7 1 CHAIRMAN WEIDMANN: Okay. We're ready 1 put together a report. 2 2 now for the application portion of the meeting. So naturally we didn't have a problem 3 COUNCILMAN BOYCE: This is when I will with that. So we're hopeful that that will be ready 4 4 for the environmental commission as noted and then to 5 MR. REGAN: Yes, Class I and Class III the extent that any of that needs to be addressed, we 5 6 members can't participate, because this is a D-1 6 can then address it at the September 14th meeting. 7 7 variance. 13 15 1 favorably on this application, that that would be a 1 MS. PRICE: Well, our original plan, 2 2 condition of approval and clearly spelled out in the and we may end up going back to the original drainage developer's agreement. So it's covered in terms of plan, because if both of these off-site properties do 4 the documentation. 4 not cooperate, it's a private party issue, it's not 5 MR. SKRABLE: Okav. -- and I think --6 MS. PRICE: And I have no problem with 6 MR. REGAN: Well, that was discussed 7 7 that. one or two meetings ago. 8 MR. SKRABLE: And then just 8 MS. PRICE: Right. 9 9 MR. REGAN: I had thrown out the idea drainage-wise, there's just a lot up in the air. 10 And I know you're trying to get to a 10 of someone seeking a declaratory judgement. And I 11 final set of plans, I appreciate that. But I don't 11 think that would not be to anybody's liking. 12 12 think we've answered the question of whether or not MS. PRICE: Right. 13 Lakeview has the obligation to take this water or 13 MR. SKRABLE: I think you were 14 not. And there are still ongoing negotiations, I'm 14 negotiating at that time and didn't think it was 15 assuming, with them. 15 necessary. 16 16 And then, secondarily, the church, if MS. PRICE: Well, and there -- and our 17 they're not going to cooperate, even though the 17 respective clients are still talking with each other, 18 18 easement already exists, if this were to be approved but the missing link is the church. 19 19 and a connection were to be made, we have no idea MR. SKRABLE: And going back to that 20 original plan, I've got a lot of concerns about that 20 what the problem is, how bad it is, if there really 21 is a problem, where it is, who's responsible for it. 21 plan --22 I think it can get really complicated determining who 22 MS. PRICE: Well --23 would have to fix it. 23 MR. SKRABLE: -- from a design 24 MS. PRICE: Well, we're clearly not 24 standpoint. 25 responsible for anything on the church's property. 25 MS. PRICE: -- if I could ask that a 14 16 report be issued in that vein, Tom, it would be 1 The church provided the easement. The church has an easement into Lakeview for drainage purposes that helpful, because if nothing happens from Lakeview's 3 have been on the books and not revised, not voided. 3 perspective and the church's perspective, we've been MR. REGAN: It's existed for, like, 30 4 pending for a really long time and I've given the 5 years. 5 board multiple extensions, but at some point in time 6 MS. PRICE: Yes, it's been in existence 6 we have to say this is the application. and not challenged and not revised for years. 7 7 So if you could do a report on that 8 The church granted our property owner 8 first plan that we could review with our 9 the right to connect our property and development 9 professionals, it would be very helpful. 10 into the church's property. So there's two different 10 MR. SKRABLE: I'm happy to do that, but 11 easement agreements that have not been challenged. 11 just to be fair, you've been moving along and saying 12 But we're trying to assist here by 12 we're working on it, we're working on it and nothing 13 13 doing a camera test of the line from either one or has happened. 14 14 the other, because we're not -- we're hearing that MS. PRICE: That's not -- don't look at 15 there's a problem on the church's side, but we're 15 our side of the table on that. You know, we -- and, 16 hearing the same that you've heard. again, it's a private party issue, so it's not a 16 17 So we're going the extra step offsite 17 zoning board issue. The easement negotiations are

Okay. So this was one of the exhibits that the board asked to be done, correct?

What this exhibit is essentially showing -- I'm going to zoom in here without my mouse.

What this exhibit is essentially doing is providing two site line views from the Lakeview townhomes directly to the north of the site.

The top profile view is Profile View AA, which is the closest townhome building to the site itself. Earlier, I believe, the first or second hearing that I testified, we had the same exact exhibit that we've shown.

However, we've since updated it since the building has moved a little bit further away from that property line and there was some revisions to the berm and retaining wall for that area and then the profile view to the bottom of the two is identified as Profile View BB. And it is the view from the townhome Building 1 to the west over from

38

the one that's directly behind the site.

