1	INDEX (Continued)	1	are Class I and Class III members.
2	<u>EXHIBITS</u>	2	(Whereupon, Councilman Gallagher
3	NO. DESCRIPTION IDENT/EVID	3	recuses himself and steps off the dais.)
4	L-1 Letter, dated June 7, 2022 15	4	CHAIRMAN WEIDMANN: Tom, when's the
5	A-14 Letter, dated May 27, 2022 49	5	next Mayor and Council meeting?
		6	COUNCILMAN GALLAGHER: I'm sorry?
6	A-15 Plan Set, Last Revised 5/2/22 49	7	CHAIRMAN WEIDMANN: The next Mayor and
7	A-16 Colored Rendering, Site Plan Exhibit, dated 6/8/22 51	8	Council meeting?
8	, , , , ,	9	COUNCILMAN GALLAGHER: Third Monday in
9	A-17 Stormwater Management Infiltration Testing Report Prepared by	10	July, 4, 11, 18.
10	Geo-Technology Associates, 3/07/22 58	11	CHAIRMAN WEIDMANN: So there's no more
	A-18 Geo-Technical Exploration,	12	this month, June?
11	Prepared by Geo-Technology Associates 58	13	COUNCILMAN GALLAGHER: No, we just had
12	A-19 Vehicle Turning Plan,	14	our June council meeting this past Monday and July
13	Sheet 19 of 20, 5/02/22 71	15 16	and August, it's just one a month.  MS. FROHLICH: You have a meeting on
14	A-20 House of Worship Plan, 2/28/22 178	17	the 20th.
15	A-21 Residential Subdivision Plan,	18	COUNCILMAN GALLAGHER: I'm sorry?
	2/11/22 179	19	MS. FROHLICH: There's a meeting on the
16 17		20	20th.
18 19		21	COUNCILMAN GALLAGHER: The 20th of
20		22	what?
21 22		23	MS. FROHLICH: June.
23 24		24	COUNCILMAN GALLAGHER: Mayor and
25		25	Council?
	6		8
1	COUNCILMAN GALLAGHER: My other point	1	MS. FROHLICH: Mayor and Council.
2	from a council standpoint is my understanding is the	2	COUNCILMAN GALLAGHER: Oh, I'm sorry.
3	Chairman, perhaps, at the beginning of the	3	(Laughter.)
	application will be making a comment about a comment	4	COUNCILMAN GALLAGHER: I'm already in
5	that he made last last meeting about the house and	5	July.
6	the Mayor and Council have no no interest in	6	MS. FROHLICH: June 20th and then
7	preserving the house or the wetlands or anything else	7	there's only one meeting in July and one meeting in
8	on the property.	8	August.
10	And all I can say is that from a Mayor and Council standpoint, there has been zero	10	COUNCILMAN GALLAGHER: June 20th, then July 18th.
11	discussion regarding that piece of property, because	11	CHAIRMAN WEIDMANN: Okay. Just
1		12	regarding this application, I had made a statement
12			
12 13	it sits in front of the planning board tonight and	13	,
			that the Mayor and Council were not interested in the
13	it sits in front of the planning board tonight and probably for several months.	13	,
13 14	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no	13 14	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.
13 14 15	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I	13 14 15	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and
13 14 15 16	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I just wanted to make that clear and the Chairman might	13 14 15 16	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and Council and if anyone is from the public here or
13 14 15 16 17	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I just wanted to make that clear and the Chairman might have something before the application starts tonight.	13 14 15 16 17	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and Council and if anyone is from the public here or anyone from the town is interested in preserving that
13 14 15 16 17 18 19 20	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I just wanted to make that clear and the Chairman might have something before the application starts tonight.  And that concludes my report.	13 14 15 16 17 18 19 20	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and Council and if anyone is from the public here or anyone from the town is interested in preserving that building, my recommendation is you attend the Mayor
13 14 15 16 17 18 19 20 21	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I just wanted to make that clear and the Chairman might have something before the application starts tonight.  And that concludes my report.  (Whereupon, the board conducts agenda	13 14 15 16 17 18 19 20 21	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and Council and if anyone is from the public here or anyone from the town is interested in preserving that building, my recommendation is you attend the Mayor and Council meeting on either what is it, June
13 14 15 16 17 18 19 20 21 22	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I just wanted to make that clear and the Chairman might have something before the application starts tonight.  And that concludes my report.  (Whereupon, the board conducts agenda items.)  CHAIRMAN WEIDMANN: Now we have 244 Old Tappan Road.	13 14 15 16 17 18 19 20 21 22	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and Council and if anyone is from the public here or anyone from the town is interested in preserving that building, my recommendation is you attend the Mayor and Council meeting on either what is it, June MS. FROHLICH: June 20th.  CHAIRMAN WEIDMANN: June 20th or July 18th and speak with the Mayor and Council
13 14 15 16 17 18 19 20 21 22 23	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I just wanted to make that clear and the Chairman might have something before the application starts tonight.  And that concludes my report.  (Whereupon, the board conducts agenda items.)  CHAIRMAN WEIDMANN: Now we have 244 Old Tappan Road.  COUNCILMAN GALLAGHER: I'll be stepping	13 14 15 16 17 18 19 20 21 22 23	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and Council and if anyone is from the public here or anyone from the town is interested in preserving that building, my recommendation is you attend the Mayor and Council meeting on either what is it, June  MS. FROHLICH: June 20th.  CHAIRMAN WEIDMANN: June 20th or July 18th and speak with the Mayor and Council regarding it. Okay? So that's still up in the air.
13 14 15 16 17 18 19 20 21 22	it sits in front of the planning board tonight and probably for several months.  So the Mayor and Council has had no discussions on any aspect of this application. So I just wanted to make that clear and the Chairman might have something before the application starts tonight.  And that concludes my report.  (Whereupon, the board conducts agenda items.)  CHAIRMAN WEIDMANN: Now we have 244 Old Tappan Road.	13 14 15 16 17 18 19 20 21 22	that the Mayor and Council were not interested in the old farmhouse on that property. I probably misspoke.  I spoke to some people on the Mayor and Council and if anyone is from the public here or anyone from the town is interested in preserving that building, my recommendation is you attend the Mayor and Council meeting on either what is it, June MS. FROHLICH: June 20th.  CHAIRMAN WEIDMANN: June 20th or July 18th and speak with the Mayor and Council

	9		11
1	MS. PRICE: Yes.	1	MS. PRICE: Oh, great.
2	So just for the record, we have our	2	MS. FROHLICH: As of right now, you
3	court reporter again this evening.	3	have a quorum.
4	Gail Price from the firm of Price,	4	MS. PRICE: Okay.
5	Meese, Shulman & D'Arminio on behalf of the	5	CHAIRMAN WEIDMANN: We do?
6	applicant.	6	MS. FROHLICH: Yes, as of right now
7	I have a few housekeeping items that we	7	there is a quorum.
8	need to take care of beforehand. We left off at the	8	MS. PRICE: Great, okay.
9	last meeting with our architect. I had finished	9	Thank you.
0	direct, but there were a lot of members of the public	10	And my team is still good; yes, for the
1	who had raised their hands at the end of the night	11	22nd? Okay.
2	saying that they had questions, so we carried him for	12	I don't see any negative head shakes,
3	public questions this evening.	13	so that's good.
1	MR. REGAN: I think that's the starting	14	So one of the issues with
5	point tonight, I believe.	15	Mr. Steinhagen's updated letter goes to the
6	MS. PRICE: Yes.	16	involvement with Lakeview and if the board remember
7	In the meantime, we had responded to	17	for the last meeting, I had supplied easement
3	board questions, questions from your professionals	18	documentation to Mr. Regan and the board, Mr. Skrab
•	and some questions that came up on life safety issues	19	and Mr. Szabo dating back originally to 1991 and then
)	and we supplied the board with revised a revised	20	as well to 2021.
l	civil package from Dynamic Engineering and we also	21	So in connection with the Lakeview
2	supplied you with the results from the geotech,	22	approval, which you now have the site plan, as well
3	additional tests that we had conducted on the site.	23	as the resolution, there was a 15-foot drainage
Ļ	The board members who had asked for those are not	24	easement provided to what I'm going to call the
5	here tonight, so, but we still have more nights to	25	church lot, but the church wasn't the owner at that
	10		12
1	get through.	1	point in time for that property. Lakeview
2	We also as your counsel had asked	2	established that 15-foot easement to the church lot
3	for, we had also asked for the approved site plan set	3	•
	for Lakeview together with the resolution and Diane	3 4	our lot allowing the tie-in into the church.
			•
;	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and	4	our lot allowing the tie-in into the church.
;	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991	4 5	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?
;	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and	4 5 6	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4
;	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board,	4 5 6 7	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4  into the basin on Lot 1.  Just to make it perfectly clear, I
;	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute	4 5 6 7 8	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I
;	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the	4 5 6 7 8 9	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4  into the basin on Lot 1.  Just to make it perfectly clear, I  provided notice under the Municipal Land Use Law from
	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board	4 5 6 7 8 9	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4  into the basin on Lot 1.  Just to make it perfectly clear, I  provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.
1 5 5 7 8 9 1 2	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the	4 5 6 7 8 9 10	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4  into the basin on Lot 1.  Just to make it perfectly clear, I  provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from
1 5 7 8 9 1 2 8	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to	4 5 6 7 8 9 10 11	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4  into the basin on Lot 1.  Just to make it perfectly clear, I  provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from
1 5 6 7 8 9 9 1 2 8 4	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.	4 5 6 7 8 9 10 11 12 13	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4  into the basin on Lot 1.  Just to make it perfectly clear, I  provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our
	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between
	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.  Before the end of the night, I also want to just come back to the fact that we had left off at the last meeting with a special meeting	4 5 6 7 8 9 10 11 12 13 14 15 16	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between Lot 3 and Lot 4. The Lot 4 easement is the easement
1	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.  Before the end of the night, I also want to just come back to the fact that we had left off at the last meeting with a special meeting request and we polled the board and my team with	4 5 6 7 8 9 10 11 12 13 14 15 16	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between Lot 3 and Lot 4. The Lot 4 easement is the easement that goes directly with Lot 1, which is Lakeview.
1 5 6 7 8 9 1 5 6 7 8 9	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.  Before the end of the night, I also want to just come back to the fact that we had left off at the last meeting with a special meeting request and we polled the board and my team with June 22nd as a possible.	4 5 6 7 8 9 10 11 12 13 14 15 16 17	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between Lot 3 and Lot 4. The Lot 4 easement is the easement that goes directly with Lot 1, which is Lakeview.  There are questions that have arisen
1 5 5 7 8 9 9 1 5 5 5 7 8 9 9 9	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.  Before the end of the night, I also want to just come back to the fact that we had left off at the last meeting with a special meeting request and we polled the board and my team with June 22nd as a possible.  Everybody was available, but in light	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between Lot 3 and Lot 4. The Lot 4 easement is the easement that goes directly with Lot 1, which is Lakeview.  There are questions that have arisen concerning entitlement to use the easement, is the
1 5 6 7 8 9 9 1 5 6 7 8 9 9 1	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.  Before the end of the night, I also want to just come back to the fact that we had left off at the last meeting with a special meeting request and we polled the board and my team with June 22nd as a possible.  Everybody was available, but in light of graduations and other commitments, we were going	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between Lot 3 and Lot 4. The Lot 4 easement is the easement that goes directly with Lot 1, which is Lakeview.  There are questions that have arisen concerning entitlement to use the easement, is the easement the best thing.
4 5 7 3 9 9 1 1 2 3 3 4 5 7 3 9 9 9 1 1 1 1 2 1 1 1 1 1 2 1 1 1 1 1 1	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.  Before the end of the night, I also want to just come back to the fact that we had left off at the last meeting with a special meeting request and we polled the board and my team with June 22nd as a possible.  Everybody was available, but in light of graduations and other commitments, we were going to have everybody go back and check. So I just want	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between Lot 3 and Lot 4. The Lot 4 easement is the easement that goes directly with Lot 1, which is Lakeview.  There are questions that have arisen concerning entitlement to use the easement, is the easement the best thing.  So after you hear from Mr. Steinhagen,
3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1 2 3 4	for Lakeview together with the resolution and Diane was very good at finding the set of plans from 1991 and the resolution and we had those copied and provided and Mr. Steinhagen has advised the board, and I'm sure he will want to come up in a minute after I get through my summary and be heard, because he filed a letter last evening updating the board that he now represents Lakeview in addition to the single homeowner that he has represented prior to tonight's hearing.  Before the end of the night, I also want to just come back to the fact that we had left off at the last meeting with a special meeting request and we polled the board and my team with June 22nd as a possible.  Everybody was available, but in light of graduations and other commitments, we were going to have everybody go back and check. So I just want to make sure we circle back on that before everybody	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	our lot allowing the tie-in into the church.  MR. REGAN: Lot 3 to use Lot 4?  MS. PRICE: Correct, Lot 3 into Lot 4 into the basin on Lot 1.  Just to make it perfectly clear, I provided notice under the Municipal Land Use Law from all three lots; Lot 3, Lot 4 and Lot 1.  So my notice was all inclusive from those three properties. I did not omit Lot 1 from the notice despite the fact that our client and our lot has no direct interaction by an easement with Lot 3 with Lot 1. Our easement is directly between Lot 3 and Lot 4. The Lot 4 easement is the easement that goes directly with Lot 1, which is Lakeview.  There are questions that have arisen concerning entitlement to use the easement, is the easement the best thing.  So after you hear from Mr. Steinhagen, I'd ask just to be able to be heard again.

	13		15
1	through the limited revisions. I don't anticipate a	1	MR. REGAN: Just for the record, I did
2	lot of testimony.	2	speak to Mr. Steinhagen today. I was out of the
3	And then I have our landscape architect	3	office today, multiple meetings. I have not done
4	where you had a lot of questions concerning	4	more than a cursory review of this letter.
5	landscaping and he's here this evening to answer all	5	So if we're going to get involved in
6	those questions. And I'd be surprised if we get any	6	any kind of discussion regarding it, I'm probably
7	further than that, but that then will leave traffic,	7	going to need a little more time to do research. I
8	historic and planning, three witnesses.	8	do have some thoughts and opinions, which I'll
9	MR. REGAN: After tonight?	9	articulate after he has indicated his position.
10	MS. PRICE: Correct.	10	MR. STEINHAGEN: So the sum and
11	So that's where we are from a	11	substance is, and as Ms. Price said, the easement
12	housekeeping standpoint. I don't know if you want to	12	that the applicant is using to discharge its
13	hear from Mr. Steinhagen now on the Lakeview or	13	stormwater out of the detention basin at the north
14	whether you want	14	side of its property is with the church lot, it's not
15	MR. REGAN: We can hear from him now,	15	with, like, Lakeview. Lakeview conveyed to what is
16	Mr. Chairman.	16	now the Syrian church lot in 1991 a drainage easement
17	CHAIRMAN WEIDMANN: Do you have a	17	subject to certain conditions.
18	comment?	18	MR. REGAN: Lot 4?
19	MS. PRICE: Okay.	19	MR. STEINHAGEN: Correct, Lot 4.
20	MR. REGAN: Ms. Price you may be	20	It conveyed it to Lot 4. It didn't
21	involved in this discussion.	21	convey it to Lot 3.
22	MS. PRICE: I think I will be.	22	Lot 4 conveyed a drainage easement to
23	MR. REGAN: Don't go to far.	23	Lot 3, which allows the water from Lot 3 to go onto
24	MS. PRICE: I'm not going to go	24	Lot 4 and then into the pipes of Lakeview and
25	anywhere.	25	Lakeview does not consent to taking the water.
	14		16
1	MR. STEINHAGEN: Mr. Chairman, Members	1	So it's our position that the drainage
2	of the Board, good evening, Daniel Steinhagen from	2	design that the applicant is proposing is not
3	Beattie Padovano on behalf of Angeline Sheridan and	3	feasible, we are not going to accept it and that the
4	also now as of this week, the Lakeview at Old Tappan	4	board is frankly wasting its time hearing an
5	Condominium Association. I do not represent any of	5	application that the applicant cannot construct.
6	the individual members. I represent the association,	6	The situation that the board is likely
7	which owns the common element of the condominium.	7	to encounter in the event that it goes forward is
8	Ms. Price referred to my letter, which	8	that there's going if the application is approved
9	Mr. Regan, I'd like to mark, if that's okay, for	9	and the construction starts, there's going to be a
10	identification as L-1.	10	lawsuit and Lakeview is going to protect its drainage
11	MR. REGAN: L?	11	infrastructure.
12	MR. STEINHAGEN: L for "Lakeview."	12	There was an e-mail earlier today from
13	MR. REGAN: Oh, okay.	13	Mr. Skrable questing where it was and I think we
14	MR. STEINHAGEN: If that's okay. We	14	confirmed that the pipe that discharges off of the
15	can do it however you want.	15	church lot goes into the drainage system that goes
16	MR. REGAN: Okay, that's probably	16	into the pond in Lakeview and frankly Lakeview
17	better just in case there are other objectors.	17	doesn't want the water.
18	MR. STEINHAGEN: Yeah, and for the	18	MR. REGAN: So the issue is whether
19	record, it's dated June 7th.	19	there can be a discharge of the water from 4 into 3
20	I e-mailed it to Ms. Frohlich, also to	20	and then into the Lakeview?
21	Mr. Regan, Ms. Price and also to the attorney for the	21	MR. STEINHAGEN: The issue is a matter
22	church that was referenced earlier.	22	of property law; does the association have to accept
23	(Whereupon, Letter, dated June 7, 2022	23	water from another property owner without its
24	is received and marked as Exhibit L-1 for	24	consent.
25	identification.)	25	MR. REGAN: And it relates to the

	17		19
1	language of the document?	1	should do it, because otherwise one of you will be
2	MR. STEINHAGEN: Correct.	2	right and one of you will be wrong and the board will
3	MR. REGAN: So it's a legal question.	3	decide what to do in terms of continuing to hear the
4	MR. STEINHAGEN: Absolutely.	4	application or not, but it seems to me that this is
5	And, Mr. Regan, I know what you're	5	kind of a threshold issue now and it was just really
6	going to say and I put it in the letter, the board	6	raised today in the past 24 hours.
7	typically doesn't decide legal questions, except that	7	MR. STEINHAGEN: And without dispute,
8	by allowing the applicant to go forward, you're	8	it was just raised because I was frankly just
9	essentially allowing that to happen. Your ordinance	9	retained, but this is it's a consent issue just
10	requires that the applicant submit the easements.	10	like every application that the board sees where the
11	They don't have an easement to put the	11	applicant doesn't own the property. They need the
12	water on my property and I'll give you an example,	12	consent of the property owner. They're using our
13	Chairman. We're scheduling a special meeting for	13	system, they need our consent.
14	this applicant on June 22nd.	14	MR. REGAN: Well, that's a question
15	Now, if Ms. Price and I decide she	15	that would have to be decided. It's a legal issue.
16	wants to give me the special meeting for an	16	I mean, there's really no prohibitory language in the
17	application that I had. It's a hypothetical, there	17	documents that I've been able to find, but, you know,
18	is no application. The board would say, whoa, whoa,	18	your position has some merit.
19	whoa, the fact that you guys made a decision doesn't	19	But my feeling is, I think it should be
20	mean anything, we get to decide who we hear.	20	addressed up front rather than six months or a year
21	It's the same thing, we get to decide	21	from now. Does that make sense?
22	whose water we take.	22	MS. PRICE: Bob, I'm not yeah, I'm
23	MR. REGAN: Why don't we try to cut to	23	not disagreeing with you. Let me just raise a couple
24	the chase.	24	of other issues.
25	I mean this meeting, this application	25	I have a significant question as we
	18	_	20
1	already had two full nights. We're going to have	1	stand here tonight as to whether the Lakeview
2	close to a full night tonight, three hours,	2	Condominium Association has standing to get up here
3	tin de ana a man moardi	3	and make these arguments, because contrary to
4	We're probably going to have another	4	Mr. Steinhagen's position, under the Condominium Act,
5	three-and-half hours on the 22nd. I doubt Ms. Price	5	a condominium association does not own the common
6	will finish that night, but I guess miracles do	6	elements. Each unit owner owns
7	happen.  It's probably going to be a couple of	7	MR. REGAN: Has an undivided
8		8	percentage.  MS. PRICE: Correct.
9 10	more meetings after that.		So the association can't write this
11	Wouldn't it appear to make sense to get a determination in the form of declaratory judgement	10 11	letter, stand up here, Bob, and make these positions.
12	from a court as to what rights the applicants have to	12	So that has to be
13	utilize the easement then to discharge into Lakeview?	13	MR. REGAN: You and I might have a
14	Otherwise, we could have another six	14	discussion on that. You know how New Jersey courts
1-7	otherwise, we could have another six		discussion on that, for know now new sersey courts

months of hearings and everybody's time and money 15 will be wasted; you, as the objector; the applicant, 16 17 their witnesses; the board's time --18 MR. STEINHAGEN: I don't want to waste 19 the board's time. 20 MR. REGAN: -- the board and the other 21 professionals are here as volunteers.

get this issue resolved early on, maybe by the filing

you know, you guys can figure it out and one of you

of that action in Chancery by an order to show cause,

It would seem to me to make sense to

22

23

24

25

**15** are on standing. MS. PRICE: Agreed, but it has to be 16 17 rectified. I don't know whether there was a board of 18 directors meeting. 19 Is this board of directors entitled to authorize it? Do you need a vote of the unit owners? 20 There's all kinds of issues on the condominium side 21 that are not addressed here. 22 23 MR. REGAN: When did you last have a

MS. PRICE: It's not just a standing.

case where a court said no standing?

24

25

	21		23
1	It's a matter of coming in here and making these	1	interject on that one before we assume that that's
2	arguments under a land use, because it's a private	2	okay?
	-		•
3	party issue, that's why, because that's where your	3	Because I feel like the prior drainage
4	declaratory judgement issue comes in. It's not a	4	plan created a concentrated flow onto an adjacent
5	land use board issue	5	property, which as far as I know is state statute,
6	MR. REGAN: No, I understand.	6	you can't do that. I don't think we have the ability
7	It should be the Chancery Division.	7	to allow them to do that either.
8	MS. PRICE: Correct.	8	MR. STEINHAGEN: And respectfully, it
9	MR. REGAN: I think it should be	9	all goes into an inlet that goes into our pipe, so
10	resolved. I feel very strongly about that, getting	10	it's the same issue.
11	it resolved early on, because this application could	11	MR. REGAN: Even with what's she's
12	go easily to the end of the year and I have a problem	12	talking about?
13	with wasting the board's time, if the board decides	13	MR. STEINHAGEN: Correct.
14	to hear the application and it's ultimately	14	MS. PRICE: That's a different review
15	determined by a judge that we didn't have a right to	15	issue. It doesn't involve a private property owner
16	hear it because of this issue.	16	easement issue. That involves a stormwater
17	MS. PRICE: And the other issue is	17	management design, which is commonplace in land use
18	MR. REGAN: It's a real concern.	18	issues and applications.
19	MS. PRICE: that we started this	19	So that's a matter of ensuring
20	application by a different drainage plan. I can pull	20	compliance with the stormwater management rules.
21	the current drainage plan that utilizes this easement	21	MR. REGAN: I assume conditions can be
22	and revert to our original drainage plan in a	22	addressed in any approval resolution.
23	heartbeat.	23	MS. PRICE: Correct. So I would ask
24	MR. REGAN: That saves everybody a lot	24	that
25	of time	25	MR. SKRABLE: But, again, just so I
	22		24
1	MS. PRICE: Correct.	1	don't mean to interrupt, I'm sorry, but the
2	MR. REGAN: and aggravation.	2	concentrated flow issue is not a stormwater
3	MS. PRICE: And I've talked to our	3	regulation issue.
4	client about that and we can do that. It complies	4	MS. PRICE: No, it's a matter of
5	with all of the stormwater management rules. We	5	ensuring that we have compliance, Tom, whether it's
6	don't need any waivers. We were doing this to	6	reducing the concentrated flow to the rear and as you
7	provide a benefit to Lakeview, because the new plan	7	brought up, directing flow elsewhere for part of it.
8	that takes all the drainage through the pipe system,	8	It's a stormwater design issue. It's not a it's
9	removes the silt and it actually helps Lakeview.	9	not an easement private property owner, private
10	MR. REGAN: Well, I think the letter	10	property owner.
11	indicates what their position is, so maybe you should	11	MR. SKRABLE: I agree with that part.
12	go back to the prior plan. You'll make my day if you	12	I just don't agree that you can create a concentrated
13	do that.	13	flow and direct it at your neighbor no matter who it
14	MS. PRICE: Correct, and we talked	14	is. One neighbor to another, I don't think state
15	about that today. So that's not going to happen	15	statute allows you to do that.
16	about that today. So that's not going to happen	40	•
		16	Let's say a certain amount of water is
17	tonight.		Let's say a certain amount of water is leaving your site now, you're not changing that,
17 18		16 17 18	leaving your site now, you're not changing that,
18	tonight.  MR. REGAN: Okay.  MS. PRICE: But	17 18	leaving your site now, you're not changing that, you're not developing anything.
18 19	tonight.  MR. REGAN: Okay.  MS. PRICE: But  MR. REGAN: But it might happen by	17 18 19	leaving your site now, you're not changing that, you're not developing anything.  There's no stormwater regs even
18 19 20	tonight.  MR. REGAN: Okay.  MS. PRICE: But  MR. REGAN: But it might happen by  July?	17 18 19 20	leaving your site now, you're not changing that, you're not developing anything.  There's no stormwater regs even involved, but you're going to take that same amount
18 19 20 21	tonight.  MR. REGAN: Okay.  MS. PRICE: But  MR. REGAN: But it might happen by  July?  MS. PRICE: It's going to happen	17 18 19 20 21	leaving your site now, you're not changing that, you're not developing anything.  There's no stormwater regs even involved, but you're going to take that same amount of flow and now put it in a pipe and shoot it at your
18 19 20 21 22	tonight.  MR. REGAN: Okay.  MS. PRICE: But  MR. REGAN: But it might happen by  July?  MS. PRICE: It's going to happen  between now and the 22nd.	17 18 19 20 21 22	leaving your site now, you're not changing that, you're not developing anything.  There's no stormwater regs even involved, but you're going to take that same amount of flow and now put it in a pipe and shoot it at your neighbor, I don't think you can do that.
18 19 20 21 22 23	tonight.  MR. REGAN: Okay.  MS. PRICE: But  MR. REGAN: But it might happen by  July?  MS. PRICE: It's going to happen  between now and the 22nd.  MR. REGAN: That's even better.	17 18 19 20 21 22 23	leaving your site now, you're not changing that, you're not developing anything.  There's no stormwater regs even involved, but you're going to take that same amount of flow and now put it in a pipe and shoot it at your neighbor, I don't think you can do that.  MS. PRICE: I would at least like to
18 19 20 21 22	tonight.  MR. REGAN: Okay.  MS. PRICE: But  MR. REGAN: But it might happen by  July?  MS. PRICE: It's going to happen  between now and the 22nd.	17 18 19 20 21 22	leaving your site now, you're not changing that, you're not developing anything.  There's no stormwater regs even involved, but you're going to take that same amount of flow and now put it in a pipe and shoot it at your neighbor, I don't think you can do that.

