that enhanced quality of proof from the <u>Medici</u> court case.

25 But I'll go one step further, I

satisfy the positive criteria."

3

2 guidance for boards as they review inherently

3 beneficial uses and that court case, as you probably

mentioned that there is a court case that provides

4 know, is the <u>Sica</u> court case. The <u>Sica</u> court case

5 says, well, just because it's inherently beneficial

6 doesn't mean you get an automatic approval, although

 ${f 7}$ we would like that. It gives you four steps. And

8 those four steps are as follows.

9 First, identify the public interest at
10 stake. I think Mr. McElwee did that in his
11 testimony, but I'm going to go through each of these
12 again.

The second is identifying any
detriments that might ensue from the grant of the
variance. You've heard me say there are no
detriments, but, again, I will go through these.

17 The third is consideration of
18 appropriate conditions imposed by the board to reduce
19 the aforementioned detriments. This board has heard
20 a number of agreements that could be appropriate for

21 conditions. I'm going to defer to our counsel and

board counsel to capture all of those, but some ofthem I've mentioned already in terms of what this

24 applicant has agreed to do to make not only the site

25 better, but the surrounding area better.

That applicant's testimony was very

In terms of weighing -- Step No. 4,

weighing the positives against the negatives and

in my opinion is the reverse. The benefits of the

application for this D-1 use variance to construct an

The benefits accrue to the community in terms of providing quality housing for this cohort of the population. The benefits of the site design, again, far outweigh any potential detriment.

In fact, the applicant would leave the site in a far better condition than currently exists and we talked about the relocation of the historic structure already.

Finally, Commissioners, there's certainly no substantial detriment to the public good or impairment to the zone plan, which is a good segue into the remaining variances, which are the C variances.

15 Q. Talk for a minute about the <u>Price vs.</u>16 <u>Himeji</u> case.

No relation to this Price?

A. I thought it was the first time I saw the case. I will butcher this name as well.

There are a couple of court cases that talk about the ability to subsume the C variances under the granting of a D-1 use variance.

23 Price v. Himeji is probably the most
24 current one and it found that the required bulk
25 variances may be considered subsumed under the

consideration of a use variance. Why? From a

2 planning perspective, it's rather straightforward to

3 me. The standards that we're being held to are for a

4 use that's not intended and so if you agree with our

5 showing of proofs for the D-1 use variance, it stands

6 to reason that a different set of open area standards

7 would apply other than those in the zone district,

8 which houses our use.

In <u>Kessler v. Bowker</u> -- and I think I pronounced that one correctly -- the court found that where a use variance is sought and there are also bulk variances required for the project and the applicant proves special reasons for the use variance, those special reasons can also be used and entitle the applicant to C-1 variances to build -- C variances, excuse me, in violation of the side

17 yard, parking and bulk restrictions. Very similar to

18 what we are proposing to you this evening.

Again, we're comfortable providing the proofs despite the court cases that make it pretty clear that these C variances can be subsumed under the grant of the D-1.

23 I would just add one more court case

24 and that's the Pullen v. Township of South

25 <u>Plainfield</u>.

1 As a planner I particularly like this 2 court case, because it suggests that a board, in

3 considering an application like this one, can look at

4 the development schema or concept in total. And if

5 you agree with what we are proposing is a very good

6 development concept, despite those deviations you can

7 look at those deviations in the aggregate and say

 $oldsymbol{8}$ overall not withstanding those deviations from the

9 strict application of your bulk and area standards,

10 the overall development concept works and, therefore,

11 you can grant the C variances.

12 To that end, as I mentioned earlier, 13 the two context for C variances, the first is the 14 traditional C-1 or hardship and that means that there 15 has to be a demonstration that their hardship is 16 created because the lot is unique in its shape, size 17 or topography, all of that may be true for this site, 18 and then the other is -- or structures lawfully 19 thereon, excuse me, and the other is the flexible C-2 20 and that allows the board to consider the benefits 21 versus the detriments again.

And if you agree with us that the
proposal before you is a better zoning alternative
than the strict application of your code, that
hearkens back to <u>Pullen</u> and the other court cases and

38

1 I would submit to this board that both the C-1 and

2 C-2 are appropriate for your deliberation.

3 Under the C-2 context, as you know we4 have to demonstrate that the purposes of zoning would

5 be advanced if you were to approve our relief.

6 I'll go through several purposes of7 zoning that in my professional opinion would be

8 advanced if you were to grant our relief.

9 Q. And these purposes are all contained in10 the Municipal Land Use Law, correct?

A. That is correct.

Q. You're not making these purposes up?

A. That is very correct.

Q. Okay.

15 A. The first is Subsection A. It's a --

16 it's the first one. It's a bit of a catchall, but I

17 submit it is appropriate.