What, essentially, this does, if you look at the dashed line on both of these profile views, this is a site line, and normally we would take this from the second-story window, but we didn't exactly know the elevation of that second-story window, so we went a little bit more conservative and took it from the -- essentially the bottom of the peak of the roof, the eave of the roof.

10 And that line of sight then connects 11 the dots to the tallest portion of the proposed 12

building on our site. And what you can see here is on the top portion of the site, you have those taller trees and then there's a bold black line that is essentially going vertical through those profile views, that's the property line. So that's the location of the property line. And those trees that are directly to the -- to the left side of that property line are all the existing trees that are on Lakeview property that will remain. And then you have our proposed development to the right-hand side and those lower

22 23 level trees, those are essentially proposed trees. 24 Those are the height of the trees at the time of 25 planting.

1 And you heard our landscape architect 2 testify, essentially, to the rate of the growth of 3 those trees and as you get into 5, 10, 15 years down 4 the road, those trees will, you know, essentially

double in size and begin to grow into maturity and

7 So the intent of this exhibit is to 8 essentially show that the existing trees to remain 9 will still act as a visual screen to help screen the 10 view from those closest townhome buildings to the 11 highest point of our proposed development and as well 12 as the landscape buffer berm that's associated with 13 our basin, which is that little mound that is 14 directly to the right of the property line, that has 15 the proposed plantings on it. 16

first story window of those townhome buildings, those trees even at the time of planting, will help buffer and screen the view from the Lakeview townhomes to the parking area on our site to really help, you know, provide a nice visual screen and provide some landscaping buffer.

And as you take the site line from the

23 I don't know if you have any questions 24 regarding that exhibit. 25

Q. So the next one that was done also at

1 the request of the board. 2

A. The next one which I will identify as Exhibit A-28.

4 (Whereupon, Site Plan Profile Exhibit, 5 dated June 22, 2022 is received and marked as 6 Exhibit A-28 for identification.)

THE WITNESS: This is identified as "Site Plan Profile Exhibit" with a date of June 22nd, 2022, Sheet 1 of 1.

10 And, essentially, what this view is 11 doing is providing the same thing, however, it's from 12 the front of the site.

13 This is a comparison from the Old 14 Tappan Road to our side, as well as the comparison of 15 the church directly to the east of us.

16 So the profile view exhibit that is to 17 the left-hand side of the page would be the 18 difference in elevations from the Old Tappan Road to the finished floor of the proposed building, as well 20 as the height of the finished building.

21 So, essentially, what we're looking at 22 here is from the roadway to the finished floor 23 elevation of the Capital Seniors building is about a 24 3-and-a-half-foot difference.

25 So the Capital Seniors building,

19

Taking it a step further to the top of the building, essentially where that building is measured to, would be a 38-foot difference from the roadway to the top of the building. Q.

The Capital Seniors buffer from the property line to the wall is just over 20.1 feet versus the retaining wall from the church in the rear is about 6 feet from the property line and the 8 retaining wall at the front of the property is about 15 feet from the property line, so a little bit closer there as well.

And then, finally, we were speaking in a measure of minimum buffers. So any type of impervious surface or disturbance between those property lines.

15 The closest item for the assisted 16 living development remains the retaining wall at the 17 northern end of our property next to the dumpster 18 that is cut off just from that screen. That is 20.1 19 feet. Again, same as our minimum from the retaining 20 wall, that's our shortest possible portion of the 21 buffer is 20.1 feet versus the church's minimum 22 buffer is the existing air conditioning condenser 23 units that is just to the east, essentially the 24 centralized portion of the site is only set back 25 3-and-a-half feet from the site.

So when we're comparing the church property to the Capital Seniors development and assisted living development, the proposed development definitely provides more buffering in comparison to what exists from the property line to the church today, because I know there was some speculation and questions previously provided by the church that we were closer to the property line than what they had thought.

Q. And you were recently out on our property, correct?

> A. Yup, exactly.

We, essentially, wanted to confirm and see what was back there, make sure that condenser unit, that structure was still there.

The structure itself was still there. However, it looks like they've been doing some construction to those units. I believe that the priest previously mentioned that they would be replacing the condensing units. So they've since been removed.

22 There's a bunch of trenching that was 23 done. I guess they removed the existing utilities. 24 It looks like a lot of that soil that was trenched back there was piled onto the Capital Seniors

1 property line and just walking over there, kind of tripping over some trash that there seems to be there was a lot of trash along that common property area as 4 well, but we went out there to essentially, you know, 5 verify that these buffers, how they existed in 6 comparison to the survey.