		1	
	25		27
1	was a help to Lakeview. So if we go back and we	1	MR. STEINHAGEN: She said she said,
2	modify the drainage plan, we can have those that	2	I can go back to the plan that was in front of the
3	testimony, Tom, and an updated stormwater management	3	board at the first hearing.
5	report presented and then you can review it in your	5	MS. PRICE: That we didn't have fully vetted by Mr. Skrable, because we changed the
6	full capacity.  MR. SKRABLE: The other thing I would	6	drainage plan.
7	say, which I think would be good news to you is,	7	MR. STEINHAGEN: And I want the record
8	regardless of the outcome of the easement issue, what	8	to be clear that if you do that, the objection still
9	we found today was there is another pipe that	9	stands, it just goes into the pipes in a different
10	bypasses Lakeview's basin. It's further down.	10	place, which you don't have consent.
11	It would require a different easement	11	MR. REGAN: Your objection is on the
12	either from Lakeview or from Bi State, but it	12	record, it's so noted.
13	completely bypasses the basin.	13	MR. STEINHAGEN: Thank you.
14	So it gets rid of that whole issue. So	14	MR. REGAN: I think next would be the
15	that's an option. You also have an option that is	15	architect
16	totally within your control to modify the grading of	16	MS. PRICE: Yes.
17	your basin a little bit and take everything out Old	17	MR. REGAN: for cross examination by
18	Tappan Road and bring it to what we're calling the	18	members of the public.
19	pond and that's totally within your control, you	19	MS. PRICE: Just for the record, also,
20	don't need anybody's consent for that.	20	and not to belabor this, we tried to also establish
21	So, as far as I'm concerned, the	21	meetings with both Lakeview and Father Jerry to meet
22	hearing can continue. We have to resolve some of	22	on site and we weren't able to do that, so just so
23	these other issues.	23	it's noted.
24	MS. PRICE: I agree with that. We can	24	MR. REGAN: Thank you for putting that
25	resolve those issues	25	on the record.
	26		28
1	MR. REGAN: Well, they're not going to	1	MR. STEINHAGEN: And just and I've
2	MR. REGAN: Well, they're not going to be resolved tonight	2	MR. STEINHAGEN: And just and I've just been retained. I'm happy to meet with the
3	MR. REGAN: Well, they're not going to be resolved tonight MS. PRICE: No.	2	MR. STEINHAGEN: And just and I've just been retained. I'm happy to meet with the applicant once we get an engineer, which is, I
2 3 4	MR. REGAN: Well, they're not going to be resolved tonight MS. PRICE: No. MR. REGAN: and I think we should	2 3 4	MR. STEINHAGEN: And just and I've just been retained. I'm happy to meet with the applicant once we get an engineer, which is, I understand, coming in the next couple of days, but we
2 3 4 5	MR. REGAN: Well, they're not going to be resolved tonight MS. PRICE: No. MR. REGAN: and I think we should continue, but they'll have to be resolved sometime	2 3 4 5	MR. STEINHAGEN: And just and I've just been retained. I'm happy to meet with the applicant once we get an engineer, which is, I understand, coming in the next couple of days, but we will want to meet.
2 3 4 5 6	MR. REGAN: Well, they're not going to be resolved tonight MS. PRICE: No. MR. REGAN: and I think we should continue, but they'll have to be resolved sometime soon.	2 3 4 5 6	MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that? In a situation where there's a backout,
2 3 4 5 6 7 8 9 10	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.	2 3 4 5 6 7 8 9 10	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are
2 3 4 5 6 7 8 9 10 11	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that	2 3 4 5 6 7 8 9 10 11 12	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?
2 3 4 5 6 7 8 9 10 11 12 13	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that elongate the time that it's running to provide	2 3 4 5 6 7 8 9 10 11 12 13	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?  THE WITNESS: That would be more
2 3 4 5 6 7 8 9 10 11 12 13	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that elongate the time that it's running to provide  THE WITNESS: Yes.	2 3 4 5 6 7 8 9 10 11 12 13 14	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?  THE WITNESS: That would be more operational depending on the catastrophic situation,
2 3 4 5 6 7 8 9 10 11 12 13 14 15	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that elongate the time that it's running to provide  THE WITNESS: Yes.  MR. SCOZZAFAVA: the same throughput?	2 3 4 5 6 7 8 9 10 11 12 13 14 15	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?  THE WITNESS: That would be more operational depending on the catastrophic situation, but generally they move residents to a portion of the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that elongate the time that it's running to provide  THE WITNESS: Yes.  MR. SCOZZAFAVA: the same throughput?  Not going weeks, but if it would have run on diesel	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?  THE WITNESS: That would be more operational depending on the catastrophic situation, but generally they move residents to a portion of the building and then depending on what's going on CSH
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that elongate the time that it's running to provide  THE WITNESS: Yes.  MR. SCOZZAFAVA: the same throughput?  Not going weeks, but if it would have run on diesel for an hour, on Bi-Fuel would it run for an hour and	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?  THE WITNESS: That would be more operational depending on the catastrophic situation, but generally they move residents to a portion of the building and then depending on what's going on CSH can answer that question.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that elongate the time that it's running to provide  THE WITNESS: Yes.  MR. SCOZZAFAVA: the same throughput?  Not going weeks, but if it would have run on diesel for an hour, on Bi-Fuel would it run for an hour and a half?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?  THE WITNESS: That would be more operational depending on the catastrophic situation, but generally they move residents to a portion of the building and then depending on what's going on CSH can answer that question.  MR. MAGGIO: Okay. Well, I'd like to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Any more question from the board?  MR. SCOZZAFAVA: Yeah, I have one.  If it's running on both, does that elongate the time that it's running to provide  THE WITNESS: Yes.  MR. SCOZZAFAVA: the same throughput?  Not going weeks, but if it would have run on diesel for an hour, on Bi-Fuel would it run for an hour and a half?  THE WITNESS: It say the scenario	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	generator is? It's not to provide air conditioning.  It's  THE WITNESS: Well, it is to provide some air conditioning.  MR. MAGGIO: It's for some, right, but is it more for life support, life support for patients who are on respirators and  THE WITNESS: Yes, yes.  MR. MAGGIO: things like that?  In a situation where there's a backout, do the residents get to stay in the building or are they moved to another facility?  THE WITNESS: That would be more operational depending on the catastrophic situation, but generally they move residents to a portion of the building and then depending on what's going on CSH can answer that question.  MR. MAGGIO: Okay. Well, I'd like to find that out at some point, if we can get an answer
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	THE WITNESS: Yes, it runs it will last longer.  (Whereupon, Mr. Keil is now in attendance at 737 p.m.)  MS. PRICE: I think that was the only question that I had for follow-up with this witness.  So, I think he's open to the public at this point.  MR. ELLER: Thank you. MR. MAGGIO: Okay. Well, I'd like to find that out at some point, if we can get an answer to that, I'd appreciate that, maybe during when we open it up, that's it.  Thank you.  MR. SKRABLE: To some extend, would

	33		35
1	MR. REGAN: They should certainly make	1	lights, architecture, does that include lights?
2	the recommendation.	2	MR. REGAN: It could.
3	MR. MAGGIO: I don't know how that	3	CHAIRMAN WEIDMANN: Yeah, come forward.
4	works. I just wonder if there's a state DCA,	4	MS. FONOROW: Hi, my name is Cherie
5	Department of Health requirement about that. I don't	5	Fonorow, 256 Old Tappan Road.
6	know how that works. I'm getting nods, but I think	6	THE COURT REPORTER: Please spell your
7	that might be the case.	7	last name for the record.
8	THE WITNESS: The DCA has requirements.	8	MS. FONOROW: "F" as in Frank
9	MR. MAGGIO: Yeah.	9	-O-N-O-R-O-W.
10		10	
11	CHAIRMAN WEIDMANN: Go ahead.	11	THE COURT REPORTER: Thank you.
	MR. ALESSI: And forgive me if you gave	12	MS. FONOROW: Thank you.
12	the answer last month, I just can't remember. The		Currently, I've looked at the plans. I
13	elevator	13	just had a question, if you could please review the
14	THE WITNESS: Yes.	14	lights that are going to be set up, how many lights
15	MR. ALESSI: with the ambulance	15	you propose, the wattage that's going to be used and
16	stretcher, CPR, the whole size of the elevator.	16	the hours that they're going to be on, because
17	THE WITNESS: Yes, the stretcher will	17	currently it's completely unlit, dark and natural
18	be able to go flat and a minimum two people in there	18	trees.
19	and the four people may be a little bit it might	19	THE WITNESS: Yeah, there will be some
20	be a stretch, but definitely two people with a	20	lighting and generally at the egress points where the
21	stretcher laying flat.	21	stair towers would be for safety.
22	MR. ALESSI: Okay. Thank you.	22	Now, they don't they don't stay on
23	MR. ELLER: One of them not being the	23	all the time. They come on in emergent situations.
24	patient, right?	24	They will come on in the event that there's something
25	MR. ALESSI: No, one of them not being	25	going on that the residents have to egress the
	34	_	36

I can only speak to the building lighting.  MS. FONOROW: Okay. That's what I wasn't sure.  THE WITNESS: Yes.  MS. FONOROW: Okay. I did have a question, too, about this extra height of the façade.  One question is: How once you grade
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the patient.  CHAIRMAN WEIDMANN: The elevator is going to hold that?  MR. ALESSI: Yeah, as long as it fits in, minimum two, maximum four. Very, very thin four people.  CHAIRMAN WEIDMANN: Anyone else from the board wish to be heard?  (No response.)  CHAIRMAN WEIDMANN: Okay. Seeing none, can we have a motion to open the meeting to the public?  MR. ALESSI: Motion.  MR. ELLER: Second.  CHAIRMAN WEIDMANN: The question is only on architecture directed to this gentleman. No other questions regarding the this application.  So if anyone has any architectural questions, now is the time to speak.  Yes, ma'am.  MS. FONOROW: Does that include light and noise?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	building.  We also have a receiving area where lighting will be, but, again, we don't have anything going on at night, no receiving or anything, so the lights don't have to stay on at night.  Now, the front door will have some lighting, but generally they we can put them on a dimming system so that in the middle of the night they go down in the wattage, they're not dim the brightness of them, but only in this general entrance door area in the porte-cochère just for safety.  MS. FONOROW: So, the parking lot and the facility in the building, the whole road around the building, there's going to be no lights on?  THE WITNESS: That can be answered by the civil engineer. I can only speak to the building lighting.  MS. FONOROW: Okay. That's what I wasn't sure.  THE WITNESS: Yes.  MS. FONOROW: Okay. I did have a question, too, about this extra height of the façade.

	37		39
1	what is the height it's one of the highest points	1	MR. ELLER: She's onto another
2	in Old Tappan.	2	question.
3	So how high, how much are they grading	3	MS. FONOROW: And he said the very top
4	it? How high is this building really going to stick	4	is just going to be a façade that's just for looks,
5	out? Is it going to be higher than the church? Is	5	not use?
6	it going to be higher than Bi-State?	6	CHAIRMAN WEIDMANN: It's going to be
7	How it's a very large facility. How	7	34 feet 8 inches and then another 4 feet. So it's
8	high is this going to be and is that necessary?	8	going to be 38 feet 8 inches from starting grade.
9	THE WITNESS: Well, again, we're	9	MS. FONOROW: Okay.
10	meeting the height ordinances, so the of the	10	CHAIRMAN WEIDMANN: We don't know what
11	facility. So we are not we are not asking for a	11	that is.
12	waiver for the height of the building. We're meeting	12	MS. FONOROW: Right.
13	what's allowed for the height.	13	Okay, thank you. Thank you for
14	MS. FONOROW: Well, I'm asking	14	clarifying.
15	THE WITNESS: And the height of the	15	MR. ELLER: Mr. Chairman?
16	building is we're 34-foot-8 from the grade up to	16	CHAIRMAN WEIDMANN: Yeah.
17	this roof point with an additional 4 feet. So we're	17	MR. ELLER: I forget, just correct me
18	going to be 38-foot-8 total, which meets the	18	if I'm wrong, but I thought our ordinance was for 35.
19	ordinance.	19	That extra 4 feet doesn't trigger in the ordinance?
20	MS. FONOROW: I'm not great at knowing	20	THE WITNESS: It's with a sloped roof,
21		21	but because we are considered a flat roof, because
22	CHAIRMAN WEIDMANN: Okay. I think the	22	we're only we're going to have a flat building,
23	question is: What's the starting grade going to be?	23	you're allowed to have
24	MS. FONOROW: Is it going to be street	24	MR. ELLER: I understand.
25	level?	25	THE WITNESS: a parapet, we're
	38		40
1	CHAIRMAN WEIDMANN: Good question.	1	meeting that
2	In other words, what's the elevation of	2	MR. ELLER: Got it. I understand.
3	the property going to be after it's graded before you	3	THE WITNESS: part of the ordinance.
4	start building.	4	(Whereupon, Ms. Frohlich steps off the
5	MS. PRICE: I think, Mr. Chairman,	5	dais.)
6	that's better for Dan.	6	MR. SZABO: There's still a variance
7	CHAIRMAN WEIDMANN: Pardon me?	7	called for because of stories.
8	MS. PRICE: I think that's a better	8	MR. REGAN: Right.
9	question for our engineer on the elevation.	9	MR. SZABO: There's three stories
10	CHAIRMAN WEIDMANN: Okay.	10	versus two-and-a-half.
11	THE WITNESS: He'll be able to give you	11	MR. ALESSI: It may be more for maybe
12	the heights of the road to the finished floor.	12	David, can we get like a cross section of the
13	MS. FONOROW: Well, one reason I ask,	13	building from the sidewalk to the height of the
14	because in the meeting I'm trying to remember from	14 15	building?
15 16	the last meeting, because obviously some time past.  CHAIRMAN WEIDMANN: It's not a question	16	Is that you, that will be you? Okay. CHAIRMAN WEIDMANN: Anyone else from
17	for this gentleman.	17	the public wish to be heard for questions to the
18	MS. FONOROW: Is the building	18	architect?
19	CHAIRMAN WEIDMANN: Not a question for	19	(No response.)
20	this gentleman.	20	CHAIRMAN WEIDMANN: Seeing none, motion
21	MS. FONOROW: With the architecture?	21	hold on, okay, yes.
22	I'm just asking if	22	MR. STEINHAGEN: Sorry, I want waiting
23	CHAIRMAN WEIDMANN: You wanted to know	23	for the residents, Chairman. Wrong plan.
24	what the starting grade was going to be and the	24	For the record, Daniel Steinhagen.
25	height.	25	Again, the wrong plan. Sorry, too many plans.

(Whereupon, Letter, dated May 27, 2022 is received and marked as Exhibit A-14 for identification.)  MS. PRICE: And then we have

			1	
_		49	_	51
1		MR. REGAN: The last one I have are	1	not to be historic, but if you recall from our
2	5/2.		2	previous testimony, we planned on relocating the
3		MS. PRICE: Right, that's	3	existing historic house. That existing historic
4		MR. REGAN: That's got to be	4	house was fronting on Old Tappan Road and it violated
5	DIRECT EXAM	INATION	5	the setback requirement per the zoning of this zone.
6	BY MS. PRICE	:	6	So since the last hearing we've removed
7	Q.	Is it May 2 was the last revision?	7	that subdivision, we've removed the barn and as a
8	A.	Yes.	8	result we were able to take that home that we still
9		MS. PRICE: May 2, okay.	9	propose to relocate and save, but now we pushed it
10		MR. REGAN: That will be A-15.	10	back further off of Old Tappan Road to a compliant
11		MS. PRICE: A-15, the plan set, last	11	setback.
12	revised May 2		12	That house will now be set back
13		(Whereupon, Plan Set, Last Revised	13	55 feet, whereas the requirement is 50. So we
14	5/2/22 is	received and marked as Exhibit A-15	14	removed that request of a variance and then also by
15	for ident	fication.)	15	removing the subdivision, we've also removed the need
16		MR. REGAN: Anything else.	16	for a building coverage variance.
17		MS. PRICE: And then we have a colored	17	Previously we were requesting a
18	rendering of t	hat site plan, so that would be A-16.	18	21 percent building coverage for the lot, whereas 15
19	BY MS. PRICE		19	is permitted and now we are down to 12.7, so below
20	Q.	And did you change the date for today?	20	that 15 percent requirement.
21	A.	It will be today's date.	21	Additionally, with the removal of the
22	Q.	Okay.	22	subdivision, as well as the removal of the existing
23	₹.	MR. REGAN: 6/8.	23	barn that we will take down, we've lessened our
24		(Whereupon, Colored Rendering, Site	24	intensity of the improved lot coverage variance that
25	Plan Evh	ibit, dated 6/8/22 is received and	25	we were originally requesting. That was reduced from
	TIGHT EXIT	50	120	52

As we discussed at the we are no longer proposing to ubdivide this property and by moving the se for that piece of property and off the piece of the wetlands. So since the last hearing we have since at subdivision. We are now proposing a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25	49.8 percent coverage down to 34 percent, which a maximum of 30 percent is permitted in the zone.  So we are just over by 4 percent, so still in need of a variance, but certainly less intense than originally proposed.  Additionally, hearing the testimony (Audience chatter.)  THE COURT REPORTER: I'm sorry, I can't hear, there's talking. I'm sorry.  MALE AUDIENCE MEMBER: I'm sorry, I apologize.  THE WITNESS: Hearing the testimony from Fr. Jerry at the last hearing, we understand the concern of the church and the separation of our development from theirs, as well as the location of the generator.  So since that hearing, we've taken an opportunity to take our generator and we've now relocated to the western side of our drive aisle.  So originally it was within the buffer next to the church. We have since taken that and we put it on the other side of our drive aisle in the receiving area associated with the building.  So directly to the east of the building we've taken that generator and we moved it to the

other side, which will obviously add more buffer to
 the church and will also provide more separation for
 sound to make sure we're meeting the required sound
 levels at the property line.

Furthermore, to further help the buffer to the church, we've taken the entire development and we've shifted it over 4-and-a-half feet to the east and what that did was provide another 4-and-a-half feet to the church.

So originally the buffer that we were requesting for the church from our property line to the first piece of impervious surface was 8.8 feet.

Now we are proposing 20.1, so we've more than doubledthat buffer that was previously requested.

Still would need a variance just due to
the width of the lot, because it's 12.5 percent of
the lot width, which would be in need of a buffer of
about 61 feet, whereas, we're providing 20, but
again, they're two uses that are similar in nature.

again, they're two uses that are similar in nature.

The church has their condensing units only 3.5 feet away from our property line. So we're providing more of a buffer to the church than the church is providing to us, which is certainly an improvement since our last revision as well.

Finally, we've also added a remote fire

department connection to the northern portion of the

2 site. It is on the opposite side of the drive aisle

3 from the building and it is directly to the west of

**4** the proposed trash enclosure up in the northeastern

**5** corner. It provides an opportunity for the fire

**6** truck to hook up to the sprinkler system associated

7 with the building and there is a proposed fire

8 hydrant that is right next to it as well and that

**9** came from a request of the fire department in the

10 borough.

5

6

7

8

9

25

1

I know there was also some concernsregarding the fire truck access to the site.

**13** However, we did provide a truck turning template

14 within our plan set that shows the truck's ability to

**15** enter the site from our driveway and be able to

**16** circulate all the way around the site in a clockwise

17 motion and then still have that emergency grass

**18** access back out to Old Tappan Road to be able to

19 provide full circulation around the site and not have

20 to turn around within the site.

21 So, Ms. Price, unless I missed

22 anything, I think those were the main revisions since

23 our last hearing.

24 BY MS. PRICE:

**Q.** And do you have any update from the

1 county at this point?

2

4

5

6

8

11

16

18

19

20

54

A. We have received comments from them since our last submission and they were generally in favor of the revisions that we made, the widening and the proposed drainage improvements to the crown of the roadway. They had a couple of minor technical comments, which we are actively addressing and we will submit and seek their approval as well.

9 Q. And I forwarded you a set of the10 Lakeview plans that we received.

Is that correct?

12 A. That is correct.

**Q.** And on our site we are showing a

**14** 50-foot buffer for the transition area for the

15 wetlands.

Is that correct?

17 A. That is correct.

The DEP, the LOI that they issued for the site, they determined this wetland again has an intermediate resource value wetland, which has a 50-foot transition area, which we show on our plans.

50-foot transition area, which we show on our plans.Again, we're staying completely outside

23 of the transition area. We're proposing no

24 disturbance whatsoever within that transition area

56

25 and we're also providing an additional 5 feet of

1 additional buffer to that transition area.

Q. And following your review of the3 Lakeview plans, can you confirm what the transition

4 area buffer was on the Lakeview site?

A. Yup, absolutely, it was also 50 feet.
The DEP's LOI they issued for the Lakeview property
classified the wetlands the same as they're

8 classifying ours, a 50-foot buffer.

**Q.** And that property is closer to Lake

**10** Tappan.

11

Is that correct?

12 A. Absolutely, yes.

**Q.** So the Lakeview site and our site have

**14** identical wetlands transition area classifications

**15** from the Department of Environmental Protection,

16 correct?

17 A. That's correct.

**18 Q.** Okay.

19 CHAIRMAN WEIDMANN: I just want to

20 interrupt one minute.

21 Some people in the audience here,

22 you're parking in the firemen's parking lot. So

23 please if you're parked in the firemen's parking lot,

24 please remove it or you're going to get a ticket.

**25** Okay?

25

25

there were board member questions, correct,

residential dwelling to the west of us.