It is, I quote:

"To encourage municipal action to guide the appropriate use or development of all lands in the state in a manner which will promote the public health, safety, morals and general welfare."

The deviations we're asking relieffrom, all lend to a better development plan or

11

12

13

14

18

19

20

21

22

23

Now for the individual deviations and

24

25

operationally four spaces.

In point of fact, if we offered more

24

25

well.

45 1 than one, they would lie fallow, they would cause 2 more disturbance and, quite honestly, again, they 3 would take away from space in a building that could 4 be put to a better use as has been presented. 5 Rear yard buffer, 62.2 required, 6 proposed 47.9. We meet this from the line, property 7 line to the building. 8 So in spirit we meet the intent of the 9 space, but the function of the definition of the 10 buffer does not allow for us to include the detention

12 So it's kind of a technical variance in 13 my opinion. We meet the spirit intent of the 14 setback, but technically we are required for relief 15 and so in the context of C-2 I think that's 16 appropriate.

17 Side yard buffer, 40.1 feet required, 18 20.1 is proposed.

19 Again, from the property line to the 20 drive aisle, the distance is closer to 30 feet. So 21 we close that gap, but the deviation is really tied 22 to the wetlands and sensitive areas. It's worth 23 noting that we are actually further from the property 24 line than our neighbor, abutting neighbor, the 25 church, which is closer on their side, to their side

of the property.

1

basin.

2 Q. And this side yard buffer is on the 3 church side, correct?

> Α. That is correct.

Q. And that side yard buffer was increased during our application, correct?

Α. That is correct.

That was one of the agreements of the team being responsive to concerns and comments we heard to shift so that that side yard was increased.

11 Winding down, Commissioners, ground 12 sign area, 37.1 square feet is proposed, required is 13 30 square feet. This is interesting because the sign 14 face is actually much smaller, but when you add the 15 decorative borders, et cetera, it does come in at a 16 square foot area that is greater than the strict 17 application of your code. My understanding is that 18 if necessary, the applicant is willing to actually 19 decrease it even further, but the intent, 20 Commissioners, as you heard from our project 21 architect was to provide context sensitive signage on

the site that was decorative, something that the 22

23 community could be proud of and, of course, we want

24 it to be readable, legible, conspicuous, so the

25 drivers, the intended audience can easily identify 1 our site and make some intelligent decisions about how they enter our site.

3 Similarly, the distance from the bottom

4 of the sign display area to the ground, 4 foot is required, 2 foot is proposed. The intent here was

6 strictly to be as context sensitive as possible.

This standard is probably more appropriate for a

8 commercial area, but given the nature and character

9 of this area, it was our intent to keep it lower and

10 be context sensitive.

> Q. And the 4 foot that is referenced is typically to allow a line of sight in a commercial area, correct?

> > A. That is correct.

15 Q. So our design is really for a low

plan.

A. That is very correct and, again, in the language of the C-2 context, I would submit to this board as a professional planner that what we're proposing in each of these cases is a better zoning alternative than the strict application of your code.

22 I can confidently say to you if you 23 were to grant any and all of the C variances, there 24 would be no substantial detriment to the public good

25 and certainly no substantial impairment to the zone

And that would conclude my direct

4 Again, thank you for being patient, but 5 I'm here to answer questions.

6 Q. Let me just ask one final question: As 7 a professional planner, do you believe that the applicant by way of its professionals has satisfied

the proofs pursuant to the Municipal Land Use Law as

10 to what is required for the grant of the variance

11 relief for the use, itself, and the various

12 C variances, whether they're C-1 or C-2 and whether

13 they're subsumed or not?

14 A. I do, both for the D-1 and the C variances, whether a C-1 or C-2.

16 In my opinion, this is a good

17 application for all the reasons I've mentioned, but

18 more importantly you have an applicant and a team 19 that have demonstrated their ability to be creative

20 and responsive and meet the burden of those proofs to

21 make my job much easier.

22 And in your review of everything, did 23 you come across anything that was asked of this 24 applicant from the board during the course of the 25 application that the applicant did not agree to look

1 MS. MAGARRO: 2016. I don't have the 2 page number.

Since most of the Borough's recreation lands are not centrally located, explore and pursue any opportunities that arise to obtain properties suitable for recreation near the Borough's central zone.

One example of a recent success story is the Oaks property on Central Avenue north of Haring Drive.