7 So just on that point, based upon your Q. 8 -- when did you see that condition?

9 That was on the 4th when we were out 10 there for the tree survey.

12 So you attended the initial tree walk 13 with Mr. Levy, correct?

On the 4th?

Yes, I did.

Α. 15 Q. And at the time of that walk, is that 16 the time that you noticed the dirt from the work on 17 the church's site being on our site?

18 Α. Yes, yes, absolutely. 19 Q. And was there a lot of dirt or was it 20 concentrated in one particular area?

Α. It was generally concentrated in one area directly to the southwest corner of that existing enclosure for those condensing units.

24 And to the best of your knowledge as 25 project civil engineer, you haven't been called in to

1 look at any construction on the church's property and use of this site that's before the planning board, 3 correct? 4 Α. I have not.

Q. You have not, okay. So just run down those buffers again,

starting with the 47 feet. 7 8 Α. Well, 67.

9 So the setback, building setback to the 10 assisted living is 67 feet versus the church is 43.

11 The driveway setback for assisted living is 12

26-and-a-half feet versus the church's 17-and-a-half.

13 The retaining wall setbacks are 20 and -- 20.1 for 14 the assisted living versus 6 feet, and 15 feet

15 respectively for the church. And then the minimum

16 buffer overall, the assisted living remains that 20.1

17 for the wall separation and the church's buffer is

18 3-and-a-half feet from the back of that enclosure. 19

So I think -- and you heard me explain 20 what our client was willing to do moving the home and 21 is committed to doing that as a condition of 22 approval, is that your understanding?

23 A. Yes, absolutely.

24 When we were out there on the 4th as 25 well, we did take an opportunity to review the

	49		51
1	portion of the site directly across the street and,	1	THE WITNESS: Yeah.

13	COUNCILMAN MAGGIO: Just the way this	13	and I just don't know if that has anything to do with
14	is drawn, it just looks that way.	14	their drainage problems.
15	THE WITNESS: Correct, but yeah, that	15	THE WITNESS: It could be. We didn't
16	swale is on our property and it's collecting both	16	analyze their drainage design. I do know that
17	from Lakeview and our property, then it hopefully	17	there's an existing detention basin below their
18	drains to an inlet that is on Lakeview's property to	18	parking lot that consists of
19	the northeast.	19	COUNCILMAN MAGGIO: That's all
20	COUNCILMAN MAGGIO: Okay. The next one	20	pavement.
21	is the next drawing.	21	THE WITNESS: There is a lot of
22	So the church is apparently 45 feet	22	pavement. But I believe that's why the detention
23	above the finished floor.	23	system was designed underneath that parking lot to
24	THE WITNESS: Correct, 43 feet.	24	capture the water in.
25	COUNCILMAN MAGGIO: Forty-three feet.	25	COUNCILMAN MAGGIO: That was it, just
	54		56
1	Now, we have a height of restriction of 35 feet. Is	1	fun looking at drawings.
2	that implying that the church is not complaint	2	MR. MAMARY: I've got a question for
3	THE WITNESS: Well, it's like	3	Charlie.
4	COUNCILMAN MAGGIO: was not improved	4	How strong are your glasses?
5	in compliance?	5	(Laughter.)
6	THE WITNESS: It's a peaked roof, so	6	COUNCILMAN MAGGIO: I took them off.
7	it's likely measured from the midpoint of that roof.	7	MR. MAMARY: What font did you use?
8	It may be a compliant building height. You mean from	8	THE WITNESS: So that's just a reduced
9	the zoning analysis?	9	size of our we just printed a smaller version.
10	COUNCILMAN MAGGIO: But it's not drawn	10	MR. MAMARY: Right.
11	that way.	11	So we're, intentionally, not supposed
12	THE WITNESS: Well, that's because it's	12	to be able to read it, right, because
13	to the highest point, not to the midpoint where a	13	THE WITNESS: I'd be more than happy to
14	zoning code likely reads that sloped roof, maximum	14	print the board full-sized exhibits in the future,
15	height elevation.	15	but
16	This is just to represent the tallest	16	MR. MAMARY: Well, we have this
17	points.	17	MS. LOULOUDIS: We're saving paper.
18	MR. SKRABLE: We actually measure peak.	18	MR. MAMARY: The second thing in
19	THE WITNESS: Okay.	19	Charlie's follow-up on Charlie, because you're
20	COUNCILMAN MAGGIO: So then	20	unable to get in touch with the church, you've
21	MR. SKRABLE: The only thing that would	21	decided to do a comparative and tell us about how the
22	be excluded is the parapet on a flat roof.	22	other property is incompliant in many different areas
23	COUNCILMAN MAGGIO: So, again, back to	23	or at least less compliant than what your application .
24	that question then, is this implying that the church	24	is.
25	was either approved with a variance at one point or	25	MS. PRICE: No.