	61		63
1	MS. PRICE: And we raised that with the	1	the barn, we were able to get it in a compliant

25	used for a residential	25	CHAIRMAN WEIDMANN: Charlie?
١,	MC PRICE: No. 77		MP MACCIO: Con use first as a supersoine
1	MS. PRICE: No, no.	1	MR. MAGGIO: Can you just re-summarize
2	MS. PRICE: No, no. We're just going to use it for storage.	2	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were
3	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we	2	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.
2 3 4	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back	2 3 4	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.
2 3 4 5	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our	2 3 4 5	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard
2 3 4 5 6	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.	2 3 4 5 6	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's
2 3 4 5 6 7	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.	2 3 4 5 6 7	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.
2 3 4 5 6 7 8	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still	2 3 4 5 6 7 8	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.
2 3 4 5 6 7 8	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that	2 3 4 5 6 7 8 9	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing
2 3 4 5 6 7 8 9	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?	2 3 4 5 6 7 8 9	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal
2 3 4 5 6 7 8 9 10	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now	2 3 4 5 6 7 8 9 10	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.
2 3 4 5 6 7 8 9 10 11	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback	2 3 4 5 6 7 8 9 10 11	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the
2 3 4 5 6 7 8 9 10 11 12 13	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in	2 3 4 5 6 7 8 9 10 11 12 13	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the
2 3 4 5 6 7 8 9 10 11 12 13 14	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.	2 3 4 5 6 7 8 9 10 11 12 13 14	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't	2 3 4 5 6 7 8 9 10 11 12 13 14 15	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory structures.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances, is that right, based on your Drawing 5.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory structures.  MS. PRICE: Yeah, we can review it	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances, is that right, based on your Drawing 5.  THE WITNESS: I believe so. We would
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory structures.  MS. PRICE: Yeah, we can review it again, but	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances, is that right, based on your Drawing 5.  THE WITNESS: I believe so. We would have lot coverage, height, two buffer variances,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory structures.  MS. PRICE: Yeah, we can review it again, but  MR. SKRABLE: Just so that the variance	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances, is that right, based on your Drawing 5.  THE WITNESS: I believe so. We would have lot coverage, height, two buffer variances, floor area ratio, which is five.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MS. PRICE: No, no. We're just going to use it for storage. So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory structures.  MS. PRICE: Yeah, we can review it again, but  MR. SKRABLE: Just so that the variance is requested if it's necessary.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances, is that right, based on your Drawing 5.  THE WITNESS: I believe so. We would have lot coverage, height, two buffer variances, floor area ratio, which is five.  MR. REGAN: And the use variance.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MS. PRICE: No, no.  We're just going to use it for storage.  So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory structures.  MS. PRICE: Yeah, we can review it again, but  MR. SKRABLE: Just so that the variance is requested if it's necessary.  MS. PRICE: Right.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances, is that right, based on your Drawing 5.  THE WITNESS: I believe so. We would have lot coverage, height, two buffer variances, floor area ratio, which is five.  MR. REGAN: And the use variance.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MS. PRICE: No, no. We're just going to use it for storage. So at this point, it's an undetermined, because we don't know what the borough is going to come back with. So as of now, it would be accessory to our principal use.  MR. REGAN: Okay.  MR. SKRABLE: Again, I know it's still a really minor point, but in the front yard, is that a variance for a shed or what everyone's calling it?  MS. PRICE: We have it set back. Now the setback  MR. SKRABLE: It isn't allowed to be in front of the principal building.  MS. PRICE: I don't think I didn't see anything in the code for that.  MR. REGAN: Have to look at accessory structures.  MS. PRICE: Yeah, we can review it again, but  MR. SKRABLE: Just so that the variance is requested if it's necessary.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MR. MAGGIO: Can you just re-summarize the variances that are going away now? You were going real fast, I couldn't keep up.  THE WITNESS: Yeah, I apologize.  So we no longer need the front yard setback variance to our understanding unless there's something that's needed for accessory.  MR. MAGGIO: Right.  THE WITNESS: And we are also removing the building coverage variance because of the removal of the subdivision.  We are lessening the intensity of the lot coverage variance and we are lessening the intensity of the side yard buffer variance.  MR. MAGGIO: So you're removing two and you're improving two.  So it will be down to four variances, is that right, based on your Drawing 5.  THE WITNESS: I believe so. We would have lot coverage, height, two buffer variances, floor area ratio, which is five.  MR. REGAN: And the use variance.

	65		67
1	measurement.	1	I know you made the comment of wanting us to
2	MR. ELLER: So it's not the actual	2	straighten out that driveway.
3	height of the building, it's	3	MR. ALESSI: Correct.
4	MS. PRICE: Right, correct.	4	THE WITNESS: So if we were to
5	CHAIRMAN WEIDMANN: Anything else,	5	straighten out that driveway, our driveway entrance
6	Charles?	6	on Old Tappan Road would have to be shifted down to
7	MR. MAGGIO: I'm good, thank you.	7	the west and then it would be no longer aligned
8	MR. ALESSI: Sir, I got a couple of	8	directly across the street with Holbrook Court.
9	questions. I'm just a little confused on the	9	So I'm sure I'll hear more from our
10	drainage water pond.	10	traffic engineer, but always a very safe engineering
11	So there's been no drainage except	11	practice when you have cross streets that are
12	natural drainage from your property anywhere, through	12	relatively close together like we have in Old Tappan.
13	Lakeview, through the church and to the vernal pond,	13	You have Leonard Drive and Holbrook Court only about
14	nothing.	14	I'm sorry, let's get I want to get an accurate
15	THE WITNESS: Under existing	15	dimension for you. You have Leonard Drive and
16	conditions?	16	Holbrook Court only about 200 feet apart.
17	MR. ALESSI: Yes.	17	So if we were to straighten out that
18	THE WITNESS: Under existing	18	driveway, we would no longer align with Holbrook
19	conditions, about two-thirds of the property flows	19	Court and we would probably be about 50 to 60 feet to
20	into the Lakeview system and about one-third of the	20	the west and those driveways would be misaligned.
21	property flows to either Old Tappan, which then makes	21	When you have a four-way intersection,
22	it way into the wetland area or directly into the	22	you always want to have or to the best of your
23	wetland area.	23	ability it's always the safest drive or design to
24	MR. ALESSI: All right. So	24	have a vehicle per se is exiting Holbrook Court and a
25	theoretically that two-thirds could have added to the	25	vehicle is exiting our site driveway, you want those
	66		68
1	silt problem that Lakeview just spent \$280 sorry,	1	drivers to be able to see each other, identify each
2	\$280,000.00 cleaning up?	2	other and be able to make that line of sight so you
3	THE WITNESS: Absolutely, yes.	3	can kind of determine, all right, you were here
4	MR. ALESSI: So what you're proposing	4	first, you're going to turn or I was here first, I'm
5	now is a system that is going to either lessen or	5	going to turn. They see each others, it's a much
6	remove silt going into that pond from not only your	6	more safe design.
7	property but the church property?	7	If you push that driveway over to the
8	THE WITNESS: Just our property.	8	west, they have the ability of not seeing each other
9	MR. ALESSI: Just your property?	9	as well and you can come into a situation where
10	THE WITNESS: Correct.	10	someone on Holbrook Court could be making a left out
11	MR. ALESSI: Okay. So then the silt	11	onto Old Tappan Road and then someone coming from the
12	will be less of a buildup in Lakeview from your	12	Capital Senior site making a left turn out onto Old
13	property and just their property?	13	Tappan Road and you come across a crossing conflict
14	THE WITNESS: Correct.	14	potentially where the cars could cross paths if they
15	MR. ALESSI: All right. And by law you	15	both start their turn at the same time, seeing the
16	have to do that, make it less silty, if that's a	16	same gap in traffic and result in a potential safety
17	word?	17	concern. So that's why we always try to align the
18	THE WITNESS: Yes, absolutely.	18	driveways and that's, in this case, why we did design
19	MR. ALESSI: All right. And thank you	19	that little gooseneck so we have a safer engineering
20	for the fire department connection.	20	design with our driveways.
21	Now, my contention is I know you	21	Now, if you notice in the center of
22	widened the road, Old Tappan Road and, you know, I	22	that driveway we have a little yellow striped area
23	always talk about fire trucks, getting into the	23	and what the purpose of that was for was to make the
24	entrance.	24	driveway a little bit widened wider, but still
25	THE WITNESS: Yeah, so I assume you 76 sheets Page 65 to	25	have a segmented and channelized entrance and exit to  06/15/2022 05:41:55 PM

	69		71
4		4	
1	keep the two lanes separate and that yellow gored	1	(Whereupon, Vehicle Turning Plan, Sheet
2	area, essentially, gives the fire truck, the garbage	2	19 of 20, dated May 2, 2022 is received and
3	truck, a delivery vehicle that has a little bit	3	marked as Exhibit A-19 for identification.)
4	larger of a turning radius, the ability to kind of	4	MS. PRICE: And the title?
5	cross over into that yellow area to execute their	5	THE WITNESS: It is titled, "Vehicle
6	turn while not crossing over into the traffic that's	6	Turning Plan." It is Sheet 19 of 20. It's within
7	coming head-on back out to Old Tappan Road.	7	our plan set.
8	So it eliminates that conflict, which	8	However, we added some color onto this
9	is why we made that little bit of a wider road.	9	exhibit, so it's a little bit different than the plan
10	So it's my opinion that the way we have	10	set that didn't have color in the past, and Danielle,
11	our designed driveway, that the fire truck would have	11	who's one of our engineers, she can zoom in on that
12	adequate access into the site, along with that gored	12	driveway a little bit more and you can see the yellow
13	area and then to have full circulation around the	13	highlighted path still being able to make the turn
14	site as well.	14	without crossing into the opposite traffic.
15	MR. MAGGIO: I have a follow-up	15	So this one's a little bit of a rough
16	question. We just said that we were moving the	16	a rough movement, but it can it can execute
17	building over 4-and-a-half feet from the church.	17	that properly.
18	Have we just made that situation a little bit more	18	And that is obviously the tire movement
19	complicated or the turn more difficult for a fire	19	coming in for the fire truck coming from the west
20	truck?	20	where the fire department is and making that tighter
21	THE WITNESS: The geometry of the	21	radius than if they were making a left turn into the
22	driveway stayed the same. You'll see essentially	22	site heading east.
23	there's an area that's parallel with Old Tappan Road	23	MR. SKRABLE: Dan, do you mind just
24	on our driveway, so that just got 4 feet longer.	24	describing that vehicle a little bit, the length of
25	So the radiuses and everything stayed	25	it and the radii you used just so the
	70		72

1	the same of our driveway.	1	THE WITNESS: Absolutely.
1 2		1 2	
	the same of our driveway.		THE WITNESS: Absolutely.
2	the same of our driveway.  So the straight part that's running	2	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is
2 3	the same of our driveway.  So the straight part that's running parallel to Old Tappan Road got a little bit longer,	2	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.
2 3 4	the same of our driveway.  So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which	2 3 4	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.
2 3 4 5	the same of our driveway.  So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as	2 3 4 5	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is  47 feet. The overall width is 5-and-a-half feet and
2 3 4 5 6	the same of our driveway.  So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.	2 3 4 5 6	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their
2 3 4 5 6 7	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on	2 3 4 5 6 7	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest
2 3 4 5 6 7 8	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck	2 3 4 5 6 7 8 9	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire
2 3 4 5 6 7 8 9	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.	2 3 4 5 6 7 8 9	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the
2 3 4 5 6 7 8 9	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.	2 3 4 5 6 7 8 9	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire
2 3 4 5 6 7 8 9 10	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet. THE WITNESS: Yeah.	2 3 4 5 6 7 8 9 10	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.
2 3 4 5 6 7 8 9 10 11 12	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet. THE WITNESS: Yeah. MR. SKRABLE: What it's hard to see	2 3 4 5 6 7 8 9 10 11	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the
2 3 4 5 6 7 8 9 10 11 12 13	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet. THE WITNESS: Yeah. MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and	2 3 4 5 6 7 8 9 10 11 12 13	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees. So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other. So it's basically safety. So if the driveway was over here, you're eliminating cars
2 3 4 5 6 7 8 9 10 11 12 13 14	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?	2 3 4 5 6 7 8 9 10 11 12 13 14	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck. The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees. So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck. MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other. So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would
2 3 4 5 6 7 8 9 10 11 12 13 14 15	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the plan.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees. So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other. So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard, cars making right turns into each other.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the plan.  THE WITNESS: Absolutely. So my next	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	THE WITNESS: Absolutely.  This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard, cars making right turns into each other.  THE WITNESS: Absolutely.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the plan.  THE WITNESS: Absolutely. So my next exhibit, I believe this would be A-18.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard, cars making right turns into each other.  THE WITNESS: Absolutely.  MR. ALESSI: So having the driveway
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the plan.  THE WITNESS: Absolutely. So my next exhibit, I believe this would be A-18.  MS. PRICE: A-19.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees.  So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard, cars making right turns into each other.  THE WITNESS: Absolutely.  MR. ALESSI: So having the driveway directly across from Holbrook is a safer route
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the plan.  THE WITNESS: Absolutely. So my next exhibit, I believe this would be A-18.  MS. PRICE: A-19.  MR. REGAN: What are we calling that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees. So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard, cars making right turns into each other.  THE WITNESS: Absolutely.  MR. ALESSI: So having the driveway directly across from Holbrook is a safer route location.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the plan.  THE WITNESS: Absolutely. So my next exhibit, I believe this would be A-18.  MS. PRICE: A-19.  MR. REGAN: What are we calling that?  THE WITNESS: So A-19, this is actually	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees. So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard, cars making right turns into each other.  THE WITNESS: Absolutely.  MR. ALESSI: So having the driveway directly across from Holbrook is a safer route location.  THE WITNESS: Yes, absolutely.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	So the straight part that's running parallel to Old Tappan Road got a little bit longer, but we did prepare a fire truck moving exhibit, which is in our plan set that shows that turning ability as well.  MR. SKRABLE: Dan, just to follow up on that, is that an SU-30, you're considering that a fire truck?  THE WITNESS: No, we have a fire truck page 19.  MR. SKRABLE: A whole another sheet.  THE WITNESS: Yeah.  MR. SKRABLE: What it's hard to see those numbers. That's a 25-foot inside radius and what's the outside?  MS. PRICE: Why don't we look at the plan.  THE WITNESS: Absolutely. So my next exhibit, I believe this would be A-18.  MS. PRICE: A-19.  MR. REGAN: What are we calling that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	THE WITNESS: Absolutely. This is a generic, it's actually a ladder truck.  The overall length of the truck is 47 feet. The overall width is 5-and-a-half feet and the turning radius is essentially 40 degrees. So, this is essentially the largest fire truck that we had anticipated. It will be their aerial ladder truck.  MR. ALESSI: Before you go off the fire trucks, you had said the driveway is across the street from Holbrook, so drivers could see each other.  So it's basically safety. So if the driveway was over here, you're eliminating cars making left turns into each other, which I would assume is going to be the same thing for Leonard, cars making right turns into each other.  THE WITNESS: Absolutely.  MR. ALESSI: So having the driveway directly across from Holbrook is a safer route location.

1	CHAIRMAN WEIDMANN: Anyone?	1	MR. SZABO: Right. The height
2	No questions? Yes.	2	MR. MAGGIO: The height and the
3	MR. SCOZZAFAVA: Yeah, I want to make	3	setback.
4	sure I understand.	4	MR. SZABO: and the setback, it
5	The building that we're talking about	5	protrudes in front of the building, the main proposed
6	as the "accessory" for this conversation, that's the	6	building.
7	historic house, right?	7	MR. SKRABLE: And the FAR will get
8	THE WITNESS: That's correct.	8	worse.
9	MR. SCOZZAFAVA: What is the height of	9	MR. MAGGIO: And it will add more FAR.
10	that, the roof line height?	10	MR. SZABO: It will add, but I'm pretty
11	THE WITNESS: Of its	11	sure it's a large site.
12	MR. SCOZZAFAVA: And the question	12	MS. LOULOUDIS: I have
13	really is, isn't there a limit on an accessory	13	MR. BEDIAN: I have a question. I'm
14	building as far as height?	14	sorry, go ahead.
15	MR. SZABO: I can cover that,	15	MS. LOULOUDIS: I'm sorry, you guys
16	Mr. Chairman, if you'd like	16	skipped over me.
17	CHAIRMAN WEIDMANN: Go ahead.	17	The historic house, I know that we
18	MR. SZABO: as to the accessory	18	touched on it in the beginning and I know the
19	structures. It's covered under Section 255-54,	19	historic preservation or historic expert hasn't
20	permitted accessory buildings and I won't read all of	20	spoken yet, but is it historic is it registered in
21	it, but there is a height limit, there's also a	21	the county registry or is it in the state historic
22	setback limit, because it exceeds 100 square feet, it	22	preservation office registry?
23	gets counted as FAR, 150 square feet gets counted as	23	MS. PRICE: It's registered state.
24	FAR.	24	MS. LOULOUDIS: It's registered state.
25	The height limit, I believe it's	25	And technically is there anything that precludes it

	14 feet and the accessory structure cannot extend		from actually being demolished? It's unclear to me
2	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a	2	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.
2 3	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.	2	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.
2 3 4	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how	2 3 4	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.
2 3 4 5	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the	2 3 4 5	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.
2 3 4 5 6	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case	2 3 4 5 6	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.
2 3 4 5 6 7	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use	2 3 4 5 6 7	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.
2 3 4 5 6 7 8	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the	2 3 4 5 6 7 8	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic
2 3 4 5 6 7 8 9 10	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.	2 3 4 5 6 7 8 9 10	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's
2 3 4 5 6 7 8 9 10 11	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is	2 3 4 5 6 7 8 9	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds
2 3 4 5 6 7 8 9 10 11 12 13	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?	2 3 4 5 6 7 8 9 10	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and
2 3 4 5 6 7 8 9 10 11 12 13	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah,	2 3 4 5 6 7 8 9 10 11 12 13 14	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in
2 3 4 5 6 7 8 9 10 11 12 13 14 15	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house	2 3 4 5 6 7 8 9 10 11 12 13 14 15	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance. MR. SZABO: It would be a deviation	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I thought too.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance. MR. SZABO: It would be a deviation from the accessory structure requirements.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I thought too.  So let's just suppose this application
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance.  MR. SZABO: It would be a deviation from the accessory structure requirements.  MR. SCOZZAFAVA: So that potentially is	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I thought too.  So let's just suppose this application wasn't before the board, the homeowner, the current
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance. MR. SZABO: It would be a deviation from the accessory structure requirements.  MR. SCOZZAFAVA: So that potentially is one additional variance to retain the historic house	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I thought too.  So let's just suppose this application wasn't before the board, the homeowner, the current homeowner could have knocked down the house.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance. MR. SZABO: It would be a deviation from the accessory structure requirements.  MR. SCOZZAFAVA: So that potentially is one additional variance to retain the historic house to be used as an accessory.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I thought too.  So let's just suppose this application wasn't before the board, the homeowner, the current homeowner could have knocked down the house.  MR. SZABO: Yes.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance. MR. SZABO: It would be a deviation from the accessory structure requirements.  MR. SCOZZAFAVA: So that potentially is one additional variance to retain the historic house to be used as an accessory.  MR. SZABO: Two.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I thought too.  So let's just suppose this application wasn't before the board, the homeowner, the current homeowner could have knocked down the house.  MR. SZABO: Yes.  MS. LOULOUDIS: And put up a one-family
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	14 feet and the accessory structure cannot extend beyond the front building line of the structure that's on the site.  MR. REGAN: It's going to trigger a MR. SZABO: So, now, again, I'm sure, we'll wait for your planner, they'll talk about how it's going to be, kind of, subsumed under the characteristics of the use variance because of case law, but also because we're talking about a use that's not permitted in the zone, but we'll allow the planner to talk to that.  MR. SCOZZAFAVA: So the house today is higher than 14 feet, right?  MR. SZABO: Well, I drove by yeah, yeah, if you drive by, you can see they have a house that's still higher than 14, I believe.  MR. REGAN: It will be a C variance. MR. SZABO: It would be a deviation from the accessory structure requirements.  MR. SCOZZAFAVA: So that potentially is one additional variance to retain the historic house to be used as an accessory.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	from actually being demolished? It's unclear to me because  MS. PRICE: To the best of our knowledge, there's nothing.  MS. LOULOUDIS: There's nothing.  MS. PRICE: Nothing.  MS. LOULOUDIS: The house could be taken down.  MS. PRICE: Right.  MR. SZABO: I'm sure your historic preservation expert will speak to this, but if it's privately owned and there are no federal funds involved or state or local, Bergen County funds and there's no local regulations, which is the case in Old Tappan, then there's nothing prohibiting the demolition of that structure.  MS. LOULOUDIS: And that's what I thought too.  So let's just suppose this application wasn't before the board, the homeowner, the current homeowner could have knocked down the house.  MR. SZABO: Yes.

2	confirm.	2	original plan, right, contemplating putting the two
3	Thank you.	3	buildings together, there was a driveway there?
4	CHAIRMAN WEIDMANN: Go ahead, you have	4	THE WITNESS: Yeah, when we had it
5	something?	5	proposed up closer to the road when we planned on
6	MS. LOULOUDIS: I'm sorry.	6	subdividing and potentially subdividing it to the
7	MR. BEDIAN: No problem, I'll wait my	7	town and using it as maybe an educational center, but
8	turn.	8	since then we have removed that in this plan to
9	Can you go back to the colored site	9	relocate the house.
10	plan? Yeah. I wasn't clear where you're putting the	10	MR. ALESSI: I actually have two
11	generator. You moved it to where? Can you show it	11	follow-up question and I was actually grateful for
12	here?	12	all your work on the fire side of it, but with the
13	THE WITNESS: So you see that light	13	generator, what's the decibels of the generator while
14	grey box directly to the I guess it would be the	14	it's running and is it under the code for the
15	north, the northeast of our loading area, that grey	15	borough.
16	box.	16	THE WITNESS: So I believe honestly,
17	MR. BEDIAN: Okay.	17	I haven't reviewed the cut sheet for the Bi-Fuel
18	Well, I have a follow-up question about	18	generator. We would have to get back to you on that,
19	that, you know, historic house.	19	but the normal, the diesel generator was about,
20	Is there any plan to beautify it? I	20	running at like 75 decibels and at the property line
21	know you, I don't know if you are the right person	21	it would need to be 65, but now as we provided
22	to ask if it's going to be used as "accessory". Are	22	additional separation from that.
23	you still planning to beautify it or are you just	23	And, again, we'll be providing the
24	going to keep it the way it is.	24	noise or sound-attenuating enclosure, more
25	THE WITNESS: Yeah, currently no plans.	25	separation, we have to comply with that noise

2	would just pick it up, put it on a new foundation and leave it as is.	2	so by relocating it closer to our development versus the property line.
2 3 4	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.	2 3 4	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate
2 3 4 5	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use	2 3 4 5	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act
2 3 4 5 6	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think	2 3 4 5 6	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition,
2 3 4 5 6 7	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of	2 3 4 5 6 7	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.
2 3 4 5 6 7 8	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?	2 3 4 5 6 7 8	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.
2 3 4 5 6 7 8 9	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.	2 3 4 5 6 7 8 9	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for
2 3 4 5 6 7 8 9	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not	2 3 4 5 6 7 8 9	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for  Mrs. Fonorow. Do you have a cross section from the
2 3 4 5 6 7 8 9 10	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.	2 3 4 5 6 7 8 9 10	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?
2 3 4 5 6 7 8 9 10 11	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk	2 3 4 5 6 7 8 9 10 11	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the
2 3 4 5 6 7 8 9 10 11 12 13	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did	2 3 4 5 6 7 8 9 10 11 12 13	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my
2 3 4 5 6 7 8 9 10 11 12 13 14	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of	2 3 4 5 6 7 8 9 10 11 12 13 14	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially
2 3 4 5 6 7 8 9 10 11 12 13 14 15	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being	2 3 4 5 6 7 8 9 10 11 12 13 14 15	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being practical, absolutely.  MS. LOULOUDIS: That's why I'm just thinking of the impervious coverage.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes to the rear of our building.  Our setbacks have changed. I believe the building is actually now further from their
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being practical, absolutely.  MS. LOULOUDIS: That's why I'm just thinking of the impervious coverage.  THE WITNESS: Yeah, we we are still	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes to the rear of our building.  Our setbacks have changed. I believe the building is actually now further from their property line, but it did give a representation of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being practical, absolutely.  MS. LOULOUDIS: That's why I'm just thinking of the impervious coverage.  THE WITNESS: Yeah, we we are still over on the improved lot coverage by 4 percent, so a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes to the rear of our building.  Our setbacks have changed. I believe the building is actually now further from their property line, but it did give a representation of height. I'm not sure if you want to pull it up, but
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it?  Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being practical, absolutely.  MS. LOULOUDIS: That's why I'm just thinking of the impervious coverage.  THE WITNESS: Yeah, we we are still over on the improved lot coverage by 4 percent, so a 5-foot sidewalk would add very, you know, minimal to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes to the rear of our building.  Our setbacks have changed. I believe the building is actually now further from their property line, but it did give a representation of height. I'm not sure if you want to pull it up, but I'm hesitant to show it, because it's not accurate,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it? Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being practical, absolutely.  MS. LOULOUDIS: That's why I'm just thinking of the impervious coverage.  THE WITNESS: Yeah, we we are still over on the improved lot coverage by 4 percent, so a 5-foot sidewalk would add very, you know, minimal to that number, but it would be added or we could add	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes to the rear of our building.  Our setbacks have changed. I believe the building is actually now further from their property line, but it did give a representation of height. I'm not sure if you want to pull it up, but I'm hesitant to show it, because it's not accurate, but if you want something for the next hearing, we'll
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it? Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being practical, absolutely.  MS. LOULOUDIS: That's why I'm just thinking of the impervious coverage.  THE WITNESS: Yeah, we we are still over on the improved lot coverage by 4 percent, so a 5-foot sidewalk would add very, you know, minimal to that number, but it would be added or we could add some type of, you know, even just a gravel walkway	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	so by relocating it closer to our development versus the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for  Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes to the rear of our building.  Our setbacks have changed. I believe the building is actually now further from their property line, but it did give a representation of height. I'm not sure if you want to pull it up, but I'm hesitant to show it, because it's not accurate, but if you want something for the next hearing, we'll be more than happy to provide that.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	would just pick it up, put it on a new foundation and leave it as is.  MR. BEDIAN: As is, okay.  MS. LOULOUDIS: Now, if you were to use that as an accessory structure for storage, I think was indicated earlier, would you need some sort of access to some sidewalk or pavement leading to it? Right now there's no way to walk over towards it.  THE WITNESS: Yeah, again, just not sure of the ultimate use of it.  So right now we don't show a sidewalk or path, but if they you know, operations did absolutely want to use it for, you know, some type of storage, I could see a path or a sidewalk being practical, absolutely.  MS. LOULOUDIS: That's why I'm just thinking of the impervious coverage.  THE WITNESS: Yeah, we we are still over on the improved lot coverage by 4 percent, so a 5-foot sidewalk would add very, you know, minimal to that number, but it would be added or we could add	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the property line.  MS. PRICE: Yeah, and I'll stipulate that compliance with the New Jersey Noise Control Act and local ordinances is an acceptable condition, nighttime and daytime decibel levels.  MR. ALESSI: Okay. Thank you.  And then one last one, it's for Mrs. Fonorow. Do you have a cross section from the curb line to the top of the building?  THE WITNESS: From the curb line to the top of the building we do not. However, I have my exhibit from our first hearing, which essentially provided a cross section from the Lakeview townhomes to the rear of our building.  Our setbacks have changed. I believe the building is actually now further from their property line, but it did give a representation of height. I'm not sure if you want to pull it up, but I'm hesitant to show it, because it's not accurate, but if you want something for the next hearing, we'll