One other such pursued property that has not as yet been successful is the historic Gerrit Haring House property adjacent to the west side of

the Korean Presbyterian Church of the Palisades,which is a different church now on Old Tappan Road

16 west across from Russell Avenue, which this property.

So, as a planner, when you're discussing inherently beneficial uses, in this case would be mutually exclusive, your beneficial use of the assisted living is a generalized one and can be placed in other locations. This is a unique piece of land that is specifically named in the Master Plan.

So, as a planner, how would you prioritize a specifically named use of a specifically named property versus a generalized community

1 beneficial use.

THE WITNESS: It's an excellentquestion.

This is, perhaps, a super particular instance because in my opinion they're not mutually exclusive. Why? Because you have a situation where the Borough has identified an alternate site for that historic structure and an applicant who has agreed to

9 at significant expense to relocate that historic10 structure, which was in a state of disrepair to a

11 site which may actually be more suitable given its

12 access and visibility, et cetera, and the care of

13 that property. So --

MS. MAGARRO: They mentioned the historic house, but they're referring to this property as a recreational property, not as a museum.

So once its become an assisted living,

So once its become an assisted livingit will no longer be a recreational property. Theyare mutually exclusive.

THE WITNESS: I don't agree with that, but I hear what you're saying.

MS. MAGARRO: Well, how could it be a recreational property centrally located at this

specific location if it becomes an assisted living?THE WITNESS: Again, and I tried to

address this in my earlier comment about the MasterPlan. I still can't find the citation.

3 I'm looking at the Master Plan, but you4 read it verbatim, so I will go on faith that that's

5 what is in the 2016 Master Plan, but as a planner,

6 I'm looking at the Master Plan in it's totality and

7 that's why I read the goals and objectives that I

8 read and I would stand by my opinion that the

9 application before this board is for the development

10 for the purposes that it was stated and submitted and

11 that the tradeoff or compromise in this case is the

12 relocation of that structure, yet it won't be used as

13 recreational space, but I'm not sure it is now, which

14 salvages the historic significance of that site or

15 this structure and allows for a development of this

16 site in a way that has been quite challenging, but

17 successfully done.

MS. MAGARRO: No, I'm not asking aboutthat historic building as a historic building.

That's used as a reference point to dictate which piece of property is being discussed in the Master Plan.

So, I'm not asking about using thatbuilding as a historic building. I'm asking about

25 using that acreage as recreational space in the

102

1 center of town. That's what's -- and it doesn't say

2 that it's being used as that. It's saying that it

3 should be acquired if at all possible.

4 So given a specific use of a specific

5 piece of land versus a generalized beneficial use,

6 how can one prioritize those?

7 THE WITNESS: Again, if you look at the 8 totality of the Master Plan and the number of goals

9 and objectives and weigh them against the citation

10 you're providing, my testimony will still be that the

11 application before this board and its community is a

12 good application, it does advance the goals and

13 objectives of the Master Plan for all the reasons

14 I've stated.

MS. MAGARRO: Okay.

16 I disagree.

17 THE WITNESS: Okay. Fair enough.

18 MR. ELLER: Can I -- quick question,

19 because --

CHAIRMAN WEIDMANN: Go ahead.

MR. ELLER: Just because the point has

22 come up a couple of times about that language in the

23 Master Plan and this is, I guess, more for Bob, but

24 the point has come up if the property becomes

25 available, et cetera.

PRICE: I think that what the 7 As a planner, did you ever consider 8 planner testified to were two prongs in terms of the 8 putting the parking lot that's take up a lot of 9 increase in the population, it was two sentences. He 9 impervious footprint on the lot, putting it a level, 10 did not testify as to any need. He testified based 10 two level underneath so that the people who come to 11 upon the 2019 American Community Survey five-year 11 visit don't have to go fight through rain and snow 12 estimate. 12 and storm which we will have and have the convenience 13 13 of visiting their relatives indoors and having access They were -- he was not testifying as to his personal research or his recollection or his 14 14 to elevators and whatnot, to create more trees or 15 data. He was referring to a document done by others 15 nature preserved areas in the parameter, as a planner 16 and referred to Old Tappan and actually in that 16 to have maybe a nature walk surrounding the parameter 17 document that he referred to said that it was 60 year 17 instead of a parking lot, which will create 18 18 old that increased. impervious, rainwater that's going to go somewhere, 19 Correct, Mr. Williams? 19 lights that will be, you know, for the night, light 20 THE WITNESS: That's correct. 20 pollution. 21 21 MS. FONOROW: And I'm just -- this was So as a planner, would you be able to 22 presented to the public as part of your testimony and 22 plan something that will reduce the square footage of 23 23 we we're told we can ask questions based on what your the building for imperviousness and go, since you 24 testimony is. 24 have a -- \$26 million, I think you stated, right, as 25 So where you sourced it or what year it 25 a total project, I'm not quite sure how much more