	57		59
1	What what we did with this exhibit,	1	MR. ELLER: Let Diane blow it up on the
2	the board someone on the board	2	screen.
3	MR. MAMARY: Because every application	3	MR. ALESSI: Just to show you that I'm
4	stands on its own.	4	not all about fire trucks, if we go back to the first
5	MS. PRICE: Absolutely.	5	page, would the applicant be adverse to planting a
6	MR. MAMARY: And I don't know what	6	couple of trees in those, and no pun intended
7	we don't know exactly why they have a higher	7	Charlie, those bald spots on the Lakeview property?
8	MS. PRICE: No, right.	8	(Laughter.)
9	MR. MAMARY: roof line.	9	THE WITNESS: Yeah, we actually offered
10	MS. PRICE: The board was concerned	10	that up. We'd be more than happy to plant some trees
11	whether we were higher or lower than the church at	11	in there.
12	the hearing, I think it was two hearings ago.	12	MR. ALESSI: Okay.
13	COUNCILMAN MAGGIO: You were responding	13	Now, I took some notes because
14	to our questions.	14	landscaping is not my forte. So are the trees on
15	MR. MAMARY: Okay.	15	Lakeview deciduous or evergreen?
16	MS. PRICE: Right.	16	THE WITNESS: The majority of them are
17	That's why we presented this, because	17	deciduous.
18	you said basically figure it out	18	MR. ALESSI: Okay. And what type of
19	MR. MAMARY: Okay. It seems	19	condition are they in?
20	MS. PRICE: which is higher.	20	THE WITNESS: I think our tree expert
21	MR. MAMARY: It seems like an opportune	21	would be a lot better to answer that than me.
22	moment, though, since the church is not represented,	22	I mean, I was out there
23	that they were able to be compared, you know, it was	23	MR. ALESSI: Okay.
24	just as a	24	THE WITNESS: and they the
25	MS. PRICE: No, it was specific in	25	majority of them along that property line look to be,
	58		60
1	response to the board's questions.	1	you know, living, I can tell you that. I know living
2	MS. HAVERILLA: No, we did question	2	versus dead, so
3	what it would look like from Old Tappan Road, because	3	MR. ALESSI: So he'll answer the next
4		4	question of what type of trees they are? Because I
5	CHAIRMAN WEIDMANN: This was our	5	know some of the trees on my property get this like
6	request, yes.	6	disease, fungus on it and they go bye-bye.
7	MS. HAVERILLA: there is slope going	7	THE WITNESS: I do know some trees in
8	up, so right now to us it looks like it's going to be	8	walking back there, a majority of the trees along
9	a lot higher.	9	that that common property line, there was a lot
10	So that's why we were looking for this.	10 11	of beech trees back there.
11 12	MR. MAMARY: So ours is you mean	12	MR. ALESSI: Okay. They're what? THE WITNESS: Beech trees. They're the
13	their application is going to be a lot higher than the church?	13	ones that you can write your name and stuff in the
14	MS. PRICE: No.	14	bark.
15	MS. HAVERILLA: No, we just wanted to	15	CHAIRMAN WEIDMANN: You heard about the
16	be able to visualize what the height would be.	16	
17	MR. MAMARY: Okay. I can't I	17	MR. ALESSI: The disease for beech
18	honestly can't see the numbers. I don't have my	18	trees.
19	MR. ALESSI: Here.	19	COUNCILMAN MAGGIO: Nematodes.
20	(Laughter.)	20	MR. ALESSI: Okay. What is it called?
21	MR. MAMARY: I'll come back to you.	21	COUNCILMAN MAGGIO: Beech nematodes.
22	MR. ALESSI: Okay.	22	MR. ALESSI: Okay. I have that in my
23	MR. MAMARY: Oh my God.	23	notes.
24	THE WITNESS: I can pull this one over	24	Okay. And then one last question, only
25	there for you.	25	because my friends on Central Avenue have it, they