1	CHAIRMAN WEIDMANN: Anyone else from	1	know, about reducing the silt in that area.
2	the board?	2	Runoff runoff in a wooded area with As and Bs
3	(No response.)	3	soils, basically has virtually no runoff.
4	CHAIRMAN WEIDMANN: Any more questions?	4	So right now in it's wooded state there
5	(No response.)	5	really isn't any runoff from the wooded area.
6	CHAIRMAN WEIDMANN: Seeing none, can I	6	MS. PRICE: Is there going to be a
7	have a motion to open the meeting to the public?	7	question? I mean, I have it's out of town.
8	MR. SCOZZAFAVA: Motion.	8	MS. HOERNLEIN: My question is this
9	CHAIRMAN WEIDMANN: I have a motion.	9	MS. PRICE: It's out of town to begin
10	Can we have a second?	10	with.
11	MR. BEDIAN: Second.	11	MR. REGAN: Yeah.
12	CHAIRMAN WEIDMANN: All in favor?	12	MS. HOERNLEIN: My question is this:
13	(Whereupon, all present members respond	13	Open Public Meetings.
14	in the affirmative.)	14	MS. PRICE: No, I understand that. I
15	CHAIRMAN WEIDMANN: Okay. The meeting	15	understand, but
16	is open to the public for any questions to the	16	MS. HOERNLEIN: My question I have a
17	engineer and the engineer only.	17	lot of questions, and my questions are, I'm just
18	Yes, ma'am.	18	bringing up the fact that right now, I mean, the
19	MS. PRICE: And Mr. Chairman, with	19	volume, just the volume increase is quite a lot,
20	regard to his testimony, correct?	20	because you are
21	CHAIRMAN WEIDMANN: Correct.	21	MS. PRICE: Again
22	MS. PRICE: Okay.	22	MR. REGAN: Question.
23	MS. HOERNLEIN: Hi, my name is Carol	23	CHAIRMAN WEIDMANN: Question.
24	Hoernlein.	24	MR. REGAN: Otherwise I'm going to have
25	CHAIRMAN WEIDMANN: Name and address.	25	to swear you in.
	82		84
1	MS. HOERNLEIN: My name is Carol	1	MS. HOERNLEIN: I'm getting to my
2	Hoernlein. I live at 216 Ackerman Avenue in Emerson.	2	question. I'm getting to my question.
3	And I'm here as a private citizen. I have not been	3	The capacity of the pipe that's leaving
4	retained yet.	4	that system, is 25-year capacity.
5	MS. HAVERILLA: Excuse me, can you just	5	THE WITNESS: We designed it for
6	spell your last name?	6	100 year.
7	MS. HOERNLEIN: Oh, sorry.	7	MS. HOERNLEIN: You designed it for
8	H-O-E-R-N-L-E-I-N.	8	100, okay, great.
9	MS. HAVERILLA: Thank you.	9	Now, the issue is in the As and Bs
10	MS. HOERNLEIN: I'm a licensed PE in	10	soils there the water is going to leave because you
11	the State of New Jersey, a water resources expert.	11	have a sand filter, it's going to be infiltrating
12	CHAIRMAN WEIDMANN: You have to speak	12	into the ground. So
13	up.	13	MR. REGAN: We're getting into
14	MS. HOERNLEIN: I'm a water resources	14	testimony.
15	expert. I have a license in New Jersey, a	15	We need a question.
16	professional engineer license. I'm certified as a	16	MS. HOERNLEIN: My question is this: I
17	municipal engineer. I'm also certified as a flood	17	have questions, it's just I have to
18	hazard expert.	18	MR. REGAN: Well, you need to ask them.
19	MR. REGAN: Are you representing	19	MS. HOERNLEIN: Okay. Do you know what
20	someone?	20	the well, the elevation of the bottom of the pond
21	MS. HOERNLEIN: I'm here as a private	21	is what?
22	citizen, because I feel like this application should	22	THE WITNESS: I can pull my grading
23	be denied, but aside from that, my questions	23	plan, but if you're asking groundwater separation
0.4		24	MS. HOERNLEIN: It's 85.
24	regarding the engineering on this are, I know that	24	MS. HOLKINLLIN. 1(5 0).

	85		87
1	Thank you.	1	point of the building that's going to be there, the
2	MS. HOERNLEIN: Did you consider what	2	proposed building.
3	the ground level of the elevation of the neighbor	3	MS. PRICE: I don't think you asked the
4	behind this property was when you designed the pond?	4	witness that question.
5	THE WITNESS: Yeah, absolutely.	5	MS. HOERNLEIN: Did you consider
6	MS. HOERNLEIN: Is it higher than 85?	6	unconnecting the impervious areas?
7	THE WITNESS: Again, I would have to	7	FEMALE AUDIENCE MEMBER: Can you just
8	look at my grading plan.	8	speak up.
9	MS. HOERNLEIN: It's lower.	9	THE WITNESS: Yeah, absolutely.
10	MS. PRICE: Okay.	10	We always consider that, but when you
11	MR. REGAN: You're testifying.	11	have a smaller site like this and parking that's
12	MS. HOERNLEIN: My other question is:	12	around the site disconnecting the impervious result
13	What is the height of the wall that you have on this	13	in other issues, tripping hazards, more disturbance,
14	side of on the building side of the pond there?	14	because we'd have to expand the parking area, so
15	THE WITNESS: On the building side of	15	we're taking out more trees to provide the same
16	the pond, at the highest point, I believe, it's	16	amount of parking.
17	10 feet near the trash enclosure.	17	So we absolutely always consider that,
18	MS. HOERNLEIN: Were you aware recently	18	but we designed the site to minimize the impact and
19	there was a drowning	19	minimize the disturbance while meeting all the
20	MR. REGAN: Mr. Chairman, she's getting	20	regulatory requirements for stormwater.
21	involved in testimony. We're going to have to	21	MS. HOERNLEIN: Did you consider using
22	curtail this.	22	pervious pavement?
23	MS. HOERNLEIN: I'm just I'm just	23	THE WITNESS: In this case, no, we
24	I'm asking questions.	24	didn't, but we do provide pervious emergency access
25	MR. REGAN: You're testifying and you	25	for the fire truck to, again, keep down on the number

2 3 4 5 6 7 8 9 10	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we	2 3 4 5 6 7 8 9 10	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.
2 3 4 5 6 7 8 9 10 11	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet	2 3 4 5 6 7 8 9 10 11	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic
2 3 4 5 6 7 8 9 10 11 12 13	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.	2 3 4 5 6 7 8 9 10 11 12 13	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.
2 3 4 5 6 7 8 9 10 11 12 13	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. HOERNLEIN: Are you aware that this	2 3 4 5 6 7 8 9 10 11 12 13 14	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.  MS. HOERNLEIN: Cubic feet, so it's a
2 3 4 5 6 7 8 9 10 11 12 13 14 15	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. HOERNLEIN: Are you aware that this area is considered a sufficient aquifer according to	2 3 4 5 6 7 8 9 10 11 12 13 14 15	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.  MS. HOERNLEIN: Cubic feet, so it's a reduction?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. HOERNLEIN: Are you aware that this area is considered a sufficient aquifer according to New Jersey GeoWeb.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.  MS. HOERNLEIN: Cubic feet, so it's a reduction?  THE WITNESS: That's
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. HOERNLEIN: Are you aware that this area is considered a sufficient aquifer according to New Jersey GeoWeb.  THE WITNESS: That's a lot of sites in	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.  MS. HOERNLEIN: Cubic feet, so it's a reduction?  THE WITNESS: That's  MS. HOERNLEIN: So when you cut down
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. HOERNLEIN: Are you aware that this area is considered a sufficient aquifer according to New Jersey GeoWeb.  THE WITNESS: That's a lot of sites in the state that are wooded.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.  MS. HOERNLEIN: Cubic feet, so it's a reduction?  THE WITNESS: That's  MS. HOERNLEIN: So when you cut down trees, there's going to be increase in volume, but
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. HOERNLEIN: Are you aware that this area is considered a sufficient aquifer according to New Jersey GeoWeb.  THE WITNESS: That's a lot of sites in the state that are wooded.  THE COURT REPORTER: I'm sorry, "That's	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.  MS. HOERNLEIN: Cubic feet, so it's a reduction?  THE WITNESS: That's  MS. HOERNLEIN: So when you cut down trees, there's going to be increase in volume, but you're saying that it's actually going to be a
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	haven't been sworn.  (Audience Outburst.)  MS. HOERNLEIN: I'm asking questions.  How much soil will you be moving? It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. It's going to be you're going to be moving soil from one side of the lot to the other. How much soil is going to be transferred from one side to the other?  THE WITNESS: We didn't run a cut fill analysis at this time, but, again, we can provide that information if needed.  MS. PRICE: Yeah, for the record, we haven't done our soil movement permit application yet at this point, that's premature.  MS. HOERNLEIN: Are you aware that this area is considered a sufficient aquifer according to New Jersey GeoWeb.  THE WITNESS: That's a lot of sites in the state that are wooded.  THE COURT REPORTER: I'm sorry, "That's a lot of"?  THE WITNESS: Sites in the state that are wooded, that are classified the same way.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	of amount of impervious surface coverage on the site.  Ms. HOERNLEIN: Okay. And what is the volume increase from the existing situation to the proposed situation? I'm not talking about rate. I'm talking about volume.  What's the volume increase of stormwater from the existing to proposed conditions?  THE WITNESS: For the overall site or for just going to Lakeview.  MS. HOERNLEIN: For the overall site.  THE WITNESS: Sure.  It is a reduction of about 10,000 cubic feet for the 100-year storm.  MS. HOERNLEIN: Cubic feet, so it's a reduction?  THE WITNESS: That's  MS. HOERNLEIN: So when you cut down trees, there's going to be increase in volume, but you're saying that it's actually going to be a reduction.  So you're taking away trees and you're putting impervious surface there and you're saying that's going to be a reduction in volume of

	89		91
1	(Audience Outburst.)	1	behind there, will there be more saturation in the
2	MS. PRICE: I think he answered the	2	earth of water with your proposal than there is now?
3	question.	3	THE WITNESS: On our site, yes.
4	MR. MAGGIO: That was testified at the	4	MR. DAVIS: Right.
5	last meeting on how he was going to have a reduction.	5	So, but and Lakeview is below your
6	MS. PRICE: Right.	6	site, right? So is the basement of my property lower
7	MS. HOERNLEIN: I ran calculations	7	than the lowest point of your basin? I think it
8	MS. PRICE: Now it's more testimony.	8	might be.
9	MS. HOERNLEIN: and that is not the	9	THE WITNESS: It could be, but we need
10	case.	10	to comply with groundwater mounding and that means
11	MR. REGAN: You can testify later.	11	MR. DAVIS: So you can't answer the
12	MS. PRICE: Anything that's testimony	12	question? You don't know
13	I'm going to ask for this witness, there's she's	13	THE WITNESS: I'm answering the
14	not sworn in and I'm going to ask that it be noted so	14	question for you, sir.
15	on the record. I'm not being difficult. We have	15	MR. DAVIS: Okay.
16	rules that we need to comply with for the record.	16	THE WITNESS: We have to comply with
17	MR. REGAN: I agree.	17	groundwater mounding, meaning, we look at the mound
18	FEMALE AUDIENCE MEMBER: Why don't you	18	of the groundwater so when water gets back into the
19	swear her in then.	19	soil, the elevation of the groundwater below that
20	(Audience Outburst.)	20	basin gets higher.
21	MR. REGAN: Because this is not the	21	We have to make sure that by the time
22	time for testimony, it's the time for questions.	22	it's at the property line, it's at or below or not
23	(Audience Outburst.)	23	higher than existing conditions.
24	MS. PRICE: This is a question period.	24	So we have to that's a stormwater
25	CHAIRMAN WEIDMANN: Anyone else have	25	requirement in the state that we have to comply with.
	90		92
1	another question of the engineer? Yes?	1	MR. DAVIS: So you're saying there's

Are you saying are you talking about through the easement or are you saying into the ground?
2 3 4 5 6 7 8 9 10	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.	2 3 4 5 6 7 8 9 10	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.
2 3 4 5 6 7 8 9 10 11	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes	2 3 4 5 6 7 8 9 10 11	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of
2 3 4 5 6 7 8 9 10 11 12	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it	2 3 4 5 6 7 8 9 10 11 12 13	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.
2 3 4 5 6 7 8 9 10 11 12 13 14	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?	2 3 4 5 6 7 8 9 10 11 12 13	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less
2 3 4 5 6 7 8 9 10 11 12 13 14 15	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it	2 3 4 5 6 7 8 9 10 11 12 13 14 15	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?  THE WITNESS: In our basin, correct.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater back into the site it's not flooding anything outside
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?  THE WITNESS: In our basin, correct. MR. DAVIS: Right, but it's not, like,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater back into the site it's not flooding anything outside of our property as well, so we have to comply with
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?  THE WITNESS: In our basin, correct.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater back into the site it's not flooding anything outside of our property as well, so we have to comply with that as well. So it's not exceeding the existing
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?  THE WITNESS: In our basin, correct.  MR. DAVIS: Right, but it's not, like, waterproof where it seeps into the ground, correct? So it won't	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater back into the site it's not flooding anything outside of our property as well, so we have to comply with
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?  THE WITNESS: In our basin, correct.  MR. DAVIS: Right, but it's not, like, waterproof where it seeps into the ground, correct?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater back into the site it's not flooding anything outside of our property as well, so we have to comply with that as well. So it's not exceeding the existing conditions at the property line, the height of the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?  THE WITNESS: In our basin, correct.  MR. DAVIS: Right, but it's not, like, waterproof where it seeps into the ground, correct? So it won't  THE WITNESS: Yeah, that's the intent.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater back into the site it's not flooding anything outside of our property as well, so we have to comply with that as well. So it's not exceeding the existing conditions at the property line, the height of the groundwater.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	another question of the engineer? Yes?  MR. DAVIS: My name is Arie Davis. I live at 24 Lakeview Drive, which is right behind the basin you're proposing.  Can you explain a little bit more as to how or rather will there be less water concentration where the basin is versus what it is now?  Because to me it seems like the lady pointed out that there was trees and earth everywhere now, nothing impervious.  So it seems that a lot of water goes into the ground and you're proposing to redirect it all the way back to the basin, right?  So won't there be more saturation of water back there?  THE WITNESS: In our basin, correct.  MR. DAVIS: Right, but it's not, like, waterproof where it seeps into the ground, correct? So it won't  THE WITNESS: Yeah, that's the intent.  MR. DAVIS: Right, but it's more it	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MR. DAVIS: So you're saying there's going to be less saturation of water back there with your proposal than it is currently now?  THE WITNESS: Leaving our site will have less volume and a slower rate of stormwater leaving our site.  MR. DAVIS: But leaving your site where, which way? Are you saying are you talking about through the easement or are you saying into the ground?  THE WITNESS: I mean into the ground.  We analyzed a point of analysis. That point of analysis is the pipe leaving our site.  So at that pipe, we have less stormwater and at a slower rate leaving the site. We have to make sure where we're putting groundwater back into the site it's not flooding anything outside of our property as well, so we have to comply with that as well. So it's not exceeding the existing conditions at the property line, the height of the groundwater.  MR. DAVIS: Because it would seem to me

	93		95
1	proposed conditions.	1	The other issue is groundwater. So
2	So either way that same amount of water	2	once you put a basin in the ground and you're
3	is hitting the site under existing conditions, it's	3	infiltrating into the ground, the groundwater locally
4	getting into the ground.	4	has to come up.
5	MR. DAVIS: But it's not being	5	What they need to demonstrate is that
6	funneled, concentrated area in the back, which is	6	it will get back to its normal turn level before it
7	would be now, right?	7	leaves the site. That's what they're obligated to
8	Like right now it's just all dirt and	8	show and that's what their report has shown.
9	trees so it can sink into the ground. It's not going	9	MR. SCOZZAFAVA: Good.
10	to all get funneled directly to the back. It's not,	10	MR. ALESSI: Can I finish my question?
11	like, a hill like that.	11	THE WITNESS: Absolutely.
12	THE WITNESS: It collects in that inlet	12	(Laughter.)
13	that is on Lakeview's property.	13	MR. ALESSI: So we established it's
14	MR. DAVIS: I know, I mean I live right	14	about 10,000 square feet. How big would you say the
15	behind it, so I don't see a pool of water back there	15	reservoir is?
16	now, but now there's going to be a pool of water back	16	THE WITNESS: Lake Old Tappan.
17	there and somehow there's going to be less water	17	MR. ALESSI: Lake old Tappan.
18	saturation into the earth with that.	18	THE WITNESS: I would have to guess.
19	I don't see how that's possible, but	19	MR. ALESSI: Okay. So before all the
20	that's all the questions I have.	20	people of Lakeview was there, it was just a single
21	MR. ALESSI: How big is your basin?	21	stream.
22	THE WITNESS: Square footage, I'm not	22	Once they built the reservoir, half the
23	entirely sure.	23	town's town water raised. So your 10,000-square-foot
24	So we're about 200 feet by 50 feet.	24	catch basin or whatever it's called is a lot smaller
25	MR. ALESSI: If my math is correct,	25	than the groundwater that's steeping in from the
	94		96
1	that's about 1,000 square feet.	1	reservoir and the millions of trees that were cut
1 2	THE WITNESS: Ten thousand.	1 2	down.
	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.		down.  So I think what you're proposing here
2 3 4	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)	2	down.  So I think what you're proposing here is a lot better by providing less volume back into
2 3 4 5	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand	2 3 4 5	down.  So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps
2 3 4 5 6	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the	2 3 4 5 6	down.  So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.
2 3 4 5 6 7	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has	2 3 4 5 6 7	down.  So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.
2 3 4 5 6 7 8	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further	2 3 4 5 6 7 8	down.  So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve
2 3 4 5 6 7 8 9	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand  what you said, if I understood it correctly, the  stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further  higher than what it is today?	2 3 4 5 6 7 8 9	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot
2 3 4 5 6 7 8 9	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent	2 3 4 5 6 7 8 9	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake
2 3 4 5 6 7 8 9 10	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and	2 3 4 5 6 7 8 9 10	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.
2 3 4 5 6 7 8 9 10 11	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand  what you said, if I understood it correctly, the  stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further  higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local	2 3 4 5 6 7 8 9 10 11	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like
2 3 4 5 6 7 8 9 10 11 12	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already	2 3 4 5 6 7 8 9 10 11 12 13	down.  So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so
2 3 4 5 6 7 8 9 10 11 12 13	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already you're already confident that that will be taken care	2 3 4 5 6 7 8 9 10 11 12 13	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm
2 3 4 5 6 7 8 9 10 11 12 13 14 15	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already you're already confident that that will be taken care of?	2 3 4 5 6 7 8 9 10 11 12 13 14 15	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm Road. Once that reservoir was built, I was getting
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand  what you said, if I understood it correctly, the  stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further  higher than what it is today?  THE WITNESS: No, no, it's 100 percent  designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already  you're already confident that that will be taken care  of?  THE WITNESS: Yes, sir.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm Road. Once that reservoir was built, I was getting water in my basement.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand  what you said, if I understood it correctly, the  stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further  higher than what it is today?  THE WITNESS: No, no, it's 100 percent  designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already  you're already confident that that will be taken care  of?  THE WITNESS: Yes, sir.  MR. SKRABLE: So there's two separate	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm Road. Once that reservoir was built, I was getting water in my basement.  FEMALE AUDIENCE MEMBER: So you know
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already you're already confident that that will be taken care of?  THE WITNESS: Yes, sir.  MR. SKRABLE: So there's two separate issues. There's surface runoff, which is really a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm Road. Once that reservoir was built, I was getting water in my basement.  FEMALE AUDIENCE MEMBER: So you know what it's like. So you just testified that you get
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect.  (Laughter.)  MR. SCOZZAFAVA: And if I understand  what you said, if I understood it correctly, the  stormwater design which has not been designed yet has  to ensure that it ensures that it doesn't go further  higher than what it is today?  THE WITNESS: No, no, it's 100 percent  designed and we are complying with the state and  local  MR. SCOZZAFAVA: So it's already  you're already confident that that will be taken care  of?  THE WITNESS: Yes, sir.  MR. SKRABLE: So there's two separate  issues. There's surface runoff, which is really a  rate computation. You're trying to reduce the rate	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm Road. Once that reservoir was built, I was getting water in my basement.  FEMALE AUDIENCE MEMBER: So you know what it's like. So you just testified that you get groundwater from the reservoir.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already you're already confident that that will be taken care of?  THE WITNESS: Yes, sir.  MR. SKRABLE: So there's two separate issues. There's surface runoff, which is really a rate computation. You're trying to reduce the rate of runoff from the site.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm Road. Once that reservoir was built, I was getting water in my basement.  FEMALE AUDIENCE MEMBER: So you know what it's like. So you just testified that you get groundwater from the reservoir.  MS. PRICE: The record
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already you're already confident that that will be taken care of?  THE WITNESS: Yes, sir.  MR. SKRABLE: So there's two separate issues. There's surface runoff, which is really a rate computation. You're trying to reduce the rate of runoff from the site.  In this case, I believe you testified	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. DAVIS: But it's lower level, like it slopes downward, so  MR. ALESSI: I grew up on Old Farm Road. Once that reservoir was built, I was getting water in my basement.  FEMALE AUDIENCE MEMBER: So you know what it's like. So you just testified that you get groundwater from the reservoir.  MS. PRICE: The record  MR. REGAN: We have an issue with the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	THE WITNESS: Ten thousand.  MR. ALESSI: So my math is incorrect. (Laughter.)  MR. SCOZZAFAVA: And if I understand what you said, if I understood it correctly, the stormwater design which has not been designed yet has to ensure that it ensures that it doesn't go further higher than what it is today?  THE WITNESS: No, no, it's 100 percent designed and we are complying with the state and local  MR. SCOZZAFAVA: So it's already you're already confident that that will be taken care of?  THE WITNESS: Yes, sir.  MR. SKRABLE: So there's two separate issues. There's surface runoff, which is really a rate computation. You're trying to reduce the rate of runoff from the site.  In this case, I believe you testified that the volume is actually reduced as well.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	So I think what you're proposing here is a lot better by providing less volume back into the ground than the reservoir that everybody keeps forgetting about that's a mere hundred feet away.  THE WITNESS: I would have to agree.  MR. ALESSI: So hopefully we resolve the groundwater seepage from the 10,000-square-foot seepage pit to a way bigger seepage pit called Lake Tappan.  MR. 1	(Audience Outburst.)	1		CHAIRMAN WEIDMANN: Direct it to the
2	CHAIRMAN WEIDMANN: Okay.	2	engineer.	CHAINTAN WEIDHANN. BIRGE IE to the
3	One minute, before we take any more	3	erigineer.	MR. STEINHAGEN: Yeah, absolutely, and
4	questions, the court reporter needs a break. So	4	I don't have	any pictures tonight.
5	right now we're going to take a 10-minute break a	5	CROSS EXAM	
6	5-minute break and then we'll resume.	6	BY MR. STEI	
7	MR. CIRILLO: I just it will take	7	<b>Q</b> .	Mr. Sehnal, how are you today?
8	one minute.	8	<b>Д</b> .	I'm good.
9	I have one question, no comments.	9	7	How are you?
10	MR. REGAN: Name and address?	10	Q.	Good.
11	MR. CIRILLO: My name is Joe Cirillo,	11	<del></del>	When you looked at the site plans for
12	6 Lakeview Drive, Old Tappan.	12	Lakeview. di	d you analyze the capacity of the pipes
13	At the last meeting that I attended I	13	to carry stor	
14	left at intermission, that's why I want to do it	14	<b>A.</b>	Analyze the pipes, no.
15	before the intermission.	15	Q.	Okay.
16	(Laughter.)	16		Did you design the outfall structure
17	MR. CIRILLO: You had mentioned,	17	from the det	ention basin at the back of the property
18	Chairman, and asked a question of Dan, did they ever	18		well, you know what, I'm going to
19	consider having the stormwater and water move into	19	let's take a s	
20	Old Tappan Road and they said no, they have not.	20		Can you put up your grading and
21	Has that been addressed at all?	21	drainage ma	, , , , , , , , , , , , , , , , , , , ,
22	THE WITNESS: No, because we don't want	22	<b>A</b> .	I don't have that mounted as an
23	to change our drainage patterns and we	23	exhibit.	
24	MR. CIRILLO: You don't want to?	24	Q.	Can we put it up on the screen?
25	Repeat that.	25	A.	Yeah, we don't have the plans. We only

23

24

25

pond?

A.

the impervious surfaces are draining back to this

Majority of it, yes.

23

24

25

also coming off of the church property.

Is that correct?

Correct, yeah.