133 135 1 it's going to cost, but seeing that it may increase, 1 THE WITNESS: At this point, no, but I 2 you know, 1 to 5 percent of it to create more to save can tell you that this team investigated a number of the large trees that we have may pacify or, you know, scenarios, some of which were discussed in previous 4 to bring some of the people who have so much things hearings, but, yeah, I'm not the site engineer, so 4 5 against the killing off of a lot of the nature that would not be my purview. 6 things, have you ever planned that or thought about 6 MS. CHO: Okay. So, I may -- if I may 7 7 ask one more question, I was just made aware actually 8 yesterday of this incident that happened and you had THE WITNESS: I'll try to answer this 8 9 9 mentioned that the inherent benefits of a church and question as best I can. 10 I understand your question did I plan 10 the nursing home. There is a church right across 11 it and just so we're clear, we have a site engineer 11 from CDW, the middle school. 12 12 that gave a lot of thought to how to design the site, And we were talking about -- I know how to be sensitive to the wetlands and so I think my 13 this is the traffic issue, but this is not a traffic, 13 14 testimony as a planner was based on the testimony 14 this is a safety issue. There was a child who was 15 from our site engineer. It was not an easy feat and 15 hit right outside of the church and they don't have 16 so he deserves a lot of credit for that. 16 any traffic really and a child was hit. 17 Whether the site engineer, not me, the 17 So, how would you prevent that from 18 site engineer considered subterranean parking, to be 18 happening when now we have the Enclave, which is about over 200 units and more kids coming and walking 19 honest with you, I don't know the answer to that. 19 20 I know that that's even more 20 on that sidewalk now that we made it? I mean, how do 21 21 you -challenging than what we have, but that would be a 22 question for our site engineer. I don't know that he 22 MS. PRICE: Mr. Williams --23 did that. 23 MS. CHO: Lights or crosswalks or --24 MS. CHO: Okay. It's difficult for me 24 MR. REGAN: It's beyond the planner's because I live right abut to the back and you as a 25 25 testimony. 136 1 MS. CHO: Is that beyond the planner or 1 planner had done some -- as you say, what is that 2 drainage, the -does the planner --3 THE WITNESS: No. 3 MR. REGAN: It's beyond his testimony. 4 MS. CHO: -- water retention thing? He testified extensively about the criteria for 4 5 THE WITNESS: No, the site engineer. 5 variance relief. 6 MS. CHO: That's the site engineer that 6 MS. PRICE: Right. Our traffic 7 does that? 7 engineer --8 MS. PRICE: Yes. 8 MR. REGAN: Ask a question about that. MS. PRICE: Right. 9 MS. CHO: Okay. All right. 9 MR. ELLER: Maybe it was just a 10 THE WITNESS: So, I apologize for any 10 11 confusion. 11 confusion about what a planner does versus an 12 What I did in my introductory comments 12 architect or an engineer. It sounds like it's just a 13 as a planner was to try and summarize what other 13 misunderstanding. 14 14 experts testified to over the course of months of MS. CHO: I guess because it was the these hearings so that it gave context for the 15 culmination of information that you presented in the 15 16 planning arguments in support of the variance. 16 beginning and we thought that that's all you did, 17 MS. CHO: I see, okay. 17 because you said it, so we were addressing you and my 18 18 concern was a child that I know was hit and so how do I'm just into saving the trees and 19 trying to reduce water going into the wetlands behind 19 we prevent that? 20 my basement and getting flooded, so I wanted to know 20 Have you ever thought about the 21 21 if you had considered. prevention of children being hit on that sidewalk? Would you be speaking with the site 22 22 As you mentioned, you guys were doing a 23 engineer to consider, "subterranean" was the word 23 lot to prevent the water flow from going to Holbrook, 24 that you used for the parking space? 141 1 MR. GAMBUTI: The age thing. Because 2 you brought up 60 year old as your point of 3 reference. 4 So, I was just curious how many 5 60-year-olds use assisted living facilities? Is 6 there some kind of -- and why you would use that 7 number, because I mean, in my mind I would think it 8 would be like, you know, 75, 80, 85 would actually be 9 -- and what percentage of the population in Old 10 Tappan or the surrounding communities is of that age 11 that would actually use the facility. 12 THE WITNESS: So, perhaps, two 13 questions again. 14 One might be more appropriately or was 15 probably more appropriately answered by the 16 applicant's representative, Mr. McElwee going back to 17 the first hearing where he talked about his market 18 analysis for the site and his analysis of the 19 demographics in general, both go hand in hand. 20 The other question seemed to be more 21 about how I chose my data points and all I did was 22 look at the demographic trends provided by the Census 23 report that I cited and it showed that there was a