		105			107
1	Q.	Are there areas that are currently	1	our eastern	portion of the previous subdivision
2		ther locations under existing conditions	2		e improved lot coverage for proposed Lot
	_	going to be directed to the back?	3		6 square feet.
3				-	-
4	. A.	If you're overlaying them exactly,	4	Q.	Don't shift yet. And what was it for
5		ably a little bit more, but more or less	5	proposed Lot	
6		rea going to the back.	6	Α.	Lot B was 4,606 square feet.
7	Q.	Okay. Can you go back to while you	7	Q.	If I gave you calculator, would that
8		ier that you moved the building over,	8	· ·	ed those two up, would that be
9	is that a fair	characterization of your testimony?	9	approximatel	y 77,150 square feet?
10	A.	Correct, the entire developed area we	10	A.	Yes.
11	slid to the v	west.	11	Q.	Okay. What do we have now?
12	Q.	Were any changes to the building made?	12	Α.	We have with the existing house, 80,804
13	A.	No.	13	square feet.	
14	Q.	Was it made smaller?	14	Q.	And you took out the parking area for
15	A.	No.	15	the house?	
16	Q.	Was it made larger?	16	A.	Yeah, it resulted from our roadway
17	A.	No.	17	widening th	at wasn't originally in the first
18	Q.	Okay.	18	calculation.	Now we have more widening. The road
19		When we were here last month, you had a	19	now extend	s onto our property, which we've included
20	total building	g coverage of 30,937, if my math is	20	in the calcul	
21	_	s that sound right?	21	Q.	Well, it says that it's a proposed
22	<b>A.</b>	I have my previous exhibit right behind	22	easement.	man, ne dayo anae neo a proposed
23	this.	I have my previous exhibit right behind	23	A.	Yes, so it's on our property, included
24	Q.	Would you mind taking a look at it and	24		puilding coverage.
25	-	posed Lot A, that's the	25	Q.	So you didn't calculate that the last
25	that's on pro	106	25	Q.	108
4	٨		4	time?	100
1	Α.	I'm referring back to Exhibit A-5.	1		Originally, account our mirror dather
2	Q.	Okay.	2	Α.	Originally, correct, we missed that.
3	Α.	And the previous building coverage for	3	Q.	Okay.
4		as, yes, 21.2 percent, 30,937 square feet.	4		Did you was there any contemplation
5	Q.	Okay. And what is the proposed	5	_	iging the layout of the building so that
6	-	erage now on the current plan?	6	-	ve the easterly access drive that gets to
7	Α.	Building coverage is 28,863 square feet	7	the back-of-h	ouse area further away from the church
8	and that wa	as because we missed and accidently	8	lot?	
9	included th	e courtyard area under our previous	9	A.	Yes, and we did that.
10	revision, w	hich we have since took out because it's	10	Q.	Is there a way to do it from a physical
11	not a part o	of the building coverage.	11	standpoint?	
12	Q.	There's two numbers there, I'm not	12		Could you narrow the building in such a
13	understandir	ng.	13	way that you	can get all of the access driveway out
14	Α.	One is with the existing house to	14	of the buffer?	
15	remain, one	e is without. Just to show the difference	15	A.	I would not be able to speak about the
16	if we were	to	16	building's v	ery specific layout.
17	Q.	And also the barn is not shown?	17	Q.	If the building was 20 feet narrower,
18	A.	Correct, the barn we propose to take	18		ve the driveway over?
19	out.		19	<b>A</b> .	I mean, theoretically, yes, if the
20	Q.	Okay.	20		s 10 feet wide, then you can move the
21	٠.	So, can we do the same thing for the	21	entire	2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2
22	impervious c	_	22	Q.	Are there any physical conditions of
	-	_			
23	Α.	Absolutely.	23		that prevent you from narrowing the
24	Q.	So	24	building?	Dhysical conditions as Makes
<b>25</b>	A. 76 sheets	The Exhibit A-5 for Lot A, which was  Page 105 t	25	<b>A.</b>	Physical conditions, no. We have 06/15/2022 05:41:55 PM

1	wetlands th	nat prevent us from moving the building	1	technically, yes.
2	further to t		2	
	Q.			•
3		I understand, but you can narrow it?	3	requirements, rather than having more than the state
4	Α.	Again, I can't speak to the	4	requirements, you would have less impervious
5	architectur		5	coverage.
6	Q.	I'm asking from a site design	6	Is that true?
7	-	and from the physical conditions,	7	A. Theoretically.
8	topography,	•	8	<b>Q.</b> And that would lessen the amount of the
9	A.	If we had a narrower footprint from ou		impervious coverage variance the extent of the
10	architect, a	bsolutely.	10	impervious coverage variance that you need, right?
11	Q.	Sure. Okay.	11	A. Correct.
12		And the same thing would be true with	12	MR. STEINHAGEN: Okay. Give me one
13	respect to th	e buffer in the rear yard?	13	second.
14		Is that correct? A building that isn't	14	I have nothing else, Chairman.
15	quite as dee	p could keep you out of the buffer area.	15	Thank you.
16		Is that correct?	16	MR. ELLER: I have one quick question.
17	A.	Yeah, theoretically.	17	CHAIRMAN WEIDMANN: Go ahead.
18	Q.	What's the parking requirement for this	18	MR. ELLER: With regard to the pit, I
19	building?		19	know there's been a lot of questions about the
20	Α.	We follow the RSIS standard for	20	mounding issue and what's going to come potentially
21	assisted liv	ing, which is half a space per bed. We	21	to their basements or the property in general, once
22		ificate of need of 100 beds, so that woul		it leaves your property line.
23		entially 50 parking spaces.	23	Given the question Mr. Steinhagen
24	Q.	I'm looking at the plan and it says	24	raised about the existing conditions of the drainage,
25	-	re 46 spaces; is that true?	25	where the third of the property goes and then the
	triat triefe ai	110		112
1	Α.	Correct, because we went I'm sorry.	1	other towards the wetlands, could you put a second
	7.	correct, because we went I in sorry.	'	other towards the wedands, could you put a second
2	0	Is it true that you have 46 spaces?	2	nit or a rotontion basin towards the front of the
2	Q.	Is it true that you have 46 spaces?	2	pit or a retention basin towards the front of the
3	A.	Yes.	3	property, say, roughly where the the historic
3 4	A. Q.	<b>Yes.</b> Okay.	3 4	property, say, roughly where the the historic house is now that would take the existing third that
3 4 5	A. Q. A.	Yes. Okay. We have 83 units, that's where our	3 4 5	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin
3 4 5 6	A. Q. A. requiremen	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in.	3 4 5 6	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound
3 4 5 6 7	A. Q. A. requiremen Q.	Yes. Okay. We have 83 units, that's where our of 42 spaces comes in. So is it based on units or beds?	3 4 5 6 7	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount
3 4 5 6 7 8	A. Q. A. requiremen Q. A.	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units.	3 4 5 6 7 8	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the
3 4 5 6 7 8 9	A. Q. A. requiremen Q. A. Q.	Yes. Okay. We have 83 units, that's where our of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many?	3 4 5 6 7 8 9	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.
3 4 5 6 7 8 9	A. Q. A. requiremen Q. A. Q.	Yes. Okay. We have 83 units, that's where our of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units.	3 4 5 6 7 8 9	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that.
3 4 5 6 7 8 9 10	A. Q. A. requiremen Q. A. Q.	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units.	3 4 5 6 7 8 9 10	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that.  We are making sure that we're meeting essentially the
3 4 5 6 7 8 9 10 11	A. Q. A. requiremen Q. A. Q. A. Q.	Yes. Okay. We have 83 units, that's where our of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be	3 4 5 6 7 8 9 10 11	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage
3 4 5 6 7 8 9 10 11 12 13	A. Q. A. requirement Q. A. Q. A. Q. under the RS	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5?	3 4 5 6 7 8 9 10 11 12 13	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by
3 4 5 6 7 8 9 10 11 12 13	A. Q. A. requiremen Q. A. Q. A. Q. under the RS A.	Yes. Okay. We have 83 units, that's where our of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct.	3 4 5 6 7 8 9 10 11 12 13	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of
3 4 5 6 7 8 9 10 11 12 13	A. Q. A. requirement Q. A. Q. A. Q. under the RS A. Q.	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV	3 4 5 6 7 8 9 10 11 12 13	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions
3 4 5 6 7 8 9 10 11 12 13	A. Q. A. requiremen Q. A. Q. A. Q. under the RS A.	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV	3 4 5 6 7 8 9 10 11 12 13	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of
3 4 5 6 7 8 9 10 11 12 13 14 15	A. Q. A. requirement Q. A. Q. A. Q. under the RS A. Q.	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV	3 4 5 6 7 8 9 10 11 12 13 14 15	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions
3 4 5 6 7 8 9 10 11 12 13 14 15 16	A. Q. A. Q. under the RS A. Q. parking space	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV	3 4 5 6 7 8 9 10 11 12 13 14 15 16	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.
3 4 5 6 7 8 9 10 11 12 13 14 15 16	A. Q. A. Q. under the RS A. Q. parking space	Yes. Okay. We have 83 units, that's where our of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV res. Is that correct?	3 4 5 6 7 8 9 10 11 12 13 14 15 16	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.  So that's why we don't need the basin
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Q. A. Q. under the RS A. Q. parking space	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV ies. Is that correct? That's	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.  So that's why we don't need the basin in that portion, but we're
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Q. A. Q. under the RS A. Q. parking space	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV res. Is that correct? That's That's where you're going to go, right?	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.  So that's why we don't need the basin in that portion, but we're  MR. ELLER: I understand what you're
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. Q. A. Q. under the RS A. Q. parking space	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV res. Is that correct? That's That's where you're going to go, right?	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.  So that's why we don't need the basin in that portion, but we're  MR. ELLER: I understand what you're saying and it's not necessarily your job to do that.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. Q. A. requirement Q. A. Q. A. Q. under the RS A. Q. parking space A. Q.	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV ses. Is that correct? That's That's where you're going to go, right? So do you have more parking than you	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.  So that's why we don't need the basin in that portion, but we're  MR. ELLER: I understand what you're saying and it's not necessarily your job to do that. This is, I guess, for your client too, is to consider
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Q. A. Q. under the RS A. Q. parking space A. Q. need? A. Q.	Yes. Okay. We have 83 units, that's where our of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV ses. Is that correct? That's That's where you're going to go, right? So do you have more parking than you This is	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that.  We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.  So that's why we don't need the basin in that portion, but we're  MR. ELLER: I understand what you're saying and it's not necessarily your job to do that. This is, I guess, for your client too, is to consider just potentially making the communities putting
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Q. A. Q. under the RS A. Q. parking space A. Q. need? A. Q.	Yes. Okay. We have 83 units, that's where our at of 42 spaces comes in. So is it based on units or beds? Units. Okay. So if you have 80 how many? Eighty-three units. Eighty-three units. So, your parking requirement should be SIS 41.5? Correct. And you get bonus credits for EV ses. Is that correct? That's That's where you're going to go, right? So do you have more parking than you  This is By more than you need, more than you	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	property, say, roughly where the the historic house is now that would take the existing third that goes towards the wetlands and put it in the basin closer to the wetlands that would potentially mound where it's going anyway and thus reduce a good amount of the water that's going towards the back of the property.  THE WITNESS: We didn't look at that. We are making sure that we're meeting essentially the reduction requirements for each one of those drainage area and we're doing so in the front as well by essentially technically reducing a little bit of impervious surface coverage under proposed conditions for that section that drains back onto wetlands.  So that's why we don't need the basin in that portion, but we're  MR. ELLER: I understand what you're saying and it's not necessarily your job to do that. This is, I guess, for your client too, is to consider just potentially making the communities putting the communities and the people that would potentially

		1	
	113		115
1	it is.	1	MR. MAGGIO: That's something you would
2	I don't know if it's something that you	2	consider?
3	can look at. We talked about potentially changing	3	THE WITNESS: Again, in this situation,
4	the drainage plans entirely to go back based on some	4	it's not something that's practical honestly. I
5	of the threats of litigation and some other things.	5	mean, we'd be more than happy to take a look at
6	If maybe looked at it that way, we'd be	6	another smaller basin up front now that that barn is
7	taking some of the water out of that retention basin	7	gone.
8	and out of the water that would be going towards the	8	I think it's a great idea to further
9	easement and just by mounding it and it would go back	9	reduce it, but I think, you know, the blue roof would
10	towards the existing wetlands.	10	be a very difficult, you know, challenge just with
11	THE WITNESS: It's a great point. I	11	the amount of equipment that they're already hiding
12	see where you're going with it. I'm more than happy	12	on the roof.
13	to take a look, but again, what we're trying to make	13	MR. ELLER: Totally agree with you
14	sure is that we're not sending more water to a point.	14	about the roof, but what about the aboveground
15	MR. ELLER: Totally understand what	15	retention tank? You think it would probably be a lot
16	you're saying, where you're coming from.	16	more less it would probably be less of a financial
17	THE WITNESS: It's a great suggestion.	17	burden on the client too rather than the excavating
18	I can take a look at it for you.	18	work and burying everything, if you were going to set
19	MR. ELLER: Thank you.	19	it up to tie in and release over time, I would think
20	MR. ALESSI: I have another	20	do that and plant some more bushes and trees around
21	interjection based on Dan's and maybe for Mark, I	21	it and you'd have much more control over the
22	don't know. I seem to remember something called a	22	stormwater.
23	"blue roof" where the water be retained on the roof	23	THE WITNESS: An aboveground tank?
24	and then slowly let back into the non-roof area to	24	MR. ELLER: That's what I thought you
25	further diminish your seepage into the vernal pond,	25	were mentioning before. Rather than the roof, you
	114		116
1	the drainage pond, the pipes, is that your question	1	said whether it's below aboveground or not,
2	or Mark's question about that blue roof?	2	aboveground or below-ground, I don't really care, but
3	THE WITNESS: I mean, I've designed	3	if it was a storage tank, rather than a seepage pit
4	only one of them in my career. It's a design that	4	where you controlled the flow.
5	you see more often in urban settings where there's no	5	THE WITNESS: Well, that's what our
6	essentially area to accommodate a stormwater basin,	6	basin is doing as well. It's doing both by putting
7	because the easiest thing to maintain is essentially	7	water back into the ground and controlling as well.
8	an aboveground stormwater basin and putting it on the	8	It's basically accomplishing
9	roof adds a world of maintenance difficulties.	9	MR. ELLER: But I mean, I guess the
10	It makes it hard for the HVAC	10	difference I'm saying is the pits that you that
11	equipment. So we always try to avoid that. It adds	11	you're talking about basically, they go at the speed
12	more weight to the building, the structural members,	12	of gravity and what's going to flow through. I think
13	obviously, the building construction gets more	13	what Mike was talking about is you can do like the
14	expensive. So we try to avoid that at all costs	14	blue roof thing, it holds the water and releases it
15	unless we're really in an urban setting. We try to	15	at a rate you choose.
16	stay to green infrastructure techniques by, you know,	16	THE WITNESS: That's exactly what we do
17	proposing aboveground basins and sand filters.	17	with our basin. That's what the use of our the
18	MR. ELLER: But an aboveground basin	18	structure that's in the northeastern corner, the
19	would give you the same effect anyway?	19	outlet control structure, you control the amount of
20	THE WITNESS: Yeah, absolutely.	20	flow based on the size of the holes and openings you
21	MR. MAGGIO: It's also because of urban	21	have in that outlet control structure.
22	settings the systems can't support, but, yeah, it's	22	MR. ELLER: Right.
23	pretty common in like New York, we see it all the	23	THE WITNESS: So it's accomplishing the
24	time.	24	same thing, just not
25	THE WITNESS: Yeah, absolutely.  76 sheets Page 113 to	25	MR. ELLER: You do that in realtime or 06/15/2022 05:41:55 Pt
29 of			

	117		119
1	you but you don't do that in realtime, you do that	1	limited basis.
2	when you build the structure and the holes are the	2	MS. LOULOUDIS: Yeah.
3	holes.	3	CHAIRMAN WEIDMANN: Anyone else from
4	THE WITNESS: Yeah, part of our	4	the public wish to be heard?
5	analysis to meet the regulatory	5	Yes, sir.
6	MR. ELLER: Totally understand that.	6	MR. ARDITO: Peter Ardito, 57 Glen
7	What I'm saying is those tanks, do they this is me	7	Avenue East, Harrington Park.
8	asking the question, I don't know the answer, but say	8	MS. HAVERILLA: I'm sorry, what's the
9	the blue roof thing or the tank situation, you would	9	name?
10	be able to physically control that and you'd store	10	MR. ARDITO: Peter Ardito and I'm here
11	the say you got the 100-year storm, you can wind	11	representing Bergen SWAN.
12	up with that tank full for two weeks while you're	12	MS. HAVERILLA: I'm sorry, can you
13	draining it out, rather than letting it	13	spell that?
14	MR. SKRABLE: Can I interject on that?	14	MR. ARDITO: A-R-D-I-T-O.
15	MR. ELLER: I'm asking the question. I	15	Looking at your plans that I've seen,
16	don't know the answer.	16	is it fair to say that when the soil removal happens,
17	MR. SKRABLE: I'm pretty sure, and Dan,	17	from the height of the current property, it's going
18	please jump in, if you're going to do a holding tank,	18	to be about 10 feet that are being removed?
19	it can only be roof water and it can only be the	19	THE WITNESS: No, that is not correct.
20	water quality storm?	20	MR. ARDITO: About how much will it be?
21	THE WITNESS: That's correct.	21	THE WITNESS: We are
22	MR. ELLER: What is a water quality	22	MR. ARDITO: I thought I saw the high
23	MR. SKRABLE: It's	23	point was about 96 feet right now above sea level.
24	THE WITNESS: It's an inch it's	24	It's going to be about 80 or 84.
25	essentially the first flush of a big storm event.	25	THE WITNESS: The yeah, the average
	118		120
1	It's the first inch-and-a-quarter over a period of	1	
			grade around the outside of the building is 1 foot
2	two hours to fall on the site.	2	lower than existing conditions.
3	two hours to fall on the site.  So that's when you have all the oil and	2	lower than existing conditions.  MR. ARDITO: So the high point of the
2 3 4	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that	2 3 4	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower
2 3 4 5	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality	2 3 4 5	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower
2 3 4 5 6	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure	2 3 4 5 6	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high
2 3 4 5 6 7	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we	2 3 4 5 6 7	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be
2 3 4 5 6 7 8	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.	2 3 4 5 6 7 8	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.
2 3 4 5 6 7 8 9	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is	2 3 4 5 6 7 8 9	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of
2 3 4 5 6 7 8 9	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is	2 3 4 5 6 7 8 9	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing
2 3 4 5 6 7 8 9 10	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.	2 3 4 5 6 7 8 9 10	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the
2 3 4 5 6 7 8 9 10 11	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed	2 3 4 5 6 7 8 9 10 11	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions,
2 3 4 5 6 7 8 9 10	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state	2 3 4 5 6 7 8 9 10	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're
2 3 4 5 6 7 8 9 10 11 12	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the	2 3 4 5 6 7 8 9 10 11 12 13	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.
2 3 4 5 6 7 8 9 10 11 12 13	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state	2 3 4 5 6 7 8 9 10 11 12 13	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're
2 3 4 5 6 7 8 9 10 11 12 13 14 15	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.  MS. LOULOUDIS: That wouldn't count for	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing property?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.  MS. LOULOUDIS: That wouldn't count for green infrastructure anyway, right, Tom?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing property?  THE WITNESS: Yeah, of the average.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.  MS. LOULOUDIS: That wouldn't count for green infrastructure anyway, right, Tom?  MR. SKRABLE: I'm sorry?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing property?  THE WITNESS: Yeah, of the average.  MR. ARDITO: That's the average?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.  MS. LOULOUDIS: That wouldn't count for green infrastructure anyway, right, Tom?  MR. SKRABLE: I'm sorry?  MS. LOULOUDIS: That wouldn't count for	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing property?  THE WITNESS: Yeah, of the average.  MR. ARDITO: That's the average?  THE WITNESS: Correct.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.  MS. LOULOUDIS: That wouldn't count for green infrastructure anyway, right, Tom?  MR. SKRABLE: I'm sorry?  MS. LOULOUDIS: That wouldn't count for green you would have to utilize green	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing property?  THE WITNESS: Yeah, of the average.  MR. ARDITO: That's the average?  THE WITNESS: Correct.  MR. ARDITO: But overall, how much I
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.  MS. LOULOUDIS: That wouldn't count for green infrastructure anyway, right, Tom?  MR. SKRABLE: I'm sorry?  MS. LOULOUDIS: That wouldn't count for green you would have to utilize green infrastructure techniques it's on the new rules	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing property?  THE WITNESS: Yeah, of the average.  MR. ARDITO: That's the average?  THE WITNESS: Correct.  MR. ARDITO: But overall, how much I mean, there are different heights on a piece of
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	two hours to fall on the site.  So that's when you have all the oil and trash and debris that's on a pervious surface that gets washed into the basin and your water quality storm is essentially the storm we have to make sure we're cleaning out all of that debris before we discharge.  MR. SKRABLE: So the 100-year storm is where most of the volume is  THE WITNESS: Sure.  MR. SKRABLE: and you're not allowed to do that with that storm. It's just the state standard. I'm not I don't really get all the logic behind it, but it's a standard, yes.  MS. LOULOUDIS: That wouldn't count for green infrastructure anyway, right, Tom?  MR. SKRABLE: I'm sorry?  MS. LOULOUDIS: That wouldn't count for green you would have to utilize green infrastructure techniques it's on the new rules  MR. SKRABLE: Right.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	lower than existing conditions.  MR. ARDITO: So the high point of the property right now is only going to be 1 foot lower  THE WITNESS: I didn't say the high point. The average footprint of the building will be one a half a foot lower than it currently is.  So if you take that the footprint of the building, you slap it on the site under existing conditions, you take the perimeter, you get the average grade around that under existing conditions, do the same thing under proposed conditions, we're only 1 foot or half a foot lower.  MR. ARDITO: Lower than the existing property?  THE WITNESS: Yeah, of the average.  MR. ARDITO: That's the average?  THE WITNESS: Correct.  MR. ARDITO: But overall, how much I mean, there are different heights on a piece of property. How much would you say on average, how

		1	
	121		123
1	balanced site.	1	settle out before that stormwater leaves our site and
2	It's a very hilly rolling site, a lot	2	it's a state general permit that we're required to
3	of ups and downs throughout the site and our intent	3	have before we start construction.
4	is to always try to have a balanced site to limit the	4	MR. ARDITO: So would you say the silt
5	amount of soil movement that's necessary.	5	fence I'm not an expert in this.
6	MR. ARDITO: Okay. Just a couple of	6	When I go to development properties, I
7	questions should the application be approved.	7	see wooden stakes with what looks like a plastic
8	Can you go over with me the schedule of	8	fence or something around it that's maybe about
9	how the property will be developed, starting with, I	9	3-feet high, is that what you're talking about.
10	would assume the first thing that would happen would	10	THE WITNESS: Yes.
11	be coming in and removing all the trees.	11	MR. ARDITO: And how would that in a
12	THE WITNESS: Generally, yes.	12	very heavy rain, how would that retain the runoff
13	And, well, first, you have to establish	13	that is probably going to occur that would not have
14	your soil erosion and sediment control standards by	14	occurred prior to that because you had all the trees
15	staking out your silt fence and making sure all	15	and all the grass? That low fence probably would not
16	that's in place before any soil disturbance takes	16	be able to hold a 3-inch rainfall in the span like
17	place.	17	last year we had a 3-inch rainfall in less than an
18	MR. ARDITO: Okay.	18	hour.
19	Okay, granted, and then the trees would	19	How would that be handled?
20	probably be the next step.	20	THE WITNESS: Absolutely. It's not
21	THE WITNESS: Generally, yes.	21	intended to hold back water.
22	MR. ARDITO: And then after that would	22	MR. ARDITO: So where would that water
23	be removing stumps?	23	go? Would it go into Lakeview and to other
24	THE WITNESS: Correct.	24	properties around in the meantime?
25	MR. ARDITO: Okay. Then after that	25	THE WITNESS: It runs through it and