trend for 60 plus, I think was my testimony, to be

growing at a significant rate both here in Old Tappan

24

25

24

25

2 But you've -- your response to a question from the board about what should guide their 3 4 decisionmaking from a prioritization level in evaluating this application. 6 According to your interpretation of 7 Municipal Land Use Law and the determination of 8 inherently beneficial use of this project, is it my 9 understanding that you recommend as a professional 10 planner here that that -- that one element 11 essentially be the foundational, the lynchpin as it 12 were, the foundational aspect of their decisionmaking 13 for proving the key issue here, which is the D-2 14 variance. 15 THE WITNESS: D-1. 16 MR. CARPENTER: Oh, D-1, thank you so 17 much. 18 The land use variance, because this use 19 that -- that your client is proposing is not 20 presently permitted and that the -- this specific 21 property is also explicitly called out as an 22 aspirational goal in the land use -- in the Master 23 Plan in furtherance of the goals and the spirit of the -- of the Master Plan. 24 25 So, is it your estimation that that one 144

142

1 and in Bergen County. 2 I would argue that's something we are 3 seeing in other municipalities as well throughout the 4 State of New Jersey. 5 MR. GAMBUTI: Right. 6 So, I guess then -- but what -- so 7 that's 60 plus, so then we're talking more about the 8 future than what the need is today. 9 THE WITNESS: No, no, the testimony was 10 if you looked at 2019, for example, the increase in 11 2019 from 2010 was significant and if we go even 12 further, my submission to you would be that it just 13 keeps growing, but my data points were from 2010 to 14 2019. 15 MR. GAMBUTI: Okay. 16 Thank you. 17 THE WITNESS: Yup. 18 CHAIRMAN WEIDMANN: Anyone else wish to 19 be heard? 20 You've spoken already. 21 22 MR. CARPENTER: Kurt Carpenter, 23 168 Central Avenue, Old Tappan.

1 specific -- the inherently beneficial use of this

function should supercede both the Master Plan and

3 the actual present zoning law and the -- the zoning

of this property and would basically unlock the

5 project?

20

6 THE WITNESS: It's a good question.

7 There was a lot in there, so give me a second to try

8 and parse it.

9 No, it doesn't supercede the Master 10 Plan and I don't think you or anyone else should look

11 at it as an either/or or zero sum, that's not how the

12 land use is set up.

13 But to your point about why did I 14 choose to say inherently -- the status of this use as 15 inherently beneficial being so important requires, 16 perhaps, a little bit of scenario playing, right?

17 So, if you were proposing a -- I'm 18 going to exaggerate to make a point -- a prison, 19 which may not have inherently beneficial status, the

requirements to meet the proofs are exponentially

21 greater, because it's not inherently beneficial.

22 You heard me mention in my testimony 23 there's an enhanced quality of proof when it's not 24 inherently beneficial. That's jargon, but what it 25 really means is the board deliberation requires a

informative presentation. I appreciate that.

Mr. Williams, that was a very

145 147 1 higher standard of proof. 1 thought you had the wherewithal to deal with all the 2 I went through my testimony to explain environmental constraints, you would go to this board what the state defines inherently beneficial, as what functioning as the planning board and submit your 3 4 the courts define it as and they give it a less 4 application, get approved or denied. 5 stringent view entirely because it benefits the 5 We came with ours and we'll hopefully 6 general public and that's why I think that's so 6 get approved, but the board has to basically look at 7 important, because it's different than, you know, I each application based on their singular or individual merit, but it's not superceded. 8 want to put in a -- you know, an amusement park 8 9 9 because it's going to benefit me. MR. CARPENTER: All right. Thank you 10 The inherently beneficial use is 10 very much. 11 something whose benefit accrues to the larger 11 CHAIRMAN WEIDMANN: Any other 12 community as opposed to just the developer. 12 questions? 13 MR. Is there ever a case where 21 be -- the use of this property, right, in this 21 there would be an equal importance for preserving a 22 function would supercede even that scenario? 22 piece of property? 23 THE WITNESS: No. 23 THE WITNESS: So, there may be -- I'm 24 So, I would encourage you not to think 24 not sure I understand the question 100 percent. 25 of superseding, because that's just not how the land 25 Does the Municipal Land Use Law include use -- I think I'm going to answer the question. in its characterization of inherently beneficial use 1 1 2 MR.