1 2	would be whatever leveling you would need to do?  Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately	1 2	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm
1 2 3 4 5	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.	1 2 3	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and
1 2 3 4 5 6	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms. Two weeks ago, we had received	1 2 3 4	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then
1 2 3 4 5 6 7	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.	1 2 3 4 5 6 7	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.
1 2 3 4 5 6 7 8	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms. Two weeks ago, we had received 2-and-a-half inches in less than 24 hours. I'm curious, once the before you	1 2 3 4 5 6 7 8	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before
1 2 3 4 5 6 7 8	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as	1 2 3 4 5 6 7 8	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the
1 2 3 4 5 6 7 8 9	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours. I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to	1 2 3 4 5 6 7 8 9	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually
1 2 3 4 5 6 7 8 9 10 11	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on	1 2 3 4 5 6 7 8 9 10 11	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.
1 2 3 4 5 6 7 8 9 10 11 12	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours. I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees	1 2 3 4 5 6 7 8 9 10 11 12	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts,
1 2 3 4 5 6 7 8 9 10 11 12 13	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically	1 2 3 4 5 6 7 8 9 10 11 12 13	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground
1 2 3 4 5 6 7 8 9 10 11 12 13 14	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be	1 2 3 4 5 6 7 8 9 10 11 12 13 14	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours. I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason why we need a soil erosion sediment control	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets begin collecting rainwater and, again, that silt gets
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason why we need a soil erosion sediment control certification. So we've applied to them. We've had	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets begin collecting rainwater and, again, that silt gets collected and at that point we'll have our sediment
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason why we need a soil erosion sediment control certification. So we've applied to them. We've had two outstanding comments, which we've addressed that	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets begin collecting rainwater and, again, that silt gets collected and at that point we'll have our sediment basin in place and at that point we'll be controlling
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason why we need a soil erosion sediment control certification. So we've applied to them. We've had two outstanding comments, which we've addressed that our certification is forthcoming. That's in relation	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets begin collecting rainwater and, again, that silt gets collected and at that point we'll have our sediment basin in place and at that point we'll be controlling stormwater as well.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	would be whatever leveling you would need to do?  Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason why we need a soil erosion sediment control certification. So we've applied to them. We've had two outstanding comments, which we've addressed that our certification is forthcoming. That's in relation to the silt fences that I mentioned and all of the	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets begin collecting rainwater and, again, that silt gets collected and at that point we'll have our sediment basin in place and at that point we'll be controlling stormwater as well.  So these are all requirements that
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	would be whatever leveling you would need to do? Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason why we need a soil erosion sediment control certification. So we've applied to them. We've had two outstanding comments, which we've addressed that our certification is forthcoming. That's in relation to the silt fences that I mentioned and all of the inlet protection that we're required to put in place	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets begin collecting rainwater and, again, that silt gets collected and at that point we'll have our sediment basin in place and at that point we'll be controlling stormwater as well.  So these are all requirements that we're meant to comply with associated with the Bergen
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	would be whatever leveling you would need to do?  Okay. So the question I have from that is that once the trees are removed and then the stumps are removed and you start to level, lately we've had some very serious storms.  Two weeks ago, we had received 2-and-a-half inches in less than 24 hours.  I'm curious, once the before you have put the retention pond in, the holding pit, as well as all the drainage pits, how are you going to alleviate erosion and flooding building is going on without these methods? I mean, without the trees being there absorbing, you're going to have basically dirt, no grass. So how will the properties around be protected from runoff?  THE WITNESS: That's the exact reason why we need a soil erosion sediment control certification. So we've applied to them. We've had two outstanding comments, which we've addressed that our certification is forthcoming. That's in relation to the silt fences that I mentioned and all of the	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	goes downstream, but the intent of that fence is to collect the silt so it doesn't go past it and you also mentioned that we're under construction, we cleared all the trees and before all of our storm structures go in, obviously the site is cleared and it's soiled, then you're cleared and the soil is then broken up after removing the trees.  So then even during construction before your pipes go in, you have an opportunity for the water to get back into the ground, so you actually have less runoff during construction activities.  But then as the construction starts, the next step is they place your inlets in the ground and all of your drainage structures.  Those inlets go in, you put filter fabric inside of the inlets and then those inlets begin collecting rainwater and, again, that silt gets collected and at that point we'll have our sediment basin in place and at that point we'll be controlling stormwater as well.  So these are all requirements that

25 we're -- or not every day, usually once a week to

25 stormwater from the site and allow the sediment to

	125		127
1	make sure we're in compliance with those	1	Is that correct?
2	requirements.	2	THE WITNESS: Yes.
3	MR. ARDITO: What would your estimate	3	MR. ARDITO: And I heard it again that
4	be from the day of approval and the first chance you	4	you're talking about taking some of the runoff and
5	go in there to start work on the property and to	5	putting it towards the vernal pool.
6	completion, what would you estimate that to be on a	6	Is that correct?
7	timeline?	7	THE WITNESS: Yeah, matching existing
8	THE WITNESS: Generally I think it's	8	conditions.
9	about 18 months from groundbreaking.	9	MR. ARDITO: I understand that some of
10	MR. ARDITO: Eighteen months.	10	the things that Ms. Price talked about was maybe in
11	And how long before the retention that	11	the revised plans that there may be additional water
12	you're talking about, the piping and the holding pit,	12	going over there for the stormwater that you said
13	how long before that would be installed roughly.	13	earlier when they were when the gentleman, the
14	THE WITNESS: I would say within the	14	lawyer was asking, there may be some additional water
15	first two months.	15	that's going to be going to the pond?
16	MR. ARDITO: So there is the	16	MS. PRICE: To which pond?
17	possibility in heavy rains that in spite of whatever	17	MR. ARDITO: To the vernal pond to the
18	good intention you have, that there would be more	18	west.
19	runoff than expected or let me rephrase that	19	MS. PRICE: No, I said I don't know
20	more runoff that occurs right now under the natural	20	what we're going to be doing.
21	environment that would occur because unfortunately	21	MR. ARDITO: Okay. I thought you said
22	all the vegetation would have been removed and in a	22	maybe that could be a possibility.
23	heavy, heavy rain, there's just nothing you can do, I	23	MS. PRICE: Until we see how are
24	would expect?	24	what we're going to be designing.
25	THE WITNESS: Yeah, just like any other	25	MR. ARDITO: Okay. I just wanted to be
	126		128
	120		120
1	construction site, that's absolutely correct and	1	sure.
1 2		1 2	
	construction site, that's absolutely correct and		sure.
2	construction site, that's absolutely correct and that's the reason for the soil conservation district.	2	sure.  MR. PRICE: Yup.
2	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to	2	sure.  MR. PRICE: Yup.  MR. ARDITO: And you realize there are
2 3 4	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to say that other properties, Lakeview, the church,	2 3 4	sure.  MR. PRICE: Yup.  MR. ARDITO: And you realize there are people who have that pond expends into the properties
2 3 4 5	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to say that other properties, Lakeview, the church, people where the vernal pool is, they could be	2 3 4 5	sure.  MR. PRICE: Yup.  MR. ARDITO: And you realize there are people who have that pond expends into the properties over there to the west. There is definitely one
2 3 4 5 6	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to say that other properties, Lakeview, the church, people where the vernal pool is, they could be affected negatively by this for those two months?	2 3 4 5 6	MR. PRICE: Yup.  MR. ARDITO: And you realize there are people who have that pond expends into the properties over there to the west. There is definitely one homeowner and possibly two.
2 3 4 5 6 7	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to say that other properties, Lakeview, the church, people where the vernal pool is, they could be affected negatively by this for those two months?  THE WITNESS: Well, no, that's the	2 3 4 5 6 7	MR. PRICE: Yup.  MR. ARDITO: And you realize there are people who have that pond expends into the properties over there to the west. There is definitely one homeowner and possibly two.  So additional water being put into that pool could affect their property as well.  THE WITNESS: Is that a question?
2 3 4 5 6 7 8	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to say that other properties, Lakeview, the church, people where the vernal pool is, they could be affected negatively by this for those two months?  THE WITNESS: Well, no, that's the intent of the soil conservation district to make sure	2 3 4 5 6 7 8	MR. PRICE: Yup.  MR. ARDITO: And you realize there are people who have that pond expends into the properties over there to the west. There is definitely one homeowner and possibly two.  So additional water being put into that pool could affect their property as well.
2 3 4 5 6 7 8 9	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to say that other properties, Lakeview, the church, people where the vernal pool is, they could be affected negatively by this for those two months?  THE WITNESS: Well, no, that's the intent of the soil conservation district to make sure that doesn't happen.	2 3 4 5 6 7 8 9	MR. PRICE: Yup.  MR. ARDITO: And you realize there are people who have that pond expends into the properties over there to the west. There is definitely one homeowner and possibly two.  So additional water being put into that pool could affect their property as well.  THE WITNESS: Is that a question?
2 3 4 5 6 7 8 9	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. ARDITO: But it would be correct to say that other properties, Lakeview, the church, people where the vernal pool is, they could be affected negatively by this for those two months?  THE WITNESS: Well, no, that's the intent of the soil conservation district to make sure that doesn't happen.  MR. ARDITO: It's to make sure it	2 3 4 5 6 7 8 9	MR. PRICE: Yup.  MR. ARDITO: And you realize there are people who have that pond expends into the properties over there to the west. There is definitely one homeowner and possibly two.  So additional water being put into that pool could affect their property as well.  THE WITNESS: Is that a question?  MR. ARDITO: Okay. I'm sorry. Is it
2 3 4 5 6 7 8 9 10	construction site, that's absolutely correct and that's the reason for the soil conservation district.  MR. CHAIRMAN WEIDMANN: Thank you.  (Applause.)  MR. BEDIAN: That's encouraging to see	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	incidents.  So what is your plan if you're now going to redirect water from Lakeview to our properties?  THE WITNESS: I never provided testimony saying we were redirecting any of our stormwater  MS. FONOROW: I know, that's why I asked if I could ask the question.  THE WITNESS: I'm answering.  MS. FONOROW: Okay.  THE WITNESS: That our proposal remains the same. We're discharging the majority of our stormwater to the easement to the northeast of our property. There is, again, less volume going to the wetlands area under proposed conditions then there does today.  MS. FONOROW: Okay. Maybe I didn't understand properly when you were talking also just recently about moving the idea of redesigning and moving the basin to where the barn is, because that's
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	which are a variety of reasons. Didn't really talk about the environment, but your question is excellent and I think you should go to the council meeting.  CHAIRMAN WEIDMANN: Go to the Mayor and Council meeting.  MR. REGAN: June 20th.  CHAIRMAN WEIDMANN: June 20th.  MS. PRICE: June 20th.  MS. PRICE: June 20th.  MR. SCOZZAFAVA: Yeah, and if I were you, I would bring more students. If you really have that question, go in strength and ask those questions.  MR. ELLER: And also, you can e-mail it to them before so they can have an answer ready so you don't walk in and they're not ready to answer it.  MS. SONG: Thank you.  MR. SCOZZAFAVA: Great question.  CHAIRMAN WEIDMANN: Thank you.  (Applause.)  MR. BEDIAN: That's encouraging to see students.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	incidents.  So what is your plan if you're now going to redirect water from Lakeview to our properties?  THE WITNESS: I never provided testimony saying we were redirecting any of our stormwater  MS. FONOROW: I know, that's why I asked if I could ask the question.  THE WITNESS: I'm answering.  MS. FONOROW: Okay.  THE WITNESS: That our proposal remains the same. We're discharging the majority of our stormwater to the easement to the northeast of our property. There is, again, less volume going to the wetlands area under proposed conditions then there does today.  MS. FONOROW: Okay. Maybe I didn't understand properly when you were talking also just recently about moving the idea of redesigning and moving the basin to where the barn is, because that's not behind the property.

	137		139
1	done that. That was just a question I asked.	1	MS. FONOROW: It seems there's a lot of
2	MS. FONOROW: Okay. Because it just	2	question for that stormwater management. Okay.
3	that's where I was like, okay, now I don't understand	3	Another question I have is about the
4	if you're talking about moving it.	4	wildlife and wetlands. Has there been any
5	MR. ELLER: I did that based on the	5	consideration and how can you guarantee or how do you
6	testimony that about a third of the property drains	6	determine that there's going to be, as you said, no
7	to it currently.	7	disturbance to the wetlands?
8	So rather than taking any of that water	8	THE WITNESS: The fact that we have a
9	that's draining towards the wetlands now and	9	50-foot transition area and an additional 5 feet past
10	diverting it towards Lakeview, we would be able to in	10	that that we're not disturbing.
11	theory keep the water draining where it is at a	11	MS. FONOROW: Okay.
12	current rate, rather than taking any additional water	12	I'm not going to ask you to show what
13	towards Lakeview.	13	50 feet looks like. It's not very big, but just that
14	MS. FONOROW: Okay. Well, you've	14	section in the back, is that where it looks almost
15	walked the property and viewed the property, correct?	15	like it's touching, what is the distance there of the
16	THE WITNESS: Yes.	16	parking lot and the wetlands.
17	MS. FONOROW: I don't know if all the	17	THE WITNESS: From the parking lot to
18	planning board members or Mayor and Council or	18	the wetlands
19	anybody else has done that. I live and look at that	19	MS. FONOROW: Because that doesn't look
20	property every single day for 25 years.	20	like a 50-feet buffer.
21	So another question, will you agree	21	THE WITNESS: You're right, it's not
22	that your proposal calls for regrading the entire	22	50, it's 65.
23	topography of the 3-and-a-half acres?	23	MS. FONOROW: Okay.
24	THE WITNESS: No.	24	It looks quite small. And are you
25	MS. FONOROW: How much is going to be	25	going to plan on removing all the trees that are
	400		
	138		140
1	leveled out?	1	around that? Right now it's big steeping slopes and
1 2		1 2	
	leveled out?		around that? Right now it's big steeping slopes and
2	leveled out?  THE WITNESS: Essentially only the	2	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm
2	leveled out?  THE WITNESS: Essentially only the portion where our development is. Everything to the	2	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.
2 3 4	leveled out?  THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage	2 3 4	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape
2 3 4 5	leveled out?  THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or	2 3 4 5	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be
2 3 4 5 6	Ieveled out?  THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.	2 3 4 5 6	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape  MS. FONOROW: Are you going to be oh, that's a landscape question?
2 3 4 5 6 7	In the WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.	2 3 4 5 6 7	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is
2 3 4 5 6 7 8	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a	2 3 4 5 6 7 8	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.
2 3 4 5 6 7 8 9	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about	2 3 4 5 6 7 8 9	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question? MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise
2 3 4 5 6 7 8 9	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the	2 3 4 5 6 7 8 9	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with
2 3 4 5 6 7 8 9 10	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a	2 3 4 5 6 7 8 9 10	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.
2 3 4 5 6 7 8 9 10 11	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a high piece point in Old Tappan and then you have a retaining wall that's all that's protecting the wetlands from overflow, what I don't understand	2 3 4 5 6 7 8 9 10 11 12 13 14	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question? MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.  I think oh, my other question is,
2 3 4 5 6 7 8 9 10 11 12 13	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a high piece point in Old Tappan and then you have a retaining wall that's all that's protecting the	2 3 4 5 6 7 8 9 10 11 12	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.  I think oh, my other question is, can I ask, and you might not be able to answer this,
2 3 4 5 6 7 8 9 10 11 12 13	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a high piece point in Old Tappan and then you have a retaining wall that's all that's protecting the wetlands from overflow, what I don't understand how you can say all right now it's ground.  If you agree, it's ground and trees	2 3 4 5 6 7 8 9 10 11 12 13 14	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape  MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.  I think oh, my other question is, can I ask, and you might not be able to answer this, can I ask why this building has to be so large?  THE WITNESS: Yeah, that would be for operations and our architect.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a high piece point in Old Tappan and then you have a retaining wall that's all that's protecting the wetlands from overflow, what I don't understand how you can say all right now it's ground.  If you agree, it's ground and trees that are absorbing everything for hundreds of years	2 3 4 5 6 7 8 9 10 11 12 13 14 15	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question? MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.  I think oh, my other question is, can I ask, and you might not be able to answer this, can I ask why this building has to be so large?  THE WITNESS: Yeah, that would be for operations and our architect.  MS. FONOROW: Okay. Because I'm asking
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a high piece point in Old Tappan and then you have a retaining wall that's all that's protecting the wetlands from overflow, what I don't understand how you can say all right now it's ground.  If you agree, it's ground and trees that are absorbing everything for hundreds of years and now you're going to pave over everything and put	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape  MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.  I think oh, my other question is, can I ask, and you might not be able to answer this, can I ask why this building has to be so large?  THE WITNESS: Yeah, that would be for operations and our architect.  MS. FONOROW: Okay. Because I'm asking why so much of nature has to be destroyed to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a high piece point in Old Tappan and then you have a retaining wall that's all that's protecting the wetlands from overflow, what I don't understand how you can say all right now it's ground.  If you agree, it's ground and trees that are absorbing everything for hundreds of years and now you're going to pave over everything and put up a building and it's going to become impermeable	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape  MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.  I think oh, my other question is, can I ask, and you might not be able to answer this, can I ask why this building has to be so large?  THE WITNESS: Yeah, that would be for operations and our architect.  MS. FONOROW: Okay. Because I'm asking why so much of nature has to be destroyed to accommodate this, that doesn't exist right now?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	THE WITNESS: Essentially only the portion where our development is. Everything to the west of us where the wetlands are and the frontage where that barn is will be either not disturbed or essentially matching the existing grades.  MS. FONOROW: Okay.  Well, would you say if you were a homeowner living right near it and you cared about the wetlands and property and animal habitat, if the building is going to be that high up, because it is a high piece point in Old Tappan and then you have a retaining wall that's all that's protecting the wetlands from overflow, what I don't understand how you can say all right now it's ground.  If you agree, it's ground and trees that are absorbing everything for hundreds of years and now you're going to pave over everything and put up a building and it's going to become impermeable surface and that water how are you going to keep	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	around that? Right now it's big steeping slopes and the trees are roughly five, six stories tall. I'm not good measuring feet.  MS. PRICE: Our landscape MS. FONOROW: Are you going to be oh, that's a landscape question?  MS. PRICE: Our landscape architect is testifying next.  MS. FONOROW: Okay. Then noise probably would be a landscape, having to do that with that.  I think oh, my other question is, can I ask, and you might not be able to answer this, can I ask why this building has to be so large?  THE WITNESS: Yeah, that would be for operations and our architect.  MS. FONOROW: Okay. Because I'm asking why so much of nature has to be destroyed to accommodate this, that doesn't exist right now?  THE WITNESS: I can say we originally

We're going to comply with all of those regardless of what the topic is. If we secure approval, that goes without saying that we're on the hook to comply with every governing piece of legislation.  MR. REGAN: Every applicable rule and
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MS. FONOROW: It's not traffic. It has to do with salting the roads to de-ice them in the winter.  THE WITNESS: You can certainly ask. MS. FONOROW: I mean, I didn't I don't I'm sorry, I don't know  THE WITNESS: Yeah, no, you can ask. MS. FONOROW: Kevin who's one of the plow drivers in River Vale Jewish community, he brought it to our attention too the amount of salt that has to be used all winter long just because of ice because it is an assisted living, you know, senior care facility, but there's a big question that hasn't been even discussed because we don't usually think about it, is where is the snow going to be plowed to to accommodate when we have major snowfalls?  MS. PRICE: Just for the record, we did address it.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	going into how much salt is going to be used to protect to keep the roads safe and what will be done to guarantee that the salt is going to go into the water, the water is going to go into the ground and it could potentially pollute the wetlands. I mean, the wetlands have living creatures in it.  MS. PRICE: Can I just make a statement on this? You know, we're going to comply with all local, county, state, federal laws that we need to comply with. I've been  MR. REGAN: It's a condition of every resolution this board  MS. PRICE: Correct.  We're going to comply with all of those regardless of what the topic is. If we secure approval, that goes without saying that we're on the hook to comply with every governing piece of legislation.  MR. REGAN: Every applicable rule and regulation.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	be more than happy to MS. FONOROW: It's not traffic. It has to do with salting the roads to de-ice them in the winter.  THE WITNESS: You can certainly ask. MS. FONOROW: I mean, I didn't I don't I'm sorry, I don't know THE WITNESS: Yeah, no, you can ask. MS. FONOROW: Kevin who's one of the plow drivers in River Vale Jewish community, he brought it to our attention too the amount of salt that has to be used all winter long just because of ice because it is an assisted living, you know, senior care facility, but there's a big question that hasn't been even discussed because we don't usually think about it, is where is the snow going to be plowed to to accommodate when we have major snowfalls?  MS. PRICE: Just for the record, we did address it.  At the last meeting, I asked Dan on	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	going into how much salt is going to be used to protect to keep the roads safe and what will be done to guarantee that the salt is going to go into the water, the water is going to go into the ground and it could potentially pollute the wetlands. I mean, the wetlands have living creatures in it.  MS. PRICE: Can I just make a statement on this? You know, we're going to comply with all local, county, state, federal laws that we need to comply with. I've been  MR. REGAN: It's a condition of every resolution this board  MS. PRICE: Correct.  We're going to comply with all of those regardless of what the topic is. If we secure approval, that goes without saying that we're on the hook to comply with every governing piece of legislation.  MR. REGAN: Every applicable rule and regulation.  MS. PRICE: Correct, and that's the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MS. FONOROW: It's not traffic. It has to do with salting the roads to de-ice them in the winter.  THE WITNESS: You can certainly ask. MS. FONOROW: I mean, I didn't I don't I'm sorry, I don't know THE WITNESS: Yeah, no, you can ask. MS. FONOROW: Kevin who's one of the plow drivers in River Vale Jewish community, he brought it to our attention too the amount of salt that has to be used all winter long just because of ice because it is an assisted living, you know, senior care facility, but there's a big question that hasn't been even discussed because we don't usually think about it, is where is the snow going to be plowed to to accommodate when we have major snowfalls?  MS. PRICE: Just for the record, we did address it.  At the last meeting, I asked Dan on direct testimony that specific question. So he can	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	going into how much salt is going to be used to protect to keep the roads safe and what will be done to guarantee that the salt is going to go into the water, the water is going to go into the ground and it could potentially pollute the wetlands. I mean, the wetlands have living creatures in it.  MS. PRICE: Can I just make a statement on this? You know, we're going to comply with all local, county, state, federal laws that we need to comply with. I've been  MR. REGAN: It's a condition of every resolution this board  MS. PRICE: Correct.  We're going to comply with all of those regardless of what the topic is. If we secure approval, that goes without saying that we're on the hook to comply with every governing piece of legislation.  MR. REGAN: Every applicable rule and regulation.  MS. PRICE: Correct, and that's the case and we will do so.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MS. FONOROW: It's not traffic. It has to do with salting the roads to de-ice them in the winter.  THE WITNESS: You can certainly ask. MS. FONOROW: I mean, I didn't I don't I'm sorry, I don't know  THE WITNESS: Yeah, no, you can ask. MS. FONOROW: Kevin who's one of the plow drivers in River Vale Jewish community, he brought it to our attention too the amount of salt that has to be used all winter long just because of ice because it is an assisted living, you know, senior care facility, but there's a big question that hasn't been even discussed because we don't usually think about it, is where is the snow going to be plowed to to accommodate when we have major snowfalls?  MS. PRICE: Just for the record, we did address it.  At the last meeting, I asked Dan on direct testimony that specific question. So he can re-answer the question, but we did address snow	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	going into how much salt is going to be used to protect to keep the roads safe and what will be done to guarantee that the salt is going to go into the water, the water is going to go into the ground and it could potentially pollute the wetlands. I mean, the wetlands have living creatures in it.  MS. PRICE: Can I just make a statement on this? You know, we're going to comply with all local, county, state, federal laws that we need to comply with. I've been  MR. REGAN: It's a condition of every resolution this board  MS. PRICE: Correct.  We're going to comply with all of those regardless of what the topic is. If we secure approval, that goes without saying that we're on the hook to comply with every governing piece of legislation.  MR. REGAN: Every applicable rule and regulation.  MS. PRICE: Correct, and that's the case and we will do so.  So anyone asking those questions,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MS. FONOROW: It's not traffic. It has to do with salting the roads to de-ice them in the winter.  THE WITNESS: You can certainly ask. MS. FONOROW: I mean, I didn't I don't I'm sorry, I don't know THE WITNESS: Yeah, no, you can ask. MS. FONOROW: Kevin who's one of the plow drivers in River Vale Jewish community, he brought it to our attention too the amount of salt that has to be used all winter long just because of ice because it is an assisted living, you know, senior care facility, but there's a big question that hasn't been even discussed because we don't usually think about it, is where is the snow going to be plowed to to accommodate when we have major snowfalls?  MS. PRICE: Just for the record, we did address it.  At the last meeting, I asked Dan on direct testimony that specific question. So he can	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	going into how much salt is going to be used to protect to keep the roads safe and what will be done to guarantee that the salt is going to go into the water, the water is going to go into the ground and it could potentially pollute the wetlands. I mean, the wetlands have living creatures in it.  MS. PRICE: Can I just make a statement on this? You know, we're going to comply with all local, county, state, federal laws that we need to comply with. I've been  MR. REGAN: It's a condition of every resolution this board  MS. PRICE: Correct.  We're going to comply with all of those regardless of what the topic is. If we secure approval, that goes without saying that we're on the hook to comply with every governing piece of legislation.  MR. REGAN: Every applicable rule and regulation.  MS. PRICE: Correct, and that's the case and we will do so.

1	or violations that harm other properties and I'll	1	change to pick other distances away from because the
2	make that stipulation tonight. I'll make it again	2	building moved?
3	before the application	3	THE WITNESS: No, the minor shift in
4	MR. REGAN: You don't have to make it,	4	the building does not move it far enough way from
5	you don't have a choice.	5	those locations of the borings to impact it and if
6	MS. PRICE: Right.	6	it's more important for that report for the location
7	MR. REGAN: You know my resolutions.	7	of your test pit for stormwater, because it's
8	MS. PRICE: Right, I know. I'm just	8	actually a requirement for the state, the quantity of
9	trying to make it clear for the record that we will	9	test pits based upon the size and location of your
10	be complying.	10	stormwater management facilities and we're still
11	MS. FONOROW: I appreciate that to try	11	complying with that as well.
12	to alleviate my concerns and fears.	12	MR. SCOZZAFAVA: Okay. Great.
13	MS. PRICE: Correct.	13	MR. SKRABLE: Bob, are you looking at
14	MS. FONOROW: So that's all my	14	the smaller report or the thicker one?
15	questions right now.	15	MR. SCOZZAFAVA: Well, I was looking at
16	Thank you.	16	both of them.
17	MR. SCOZZAFAVA: Mr. Chairman, I have	17	MR. SKRABLE: The thicker one, if you
18	one more question, I'm sorry. I'm looking at the	18	look at Figure 2, that shows where all the borings
19	report that was done by GTA Geo-Technology	19	and test pits were done.
20	Association on March 7th and I just want to make sure	20	MR. SCOZZAFAVA: Right, right, but the
21	everybody hears it and you can answer, I think I know	21	dates are different, so the report that was dated in
22	the answer, but towards the end of the report it says	22	March said any change, you know, potentially could
23	that in the event of any changes in nature, design or	23	invalidate the results and then this report is in
24	location of the facilities, our plan, the conclusions	24	May. The last meeting we didn't really talk about
25	and recommended contained in this report should not	25	moving we talked about what to do with the buffers
	146		148
1	be considered valid unless they're reviewed and so on	1	and the church and then this then shows a four foot,
2	and we recoved the building with the record on May 27th	2	form and a half foot marrament. Thatlatha and
_	and we moved the building with the memo on May 27th,	2	four and a half foot movement. That's the only
3	only moved it 4-and-a-half feet.	3	reason I brought it up.
	only moved it 4-and-a-half feet.  So my question is: Does that movement		reason I brought it up.  MR. SKRABLE: And that report is
3	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that	3	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the
3	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.	3	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the
3 4 5	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the	3 4 5	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.
3 4 5 6 7 8	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just	3 4 5 6 7 8	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's
3 4 5 6 7 8 9	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement	3 4 5 6 7 8 9	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.
3 4 5 6 7 8 9	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per	3 4 5 6 7 8 9	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.
3 4 5 6 7 8 9 10	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to	3 4 5 6 7 8 9 10	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes,
3 4 5 6 7 8 9 10 11	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done	3 4 5 6 7 8 9 10 11	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.
3 4 5 6 7 8 9 10 11 12 13	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.	3 4 5 6 7 8 9 10 11 12 13	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.
3 4 5 6 7 8 9 10 11 12 13 14	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept	3 4 5 6 7 8 9 10 11 12 13 14	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street,
3 4 5 6 7 8 9 10 11 12 13 14 15	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding	3 4 5 6 7 8 9 10 11 12 13 14 15	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street, Closer, New Jersey.
3 4 5 6 7 8 9 10 11 12 13 14 15 16	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they	3 4 5 6 7 8 9 10 11 12 13 14 15 16	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street, Closer, New Jersey.  I am both a history student of The
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show	3 4 5 6 7 8 9 10 11 12 13 14 15 16	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street,  Closer, New Jersey.  I am both a history student of The  University of Edinburgh in Scotland and I'm also on
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show where they're going to put the soil borings, the soil	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again. 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show where they're going to put the soil borings, the soil borings and test the site, which they did and they	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street,  Closer, New Jersey.  I am both a history student of The  University of Edinburgh in Scotland and I'm also on the board of the Closter Nature Center, though I don't represent them today.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show where they're going to put the soil borings, the soil borings and test the site, which they did and they usually do more than what's required and they did	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street,  Closer, New Jersey.  I am both a history student of The  University of Edinburgh in Scotland and I'm also on the board of the Closter Nature Center, though I don't represent them today.  All right. I have a few questions. If
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show where they're going to put the soil borings, the soil borings and test the site, which they did and they usually do more than what's required and they did that in this case to essentially count for shifts in	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street,  Closer, New Jersey.  I am both a history student of The University of Edinburgh in Scotland and I'm also on the board of the Closter Nature Center, though I don't represent them today.  All right. I have a few questions. If you can't answer them, just let me know, I'm sorry.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show where they're going to put the soil borings, the soil borings and test the site, which they did and they usually do more than what's required and they did that in this case to essentially count for shifts in the development.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street,  Closer, New Jersey.  I am both a history student of The  University of Edinburgh in Scotland and I'm also on the board of the Closter Nature Center, though I don't represent them today.  All right. I have a few questions. If you can't answer them, just let me know, I'm sorry.  Did you test the groundwater elevation
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show where they're going to put the soil borings, the soil borings and test the site, which they did and they usually do more than what's required and they did that in this case to essentially count for shifts in the development.  MR. SCOZZAFAVA: I got that part of it,	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	reason I brought it up.  MR. SKRABLE: And that report is intended to show that the basin can handle the infiltration. The larger report is really for the site in general, the foundation and everything else.  MR. SCOZZAFAVA: All right. That's what I wanted to ask.  THE WITNESS: It's a great question.  CHAIRMAN WEIDMANN: Anyone else? Yes, ma'am, in the back.  MS. COSTA: Hello again.  Francesca Costa, 82 Everett Street,  Closer, New Jersey.  I am both a history student of The  University of Edinburgh in Scotland and I'm also on the board of the Closter Nature Center, though I don't represent them today.  All right. I have a few questions. If you can't answer them, just let me know, I'm sorry.  Did you test the groundwater elevation under the site?
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	only moved it 4-and-a-half feet.  So my question is: Does that movement of such a small distance take the prior pits that were dug and maybe invalidate the results.  THE WITNESS: I did not prepare the report, our geotechnical engineer did, but just understanding geotechnical reports and requirement for borings and test pits, there is a requirement per the building code of how many borings you need to take for a building and these reports were done before we even have a set layout.  We give them a concept and the concept is generally that the layout that we're proceeding with in this application and they take that and they essentially use that concept to delineate and show where they're going to put the soil borings, the soil borings and test the site, which they did and they usually do more than what's required and they did that in this case to essentially count for shifts in the development.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	reason I brought it up. I have a few questions. If you can't answer them, just let me know, I'm sorry.  Did you test the groundwater elevation

	149		151
1	THE WITNESS: Yes, that was the report	1	If the property is moved, are you aware
2		2	that it would lose its federal and state recognition.
3	MS. COSTA: Okay, cool.	3	THE WITNESS: Again, I don't think I'm
4	Light pollution, have you looked into	4	the right person to answer that question.
5	Dark-Sky technology to diminish your impact on	5	MS. COSTA: Okay. I don't know if
6	threatened insect populations, like fireflies and	6	you're the right person to ask this, but are you
7	other threatened species like that?	7	dedicated to recertifying it under the eyes both
8	THE WITNESS: Not directly in those	8	governments?
9	species, but we are Dark-Sky compliant lighting	9	THE WITNESS: Again, I would defer
10	fixtures.	10	that.
11	MS. COSTA: Okay.	11	MS. COSTA: Okay, that's it.
12	Would you look into more, you know,	12	Thank you.
13	thorough things to help support the population right	13	CHAIRMAN WEIDMANN: Yes, ma'am.
14	next to you.	14	MS. KING: Hi, Wendy King, 48 Dearborn
15	THE WITNESS: Honestly, I'm not sure	15	Drive, Old Tappan.
16	how to answer that question.	16	MS. HAVERILLA: You need to speak up.
17	MS. COSTA: I'm sorry.	17	MS. KING: Wendy King, 48 Dearborn
18	THE WITNESS: We're providing Dark-Sky	18	Drive, Old Tappan.
19	compliant lighting fixtures.	19	And I was just wondering on the Rutgers
20	I've honestly never been asked that	20	website they are stating many of the advantages of
21	question before. It's a great question, but they are	21	trees, which most of us know and one of the big
22	Dark-Sky compliant, so my thought is they would	22	things is that it helps with soil erosion and storm
23	comply with that just because the name of the	23	runoff and they state that it can take 10 to 15 years
24	fixture.	24	for a tree to mature in size in order for it to start
25	MS. COSTA: Okay. I'm just keeping my	25	growing that protection and there's been a lot of
	150		152
1	head out for the little bugs.	1	studies lately where deep root trees are essential to
2	Are you aware that indigenous plant	2	prevent all of this storm runoff and drainage, so
3	roots go down very much further than turf grass does?	3	just planting these light trees and grass kind of
4	THE WITNESS: I'm not maybe our	4	gets in the way.
5	landscape architect	5	So is there a way to preserve some of
6	MS. COSTA: Okay, cool, I'll ask him.	6	the mature trees? Why do we have to clearcut it?
7	I think that's it.	7	Why can't we build around and keep mature trees and,
8	Thank you.	8	again, one of their concerns too is when there's
9	THE WITNESS: Thank you.	9	construction that you damage the tree roots, which go
10	MS. COSTA: Oh, I'm sorry, I'm sorry.	10	much further than trees and that it might take
11	While this property is being built, what	11	several years even to see that damage and so trees
12	archeological surveying are you committed to	12	that are even off your property because of the root
13	performing?	13	systems might start falling and getting damaged just
14	THE WITNESS: My understanding is we're	14	from the construction on the site.
15	not required to perform any surveying.	15	So is there a way for you to protect
16	MS. COSTA: But would you, because this	16	the trees that are on your site and to prevent root
17	property goes back way over 300 years?	17	damage to trees that are not on your site.
18	THE WITNESS: We have no intention to	18	THE WITNESS: Yeah, I mean, all the
19	currently, but we do have an historical expert.	19	trees that we're protecting we need to comply with
20	When they testify, I'm sure they can	20	tree protection fencing associated with, again, the
21	give you some info.	21	soil conversation district and we are protecting the
22	MS. COSTA: Okay.	22	trees that we're keeping, but, you know, there will
23	I don't know if this is who directly to	23	be a loss of some trees with this development and our
0.4			
24 25	ask this, but are you aware that this property might have oh, I'm sorry, ba, ba, ba.	24 25	landscape architect is prepared to talk about the quantity of trees and our new trees that we will be

	153		155
1	planting.	1	I just want to follow up on a question
2	MS. KING: Yeah, because if you can	2	earlier asked of the architect about garbage and I
3	keep more trees, then you solve some of these runoff	3	see that you have a garbage in the top right, is that
4	and the drainage and all sorts of things rather than	4	right?
5	just having sod and lawn, but that's not your	5	THE WITNESS: Yeah.
6	that's not I mean, to me that kind of goes hand in	6	MR. CARPENTER: Connected to the new
7	hand with the drainage.	7	fire
8	MS. PRICE: Our landscape architect	8	THE WITNESS: Correct, the northeastern
9	will be talking as to the trees.	9	corner of our parking area.
10	MS. KING: Along with how it affects	10	MR. CARPENTER: So the question I have
11	the drainage?	11	is I always have been fascinated with garbage all
12	MS. PRICE: Well, along with the	12	my life.
13	questions that you just postured, he'll be the right	13	(Laughter.)
14	expert to answer your questions.	14	MR. CARPENTER: Honestly.
15	MS. KING: Okay. Thank you.	15	A place like this is going to generate
16	CHAIRMAN WEIDMANN: Next one.	16	a lot of garbage from just household use, as well as
17	MR. CARPENTER: Hi, I'm Kurt Carpenter,	17	medical use, medical waste. Is what you have is
18	168 Central Avenue in Old Tappan.	18	very, very small. Is it going to be sufficient to
19	I have a couple of just random	19	THE WITNESS: Yeah, absolutely.
20	questions that struck me when you were talking about	20	MR. CARPENTER: to have that and
21	some of the changes you talked about.	21	THE WITNESS: It's a 10-by-20 trash
22	You talked about the movement of the	22	enclosure. It generally holds two eight-cubic-yard
23	generator, now it's going to be the hybrid. It's	23	dumpsters, which are pretty large and operations
24	going to be closer to the building.	24	testified earlier basically saying that, you know,
25	THE WITNESS: Correct.	25	it's usually once, possibly twice a week the garbage
	154		156
1	MR. CARPENTER: Can you tell me, like	1	truck comes, picks it up.
2	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's	2	truck comes, picks it up.  MR. CARPENTER: So that's based on some
2	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the	2	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility
2 3 4	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living	2 3 4	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?
2 3 4 5	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and	2 3 4 5	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees
2 3 4 5 6	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.	2 3 4 5 6	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that
2 3 4 5 6 7	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what	2 3 4 5 6 7	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste,
2 3 4 5 6 7 8	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live	2 3 4 5 6 7 8	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.
2 3 4 5 6 7 8 9	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?	2 3 4 5 6 7 8 9	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of
2 3 4 5 6 7 8 9	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question.	2 3 4 5 6 7 8 9	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the
2 3 4 5 6 7 8 9 10	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question.  Yeah, no, we specifically placed it there, because	2 3 4 5 6 7 8 9 10	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a
2 3 4 5 6 7 8 9 10 11	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question. Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the	2 3 4 5 6 7 8 9 10 11	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.
2 3 4 5 6 7 8 9 10 11 12 13	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question. Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the site.	2 3 4 5 6 7 8 9 10 11 12 13	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.  MR. CARPENTER: Cool.
2 3 4 5 6 7 8 9 10 11 12 13	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question.  Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the site.  MR. CARPENTER: So it should be kind of	2 3 4 5 6 7 8 9 10 11 12 13 14	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.  MR. CARPENTER: Cool.  And as far as the medical waste, is
2 3 4 5 6 7 8 9 10 11 12 13 14 15	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question.  Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the site.  MR. CARPENTER: So it should be kind of quiet?	2 3 4 5 6 7 8 9 10 11 12 13 14 15	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.  MR. CARPENTER: Cool.  And as far as the medical waste, is there a special way you have to handle that in bags
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question. Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the site.  MR. CARPENTER: So it should be kind of quiet?  THE WITNESS: Exactly, yup.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.  MR. CARPENTER: Cool.  And as far as the medical waste, is there a special way you have to handle that in bags next to that? Is it secured so that, I don't know,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question. Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the site.  MR. CARPENTER: So it should be kind of quiet?  THE WITNESS: Exactly, yup. Again, we'll make sure that it's a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.  MR. CARPENTER: Cool.  And as far as the medical waste, is there a special way you have to handle that in bags next to that? Is it secured so that, I don't know, animals can't get into it, kids doing bad stuff
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question. Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the site.  MR. CARPENTER: So it should be kind of quiet?  THE WITNESS: Exactly, yup.  Again, we'll make sure that it's a noise sound-attenuating enclosure. It's only used in	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	truck comes, picks it up.  MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.  MR. CARPENTER: Cool.  And as far as the medical waste, is there a special way you have to handle that in bags next to that? Is it secured so that, I don't know, animals can't get into it, kids doing bad stuff looking for needles, I don't know.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MR. CARPENTER: Can you tell me, like I'm trying to remember from the architect, what's going to be above, is going to be next to it, so the back of the building, is anybody going to be living sort of near that and  THE WITNESS: No.  MR. CARPENTER: You know, like what would the impact to, you know, Sue and Bob who live on the second floor or whatever?  THE WITNESS: It's a great question. Yeah, no, we specifically placed it there, because that's the back-of-house operations portion of the site.  MR. CARPENTER: So it should be kind of quiet?  THE WITNESS: Exactly, yup.  Again, we'll make sure that it's a noise sound-attenuating enclosure. It's only used in emergency situations. So, you know, keeping in mind	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MR. CARPENTER: So that's based on some sort of industry calculation of how much a facility like this would generate?  THE WITNESS: So if an operation sees that  MR. CARPENTER: There's food waste, there's household waste.  THE WITNESS: Yeah, essentially all of that, but operations keeps an eye on it. If the dumpsters get filled more frequently, they'll have a truck come frequently.  MR. CARPENTER: Cool.  And as far as the medical waste, is there a special way you have to handle that in bags next to that? Is it secured so that, I don't know, animals can't get into it, kids doing bad stuff looking for needles, I don't know.  THE WITNESS: I'm not sure of the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MR. 	157		159
1	fire team has asked about sort of access and you	1	from the fire, could still make all those turns and
2	talked about you utilized a long truck, the ladder	2	we confirmed that.
3	truck.	3	MR. ALESSI: Can I just interject?
4	THE WITNESS: Yeah.	4	MR. CARPENTER: I would love to see
5	MR. CARPENTER: I live next to the high	5	that.
6	school. They're over there practicing with the big	6	MR. ALESSI: That's why we have 14-inch
7	trucks and those things are really long. I just have	7	bumpers.
8	a hard time practically looking at sort of the angles	8	(Laughter.)
9	and whatnot of how that long ladder needs to report	9	MR. CARPENTER: Okay.
10	here for a fire, is going to be able to actually get	10	As long as the fire department is happy
11	in, navigate around the curb and then specifically	11	with the thing. I just I'm literally I can't
12	navigate around the building. It feels as if like	12	imagine seeing the thing turn that quickly,
13	the turning like the top left corner is going to	13	especially there's grass cutouts on the corners, top
14	be and the well, all the ones really are going	14	left, top right. I mean, I guess they can go over
15	to be really super duper hard for that long ladder to	15	the grass, I suppose, but even so all right,
16	get around there going at the 40-degree turn radius,	16	that's it.
17	you said, and then would that presuppose no vehicles	17	Thank you very much.
18	from the staff or visitors or guests, whatever, a	18	CHAIRMAN WEIDMANN: Anyone else wish to
19	resident to actually being parked there and if so,	19	be heard?
20	how would the truck do that?	20	Yes, sir.
21	THE WITNESS: I guess you haven't seen	21	FATHER JACOBS: Thank you,
22	Mr. Alessi drive a fire truck.	22	Mr. Chairman. Again, Fr. Jerry from the church.
23	MR. CARPENTER: Well, I know he's good,	23	I have questions regarding the
24	but I mean	24	variance. I think you mentioned I know you went
25	(Laughter.)	25	in 4 feet.
	158		160
1	MR. ELLER: He clearly hasn't.	1	Can you explain what is actually how
2	(Laughter.)	2	much of a distance do you need by law.
3	MR. CARPENTER: I think making that big	3	THE WITNESS: Well, the code requires
4	truck go around those hard corners like that	4	12-and-a-half percent of the lot width, which equates
5	THE WITNESS: It's a great question.	5	to about 61 feet.
6	MR. ALESSI: I can back it into your	6	FATHER JACOB: So it requires to be
7	driveway without hitting a branch.	7	61 feet, but you're asking for how much now, to be
8	(Laughter.)	8	how close?
9	THE WITNESS: It's a great question and	9	THE WITNESS: 20.1.
10	that's why we prepared our vehicle movement plan.	10	FATHER JACOB: That's still pretty
11	Yes, it's computer animated. I'm sure Mr. Alessi can	11	close. Do have you a retaining wall around the
12	probably drive a truck better.	12	property? You're putting in fencing or something?
13	MR. CARPENTER: So to add to the	13	THE WITNESS: Yeah, a retaining wall,
14	question, assuming all the spots are filled at the	14	as well as a fence and the retaining wall, I think,
15	time of the emergency, the fire department is like	15	is retaining the retaining wall of the church.
16	totally cool and reviewed everything and said, yup,	16	FATHER JACOB: I'm sorry, say that
17	we feel confident we can navigate safely to respond	17	again?
18	quickly?	18	THE WITNESS: It's just retaining the
19	THE WITNESS: When we design our site	19	retaining wall of the church.
20	and our layout and the radiuses, we run that truck to	20	FATHER JACOB: Retaining the retaining
21	make sure that it's not crossing over parking spaces,	21	wall of the church. So we have a wall there that's
22	it's not going over curbs, it's not crossing onto the	22	like that only goes halfway, so do you
23	other side of the drive aisle for that exact reason.	23	THE WITNESS: Yeah, there's a wall in
24	So if there are cars parked in the parking lot and	24	the front, portion of the wall in the back and we're
25	there is a car, you know, exiting, trying to get away	25	just essentially meeting the grade at the top of that
06/15	7/2022 05:41:55 PM Page 157	to 160	of 225 40 of 76 sheet

404	100
161	163
1 retaining wall. If your retaining wall wasn't there, 1 That's the first time I heard that.	
2 we wouldn't need one either. 2 FATHER JACOBS I'm just it didn't	
3 FATHER JACOBS: So you're going to fill 3 make sense to me how it worked out, but	
4 it? Are you going to  4 THE WITNESS: Yeah, I'd be more the state of the state	ıan
5 THE WITNESS: No, existing grade, same 5 happy to illustrate that for you.	
6 elevation. 6 FATHER JACOB: Okay.	
7 FATHER JACOBS: Same elevation. 7 I know the stormwater everybody	
8 THE WITNESS: The same elevation. 8 brought up the stormwater. I'm not going to bring	
9 FATHER JACOBS: So now talking about 9 up anymore. I had issues with the storm just two	
10 elevation, we know that well, everybody here has 10 days ago, the water flooded in the back of our	
11 seen the church, you see Bi-State, we're all at	
12 almost the same height level. 12 CHAIRMAN WEIDMANN: Anyone els	e?
I know the property at 244 is slightly  13 Yes, ma'am.	
14 on the higher side, we can see that, because we're MS. CHO: Hi, Jane Cho, 16 Lakevie	N
15 looking up at it. This new infrastructure that's 15 Drive, Old Tappan.	
16 going be to there, are we going to be looking up?  16 MS. HAVERILLA: Louder.	
17 Like, is it going to be that high? Is MS. CHO: Jane Cho, 16 Lakeview D	rive,
18 there going to be a big height difference from the 18 Old Tappan.	
19 height, the peak point of the church to the peak  19 Hi. I am curious, I heard you talk a	
20 point of your new building? 20 day today and you're talking about the volume of	the
21 THE WITNESS: I can't give you the 21 drainage water that's going into Lakeview.	
22 exact elevation of the peak of the church or the peak 22 Is there right now at the current site	)
23 of our building, but just from knowing our plan and 23 over 200 trees on that site?	
24 knowing your church, the my thought is our 24 THE WITNESS: I'm not sure. The	
25building will be lower than the peak of the church.25landscape architect may know.	
162	164
1 The elevation of our finished floor is generally the 1 MS. CHO: Okay. There's a lot of tree	
2 same as the elevation of finished floor of the 2 on that site that you're going to be knocking down	
3 church. If you look at the front of your site, the 3 Can you tell me how much water absorption of ago	∍d
4 church is on the low side of the wall coming up in 4 trees actually absorb, because if I could just kind	
5 the site. Our building will also be on the low side 5 of do the simple math like we kind of all know, is	
6 of the wall when you're looking at it. 6 the fact that if an inch of waterfall and the trees	
7 FATHER JACOBS: So my question then is 7 suck it up, there's no water going into the drainag	е
8 if I'm standing on the street front, are you saying 8 system, right?	
9 that this new three-story building will be lower than 9 Am I correct?	
10 ours? THE WITNESS: I'm not sure, I'm not	t a
11 THE WITNESS: I'm not saying that for 11 trees expert.	
12 sure, but I'm just saying based on our elevation, our 12 MS. CHO: You don't know okay,	
13 building and the approximate height just looking at 13 you don't know that the tree will be absorbing son	
14 the front of the site, my assumption is that it will 14 water, because that's how trees grow? Aged trees	·,
15 be close in elevation to the top of the building. 15 little trees, baby trees, big trees, they absorb	
16 MR. ELLER: You're going to give us an 16 water.	
17 elevation rendering at the next meeting, correct? 17 So I don't understand how you can	
18 THE WITNESS: Yeah, absolutely.  18 mathematically tell me that when you remove mo	
19 MR. ELLER: From the street to the top 200 trees on that site, that you're going to have the	
20 of your building, which you'd be able to cross 20 same amount of water going into the drainage sys	tem
21 reference from the street level, that's the common   21 that's going to be feeding into Lakeview.	
22 denominator. 22 THE WITNESS: Have you been to a	
22denominator.22THE WITNESS: Have you been to a23FATHER JACOB: Yeah.23MS. CHO: I've been to many beach	es.
22 denominator. 22 THE WITNESS: Have you been to a	es. dump

	165		167
1	MS. CHO: The water goes into the sand	1	was authorized by this woman by the board to hire,
2	and goes into the beach. I don't want it going into	2	there's Mr. Steinhagen should be asking the
3	my basement. I don't have my house on the beach,	3	questions.
4	sorry.	4	MR. REGAN: I really don't want to
5	THE WITNESS: So to continue, our basin	5	address that.
6	will have a sand bottom, same thing, water goes to	6	MS. PRICE: I know. I
7	that bottom of that basin and infiltrates back into	7	MR. REGAN: Let her ask the question.
8	the ground.	8	MS. PRICE: She can ask, but I'm noting
9	So opposite, yes, maybe trees absorb an	9	just like Mr. Steinhagen
10	inch of water as you stated, as all the other members	10	MS. CHO: I'm here as Jane Cho.
11	of the public said, they stated with the trees, but	11	MS. PRICE: No, no, no, just for the
12	we are we analyze that, we determine how much	12	record, I'm noting it for the record, so it can
13	water leaves the site under existing conditions based	13	MR. STEINHAGEN: And for the record, I
14	on stormwater requirements in the state and, again,	14	don't represent Ms. Cho.
15	we propose our basin to make sure that we're not	15	Ms. Cho is a property owner in Old
16	exceeding what's leaving the site under existing	16	Tappan.
17	conditions, so, again, it's less.	17	MR. REGAN: You represent the
18	MS. CHO: When you keep saying "less,"	18	association.
19	are you negating the fact that there is trees that's	19	THE WITNESS: What was your question?
20	200 there's old trees there that it's not picking	20	(Laughter.)
21	up any water?	21	MS. CHO: How do you calculate? What
22	THE WITNESS: No, I'm acknowledging	22	system do you use to calculate?
23	that.	23	THE WITNESS: Absolutely.
24	MS. CHO: How do you acknowledge that	24	We start by this was in my testimony
25	it's going to take up the water and then when you	25	from our second hearing. We start by analyzing
	166		168
1	remove those trees, the water is not going to be	1	existing conditions, by establishing a drainage area
2	picked up by those trees?	2	map. We look at the topography of the site,
2	picked up by those trees?  THE WITNESS: Complying with the	2	map. We look at the topography of the site, determine where the water goes, what direction under
2 3 4	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state	2 3 4	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.
2 3 4 5	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.	2 3 4 5	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis,
2 3 4 5 6	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I	2 3 4 5 6	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the
2 3 4 5 6 7	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and	2 3 4 5 6 7	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the
2 3 4 5 6 7 8	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.	2 3 4 5 6 7 8	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.
2 3 4 5 6 7 8 9	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified	2 3 4 5 6 7 8 9	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that
2 3 4 5 6 7 8 9	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering	2 3 4 5 6 7 8 9	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on
2 3 4 5 6 7 8 9 10	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.	2 3 4 5 6 7 8 9 10	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine
2 3 4 5 6 7 8 9 10 11	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account	2 3 4 5 6 7 8 9 10 11	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's
2 3 4 5 6 7 8 9 10 11 12 13	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account the trees under existing conditions.	2 3 4 5 6 7 8 9 10	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's capabilities of infiltrating back into the ground and
2 3 4 5 6 7 8 9 10 11 12 13	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account the trees under existing conditions.  MS. CHO: How do you calculate the	2 3 4 5 6 7 8 9 10 11 12 13	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's capabilities of infiltrating back into the ground and we look at ground cover quality. So ground cover
2 3 4 5 6 7 8 9 10 11 12 13	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account the trees under existing conditions.  MS. CHO: How do you calculate the existing conditions?	2 3 4 5 6 7 8 9 10 11 12 13 14	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's capabilities of infiltrating back into the ground and we look at ground cover quality. So ground cover being wooded open space, impervious surface.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account the trees under existing conditions.  MS. CHO: How do you calculate the existing conditions?  THE WITNESS: That's a great question	2 3 4 5 6 7 8 9 10 11 12 13 14 15	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's capabilities of infiltrating back into the ground and we look at ground cover quality. So ground cover being wooded open space, impervious surface.  There's different numbers, factors that
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account the trees under existing conditions.  MS. CHO: How do you calculate the existing conditions?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's capabilities of infiltrating back into the ground and we look at ground cover quality. So ground cover being wooded open space, impervious surface.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account the trees under existing conditions.  MS. CHO: How do you calculate the existing conditions?  THE WITNESS: That's a great question from your attorney.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's capabilities of infiltrating back into the ground and we look at ground cover quality. So ground cover being wooded open space, impervious surface.  There's different numbers, factors that go into that. So based on those coverages, you
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. CHO: That wasn't my question. I know it's your job to comply with all the rules and regulations.  MS. PRICE: I think that he's testified that what he's complying with are those engineering requirements.  THE WITNESS: Which takes in account the trees under existing conditions.  MS. CHO: How do you calculate the existing conditions?  THE WITNESS: That's a great question from your attorney.  MS. CHO: Yes, that's why we hired him.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	map. We look at the topography of the site, determine where the water goes, what direction under existing conditions.  We establish our points of analysis, points of analysis one and two, northeast of the site, southwest of the site. Then we look at the soil characteristics, the soil pipe.  So there's hydraulic soil groups that are associated with each type of soil that we look on the site, we determine soil quantities. We determine how much water that soil has or that soil's capabilities of infiltrating back into the ground and we look at ground cover quality. So ground cover being wooded open space, impervious surface.  There's different numbers, factors that go into that. So based on those coverages, you determine, calculate how much water is leaving the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	picked up by those trees?  THE WITNESS: Complying with the stormwater management requirements in both the state and local.  MS. Would you be considering	2 3 4 5 6 7 8 9 10 11 12 13 14	The application before the board is what's in the application package that's pending tonight.  MS. CHO: So then to my recollection, you had talked about the parking spots that you're making more than what was required.  Can you reduce it?  MS. PRICE: We have 46 required and we have 42 required and 46 shown and that's inclusive of our EV spaces. We were asked at the last meeting if we would consider a couple of more EV and which we've done, which is a recent requirement under the New Jersey state law, but it's not like we have 25 extra parking spaces, 42 to the 46, so I'm not sure if you analyzed that. It's not going to make a huge
2 3 4 5 6 7 8 9 10 11 12 13 14	up. It doesn't go all the way down.  You had mentioned also previously today that you had a second-story design before and you were nice enough to make it a three-story to reduce the imperviousness of the ground.  Can you then further reduce the impervious of the ground and go one floor, basement, two floor, basement?  THE WITNESS: Not a question for me.  MS. CHO: There is also a process of you guys having a system, you know, collecting the water at the bottom. I think that kind of referred to the tank before or, you know, the other retention systems that you have. Would you be considering these things in the next, I guess, time that you come	2 3 4 5 6 7 8 9 10 11 12 13 14 15	The application before the board is what's in the application package that's pending tonight.  MS. CHO: So then to my recollection, you had talked about the parking spots that you're making more than what was required.  Can you reduce it?  MS. PRICE: We have 46 required and we have 42 required and 46 shown and that's inclusive of our EV spaces. ALESSI: I have a college degree.  Do you happen to know how many trees were taken out for the church property and how many they replaced?  THE WITNESS: I do not.  MR. ALESSI: Do you happen to know if they have a retention pond that like you guys are proposing where it's going to transmit less water	2 3 4 5 6 7 8 9 10 11 12 13 14 15	exceed those things, exceed those minimum standards further.  THE WITNESS: So, just for example, the 100-year storm event, we're only required to reduce the existing 100-year storm event to 20 percent of the existing flow.  So whatever the existing flow is, we have to be 20 percent less than that. We're proposing 40. So we're doubling it.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Anyone else wish to be heard?  (No response.)  CHAIRMAN WEIDMANN: Seeing none, motion
3 4 5 6 7 8 9 10 11 12 13 14 15 16	MS. CHO: I see. Okay, thank you.  MR. ALESSI: I believe the word you were looking for before was evapotranspiration where the water is sucked up through the ground from the trees up to the sky.  (Laughter.)  MR. ALESSI: I have a college degree.  Do you happen to know how many trees were taken out for the church property and how many they replaced?  THE WITNESS: I do not.  MR. ALESSI: Do you happen to know if they have a retention pond that like you guys are proposing where it's going to transmit less water into the system?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	exceed those things, exceed those minimum standards further.  THE WITNESS: So, just for example, the 100-year storm event, we're only required to reduce the existing 100-year storm event to 20 percent of the existing flow.  So whatever the existing flow is, we have to be 20 percent less than that. We're proposing 40. So we're doubling it.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Anyone else wish to be heard?  (No response.)  CHAIRMAN WEIDMANN: Seeing none, motion to close?
3 4 5 6 7 8 9 10 11 12 13 14 15 16	MS. CHO: I see. Okay, thank you.  MR. ALESSI: I believe the word you were looking for before was evapotranspiration where the water is sucked up through the ground from the trees up to the sky.  (Laughter.)  MR. ALESSI: I have a college degree.  Do you happen to know how many trees were taken out for the church property and how many they replaced?  THE WITNESS: I do not.  MR. ALESSI: Do you happen to know if they have a retention pond that like you guys are proposing where it's going to transmit less water into the system?  THE WITNESS: Yeah, they were required	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	exceed those things, exceed those minimum standards further.  THE WITNESS: So, just for example, the 100-year storm event, we're only required to reduce the existing 100-year storm event to 20 percent of the existing flow.  So whatever the existing flow is, we have to be 20 percent less than that. We're proposing 40. So we're doubling it.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Anyone else wish to be heard?  (No response.)  CHAIRMAN WEIDMANN: Seeing none, motion to close?  MR. ALESSI: Motion to close.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	MS. CHO: I see. Okay, thank you.  MR. ALESSI: I believe the word you  were looking for before was evapotranspiration where the water is sucked up through the ground from the trees up to the sky.  (Laughter.)  MR. ALESSI: I have a college degree.  Do you happen to know how many trees  were taken out for the church property and how many they replaced?  THE WITNESS: I do not.  MR. ALESSI: Do you happen to know if they have a retention pond that like you guys are proposing where it's going to transmit less water into the system?  THE WITNESS: Yeah, they were required to as a condition of that easement.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	exceed those things, exceed those minimum standards further.  THE WITNESS: So, just for example, the 100-year storm event, we're only required to reduce the existing 100-year storm event to 20 percent of the existing flow.  So whatever the existing flow is, we have to be 20 percent less than that. We're proposing 40. So we're doubling it.  MR. ELLER: Thank you.  CHAIRMAN WEIDMANN: Anyone else wish to be heard?  (No response.)  CHAIRMAN WEIDMANN: Seeing none, motion to close?  MR. ALESSI: Motion to close.  MR. ELLER: Second.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MS. CHO: I see. Okay, thank you.  MR. 8	_	erty with a house of worship and/or a	8	Bob.	
9	five-lot subdi		9		MR. REGAN: Okay.
10		Is that correct?	10		MS. PRICE: And I have copies of these,
11	Α.	That's correct.	11	so but just fo	or ease of time right now.
12	Q.	In conjunction with that, did you	12	BY MS. PRIC	_
13		bits depicting the house of worship and	13	Q.	Just go to the house of worship plan
14	the five-lot s		14	first, Dan.	sust go to the house of worship plan
15	<b>A.</b>	That's correct.	15	moe, bam	MR. SCOZZAFAVA: Do you have it for the
16	Q.	Let me show you those documents and ask	16	TV?	Mix. SCOZZALAVA. Do you have it for the
17		your if these are your plans?	17	1 <b>V</b> :	WOMAN VOICE: I don't think I do, I'm
18	<b>A.</b>	I have them as exhibits as well.	18	sorry.	WOMAN VOICE. I don't think I do, I m
19	Q.	Good, okay. So can I show it to you	19	BY MR. PRIC	Ε.
20	though?	Good, okay. So can I show it to you	20	Q.	I just I want you just testified
21	A.	Absolutely.	21		hed floor on our proposed use is 98,
22	Q.	This is the house of worship plan?	22	correct?	ned floor on our proposed use is 50,
23	<b>д</b> . А.	Yes, ma'am.	23	<b>A.</b>	That's correct and actually just
24	Α.	MS. PRICE: If I can have that	24		ny grading plan, it's the church next door
25		MR. REGAN: A-20.	25		her than 98.
23		178	23	is likely liig	180
1		THE WITNESS: I think it was previously	1	Q.	Correct, that's what I want to ask you.
2	marked.	THE WITNESS. I think it was previously	2		nished floor shown at on the exhibit
3	markea.	MS. PRICE: I don't know if it was	3		se of worship for the church?
4	previously	if we marked it or not.	4	A.	The outside elevation around the
5	previously	MR. REGAN: I don't recall if we marked	5		of the church is 99.15 and the finished
6	it.		6		ion of the church is 102, so it's 4 feet
7		MS. PRICE: I don't think we did.	7	higher.	,
8		MR. REGAN: I'm looking at my notes. I	8	Q.	Okay.
9	don't see it.	,	9	A.	And it does not have the height
10		MS. PRICE: I don't think we did. I	10	surveyed.	-
11	think I asked	you about it.	11	Q.	But the finished floor is 4 feet higher
12		MR. REGAN: We'll call it A-20 then,	12	than our pro	posed finished floor?
13	the house of	worship plan.	13	Α.	That's correct.
14		MS. PRICE: Yup.	14		MR. SCOZZAFAVA: Is that the existing
15		(Whereupon, House of Worship Plan,	15	church?	
16	dated 2,	/28/22 is received and marked as	16		THE WITNESS: Yes.
17	Exhibit /	A-20 for identification.)	17		MS. PRICE: Yup, that's the existing
18		MR. REGAN: Prepared by?	18	church.	
19		MS. PRICE: Dynamic.	19	BY MS. PRIC	E:
20		MR. REGAN: The witness?	20	Q.	And if you look at the common boundary
21		MS. PRICE: Yup.	21		our property and the church, what
22		MR. REGAN: Is there a date on it?	22		e church from the common boundary line
23		MS. PRICE: 2/28/22.	23	from the side	e yard from the church structure?
24		MR. REGAN: Okay.	24	A.	So there is a small strip of
25		MS. PRICE: And let's just do it at the	25	landscaping	with an associated retaining wall.

11

Α. Yes, absolutely, fully permitted.

Q.

Fully permitted, okay.

16 And going to the residential layout,

17 same questions. The last witness [sic], I think it

18 was the last witness, was pointing your direction at

19 an 8,000 square foot maximum use on this property.

20 MR. REGAN: You meant the last

21 question?

14

15

22 MS. PRICE: The last -- not the last

23 witness, the last question.

24 BY MS. PRICE:

25 Q. Was saying 8,000 square feet. This 14 for road widening purposes, it's not to our benefit

15 that area, that building -- that coverage deviation

would be further reduced, correct? 16

> Α. That's correct.

18 Q. And you can do that calculation and

19 have that for the next meeting?

> A. I can.

21 Q. And am I correct that the deviation

22 would be reduced?

> Α. It would be reduced.

24 I'm not sure if we would be below the

25 variance limit, but it would be reduced.

17

20

23

	185		187
1	<b>Q.</b> But it would be further reduced?	1	MR. SKRABLE: Okay.
2	A. Yes.	2	MR. SCOZZAFAVA: I did have a question
3	Q. And have nothing to do with our	3	on the as-is church as well.
4	project?	4	When you were going through the side
5	A. Correct.	5	section of the church to the edge of the property, I
6	Q. It could very well also be required for	6	think you came up with 40-something feet before it
7	either one of these conforming uses?	7	hits the actual building of the church, right.
8	A. Yes.	8	THE WITNESS: From our side lot line to
9	<b>Q.</b> And the questions that have been posed,	9	the building, to the face of the church, yes.
10	the concerns on the drainage and concerns on the	10	MR. SCOZZAFAVA: And I know you're
11	trees and the utilization of the property, in your	11	encroaching on the variance when you go to your
12	opinion as a civil engineer and based upon the years	12	building that you're proposing, but you're saying
13	that you've been doing this and this particular plan,	13	that that's 21 feet.
14	are those questions specific to this particular use	14	So does that if I do the
15	or are they specific to the property?	15	calculation, that means the church, physical church
16	A. Specific to the property.	16	noise buffer is 60 feet, 61 feet or so.
17	<b>Q.</b> In other words, is our use, our	17	So it's not like it's right next to the
18	hundred-bed, 83-unit generating those questions or is	18	21 feet. It's dramatically wider.
19	development in general of this site the issue?	19	THE WITNESS: And just to make sure
20	A. Yeah, now I understand.	20	we're clear, our building isn't set back 21 feet.
21	No, absolutely any type of developmen	21	Our buffer width is only 21 feet. So our green strip
22	would need to comply with the same requirements.	22	at its narrowest point, it's 21 feet.
23	So it's not our use, it's the	23	Our building, itself, is set back from
24	development in general.	24	that side property line 66.7 feet.
25	MS. PRICE: Thank you. That's all I	25	MR. SCOZZAFAVA: Oh.
	186		188
1	have on redirect.	1	MR. SKRABLE: And I'm sure everybody is
_		_	familian with it but it a the above of flat drive
2	MR. ARDITO: Can you open to the public	2	familiar with it, but it's the church flat drive
3	again please?	3	aisle, almost a 10-foot wall, then we're going back
3 4	again please?  MS. PRICE: I have the opportunity to	3 4	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.
3 4 5	again please?  MS. PRICE: I have the opportunity to redirect.	3 4 5	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation. So there's 10 foot of wall, soil, going
3 4 5 6	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that	3 4 5 6	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation. So there's 10 foot of wall, soil, going to be landscaping presumably in between.
3 4 5 6 7	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I	3 4 5 6 7	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.
3 4 5 6 7 8	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.	3 4 5 6 7 8	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some
3 4 5 6 7 8 9	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. SKRABLE: Mr. Chairman, I just have	3 4 5 6 7 8 9	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some questions about this new exhibit.
3 4 5 6 7 8 9	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. SKRABLE: Mr. Chairman, I just have one follow-up question, also.	3 4 5 6 7 8 9	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some questions about this new exhibit.  CHAIRMAN WEIDMANN: Come forward.
3 4 5 6 7 8 9 10	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. SKRABLE: Mr. Chairman, I just have one follow-up question, also.  MS. PRICE: That's fine, but under	3 4 5 6 7 8 9 10	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some questions about this new exhibit.  CHAIRMAN WEIDMANN: Come forward.  MR. STEINHAGEN: Is it okay?
3 4 5 6 7 8 9 10 11 12	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. SKRABLE: Mr. Chairman, I just have one follow-up question, also.  MS. PRICE: That's fine, but under procedure	3 4 5 6 7 8 9 10 11	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some questions about this new exhibit.  CHAIRMAN WEIDMANN: Come forward.  MR. STEINHAGEN: Is it okay?  Because you said before no.
3 4 5 6 7 8 9 10 11 12 13	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. SKRABLE: Mr. Chairman, I just have one follow-up question, also.  MS. PRICE: That's fine, but under procedure  MR. SKRABLE: The first part about the	3 4 5 6 7 8 9 10 11 12 13	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some questions about this new exhibit.  CHAIRMAN WEIDMANN: Come forward.  MR. STEINHAGEN: Is it okay?  Because you said before no.  CHAIRMAN WEIDMANN: Listen, come
3 4 5 6 7 8 9 10 11 12 13 14	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. SKRABLE: Mr. Chairman, I just have one follow-up question, also.  MS. PRICE: That's fine, but under procedure  MR. SKRABLE: The first part about the church, was that an as-built survey of the church?	3 4 5 6 7 8 9 10 11 12 13	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some questions about this new exhibit.  CHAIRMAN WEIDMANN: Come forward.  MR. STEINHAGEN: Is it okay?  Because you said before no.  CHAIRMAN WEIDMANN: Listen, come forward.
3 4 5 6 7 8 9 10 11 12 13 14 15	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. SKRABLE: Mr. Chairman, I just have one follow-up question, also.  MS. PRICE: That's fine, but under procedure  MR. SKRABLE: The first part about the church, was that an as-built survey of the church?  THE WITNESS: Yes.	3 4 5 6 7 8 9 10 11 12 13 14 15	aisle, almost a 10-foot wall, then we're going back down in grade to almost the same elevation.  So there's 10 foot of wall, soil, going to be landscaping presumably in between.  MR. SCOZZAFAVA: Sound buffer.  MR. STEINHAGEN: Chair, I have some questions about this new exhibit.  CHAIRMAN WEIDMANN: Come forward.  MR. STEINHAGEN: Is it okay?  Because you said before no.  CHAIRMAN WEIDMANN: Listen, come forward.  (Laughter.)
3 4 5 6 7 8 9 10 11 12 13 14 15 16	again please?  MS. PRICE: I have the opportunity to redirect.  MR. ARDITO: This is to questions that she just brought up, it's a legitimate question I have.  MR. 	189		191
1	RECROSS EXAMINATION	1	which number this was?
2	BY MR. STEINHAGEN:	2	A. Just to show a footprint.
3	Q. Mr. Sehnal, what was the point of	3	Again, it's a conceptual plan. I don't
4	showing these or presenting these exhibits?	4	think there's anything in this town that doesn't
5	A. Just to present an alternate permitted	5	permit one story.
6	use of the site.	6	Q. Sure, but if you did a two-story, you
7	<b>Q.</b> And was it your testimony that some	7	wouldn't have quite as large a footprint, would you?
8	things might not be as good, is that a fair way to	8	A. Potentially not.
9	characterize it?	9	Maybe I'd put a bigger patio in.
10	Like for instance, impacts to the	10	<b>Q.</b> Absolutely, but that would reduce the
11	wetlands, amount of impervious coverage?	11	building coverage?
12	A. Yeah.	12	A. Yeah, yeah, absolutely.
13	I mean, the way this exhibit is laid	13	<b>Q.</b> And does this church calculate the
14	out, yeah, absolutely this is proposing more impact	s 14	required number of parking spaces?
15	to the wetlands.	15	A. We did not go that far.
16	<b>Q.</b> So the reason you presented this, is it	16	<b>Q.</b> So then the amount of impervious
17	fair to say then, you're showing this to the board	17	coverage on here may or may not be accurate, is it?
18	and to the public saying, well, we can do something	18	A. Depending on what type of church it is
19	worse than what we're proposing, right?	19	and how many parking spaces they need.
20	A. No, I'm just showing other permitted	20	<b>Q.</b> So you didn't calculate it, so you
21	uses.	21	don't know?
22	<b>Q.</b> Your other permitted uses. So is it	22	A. No.
23	generally done	23	MR. STEINHAGEN: That's all I have.
24	MR. REGAN: Are you questioning whether	24	Thank you.
25	they're permitted uses?	25	MR. ELLER: Can I ask a procedural
	190		192
1	MR. STEINHAGEN: No, there's no	1	question?
2	question and I would assume that	2	MR. REGAN: Yes.
3	question and I would assume that MR. REGAN: You're assuming they're	3	MR. REGAN: Yes.  MR. ELLER: As far as people that are
2 3 4	question and I would assume that  MR. REGAN: You're assuming they're permitted uses?	2 3 4	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not
2 3 4 5	question and I would assume that  MR. REGAN: You're assuming they're permitted uses?  MR. STEINHAGEN: Well, I mean, it's	2 3 4 5	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?
2 3 4 5 6	question and I would assume that  MR. REGAN: You're assuming they're permitted uses?  MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is	2 3 4 5 6	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.
2 3 4 5 6 7	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was.	2 3 4 5 6 7	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say
2 3 4 5 6 7 8	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was. MR. REGAN: So is a house of worship.	2 3 4 5 6 7 8	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything,
2 3 4 5 6 7 8 9	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was. MR. REGAN: So is a house of worship. MR. STEINHAGEN: So 100 percent, and	2 3 4 5 6 7 8 9	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone
2 3 4 5 6 7 8 9	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was. MR. REGAN: So is a house of worship. MR. STEINHAGEN: So 100 percent, and you don't need a use variance.	2 3 4 5 6 7 8 9	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone  MR. ARDITO: But this is new testimony.
2 3 4 5 6 7 8 9 10	question and I would assume that  MR. REGAN: You're assuming they're permitted uses?  MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was.  MR. REGAN: So is a house of worship.  MR. STEINHAGEN: So 100 percent, and you don't need a use variance.  MS. PRICE: Correct.	2 3 4 5 6 7 8 9 10	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone  MR. ARDITO: But this is new testimony.  MR. ELLER: No, no, you can ask to
2 3 4 5 6 7 8 9 10 11	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was. MR. REGAN: So is a house of worship. MR. STEINHAGEN: So 100 percent, and you don't need a use variance. MS. PRICE: Correct. No, I understand, but you're asking why	2 3 4 5 6 7 8 9 10 11	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone  MR. ARDITO: But this is new testimony.  MR. ELLER: No, no, you can ask to any question. I just don't want people thinking
2 3 4 5 6 7 8 9 10 11 12 13	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was. MR. REGAN: So is a house of worship. MR. STEINHAGEN: So 100 percent, and you don't need a use variance. MS. PRICE: Correct. No, I understand, but you're asking why they were presented and he answered it.	2 3 4 5 6 7 8 9 10 11 12	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone  MR. ARDITO: But this is new testimony.  MR. ELLER: No, no, you can ask to any question. I just don't want people thinking we're cutting them off.
2 3 4 5 6 7 8 9 10 11 12 13	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was. MR. REGAN: So is a house of worship. MR. STEINHAGEN: So 100 percent, and you don't need a use variance. MS. PRICE: Correct. No, I understand, but you're asking why	2 3 4 5 6 7 8 9 10 11	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone  MR. ARDITO: But this is new testimony.  MR. ELLER: No, no, you can ask to any question. I just don't want people thinking we're cutting them off.  MR. REGAN: Before you vote, there will
2 3 4 5 6 7 8 9 10 11 12 13	question and I would assume that  MR. REGAN: You're assuming they're permitted uses?  MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was.  MR. REGAN: So is a house of worship.  MR. STEINHAGEN: So 100 percent, and you don't need a use variance.  MS. PRICE: Correct.  No, I understand, but you're asking why they were presented and he answered it.  MR. REGAN: Different development scenario.	2 3 4 5 6 7 8 9 10 11 12 13	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone  MR. ARDITO: But this is new testimony.  MR. ELLER: No, no, you can ask to any question. I just don't want people thinking we're cutting them off.  MR. REGAN: Before you vote, there will be ample opportunity.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	question and I would assume that MR. REGAN: You're assuming they're permitted uses? MR. STEINHAGEN: Well, I mean, it's residential in the R-1 zone, which I think is permitted and I think he testified it was. MR. REGAN: So is a house of worship. MR. STEINHAGEN: So 100 percent, and you don't need a use variance. MS. PRICE: Correct. No, I understand, but you're asking why they were presented and he answered it. MR. REGAN: Different development scenario. MR. STEINHAGEN: Absolutely, and I	2 3 4 5 6 7 8 9 10 11 12 13 14 15	MR. REGAN: Yes.  MR. ELLER: As far as people that are asking wanted to ask questions now, we're not opening it to the public procedurally?  MR. REGAN: It's up to the board.  MR. ELLER: So what I was going to say is at some point during before we vote on anything, we open it up back to the public and let anyone  MR. ARDITO: But this is new testimony.  MR. ELLER: No, no, you can ask to any question. I just don't want people thinking we're cutting them off.  MR. REGAN: Before you vote, there will be ample opportunity.  MR. ELLER: For anything.