	61		63
1	put a berm on their property with a couple of	1	or the parking lot or anything like that that's going
2	evergreen trees which decreased the amount of road	2	into your seepage pit, into the retention basin, what
3	traffic noise. But also kind of hides their house.	3	could we move to divert
4	Did you every think of maybe doing a berm with some	4	THE WITNESS: Again, are we
5	smaller plantings that kind of get between those	5	MR. ALESSI: we at one point talked
6	30-foot-tall trees and the I going to say stems	6	about
7	trunks?	7	(Simultaneous Speaking.)
8	THE WITNESS: Along the frontage or the	8	THE WITNESS: We can certainly I
9	rear of the property?	9	don't want to get back into drainage. We can
10	MR. ALESSI: The frontage.	10	certainly
11	THE WITNESS: I mean, we can certainly	11	MR. ELLER: The only reason I'm
12	look at that	12	bringing that point up is because we've raised it two
13	MR. ALESSI: Both.	13	or three times and we were told you guys were going
14	THE WITNESS: but it was a the	14	to address it.
15	grade along the front of our property was already	15	THE WITNESS: Yeah, we're waiting to
16	relatively steep and our landscape architect always	16	meet with the Lakeview's engineer to see if they have
17	yells at me when I have a 3-on-1 slope, because you	17	any preservations to the our design, but far, far
18	can't plant as big trees in there.	18	less water going to Lakeview than what's going there
19	MR. ALESSI: That's right, you said	19	currently.
20	that last time.	20	MR. ELLER: I understand what you're
21	THE WITNESS: We try to make it flatter	21	saying, but I don't see why
22	for him.	22	MS. PRICE: It's on our list. It's on
23	But I mean, if the board wants, you	23	my list for down towards the driveway we said we
24	know, a little bit more of a berm, we can attempt to	24	would look at that whether we could put a smaller
25	raise it, but the way the grading works out, it makes	25	basin in there.
	62		64
1	it tight.	1	THE WITNESS: Yes, absolutely.

6	MS. COSTA: Okay.	6	objecting for the record: A, you're testifying; and,
7	MS. PRICE: And he answered the	7	B, you're getting into
8	question.	8	MS. COSTA: I'm answering a question
9	MS. COSTA: Okay. He just mentioned	9	that was asked of me.
10	beech trees, so	10	All right.
11	Yeah, but you mentioned the flowering	11	CHAIRMAN WEIDMANN: Okay. Are you
12	deciduous trees, blah, blah, blah.	12	finished?
13	Are you aware of extricated cicada	13	MS. COSTA: Yup, thank you.
14	populations, which are endangered by mountaintop	14	CHAIRMAN WEIDMANN: Thank you.
15	removal projects, which this is one?	15	Yes, ma'am, please come forward.
16	MS. PRICE: Again	16	MS. FERDINAND: Kathy Ferdinand,
17	CHAIRMAN WEIDMANN: This is	17	15 Autumn Lane, Old Tappan.
18	MS. PRICE: the witness did not	18	My question is a little bit about the

3		3	a wall
4	MR. CARPENTER: Absolutely.	4	MR. CARPENTER: And the church is on
5	Kurt Carpenter, 168 Central Avenue, Old	5	the low side, right?
6	Tappan, New Jersey.	6	THE WITNESS: Correct, we'll also be
7	So I was little confused by the	7	MR. CARPENTER: And you guys and the
8	drawings, are those exactly I mean the different	8	top of the hill right now is there, we're going to
9	heights and whatnot, are they exactly to scale? It	9	say like, woop, taking it down. Okay?
10	seemed it's very little to see the cars from	10	So it's just literally just going to be
11	look different from side to side.	11	so will it be a retaining wall?
12	THE WITNESS: Yes, yes, there's a	12	THE WITNESS: Yes.
13	different horizontal versus vertical although they	13	MR. CARPENTER: It will just be a
14	are both done to the same scale.	14	little bit like a wall wall.
15	MR. CARPENTER: Okay. Cool.	15	I mean it won't be retaining anything.
16	So the question I had was because it	16	The height will be about the same, yeah?
17	wasn't clear, looking at the sides there, you said	17	THE WITNESS: Yeah.
18	one is like a 6 foot up from the roadway and then	18	MS. PRICE: I'm not sure I follow.
19	another was 3 feet. So on the adjoining property,	19	THE WITNESS: I think
20	the church property, they are like geez, they're	20	MR. CARPENTER: No, because if you take
21	like 10 8, 10 feet below. You're the top of	21	out so much of the of the soil there's no longer

2 3 4 5 6 7 8 9	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the	2 3 4 5 6 7 8 9	MR. CARPENTER: The wall wall wall. MS. PRICE: Okay. MR. CARPENTER: The super duper wall. MS. PRICE: Okay. MR. CARPENTER: Okay. So that was what I was trying get an apples to apples comparison. MS. PRICE: Okay. MR. 2 3 4 5 6 7 8 9	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. 2 3 4 5 6 7 8 9 10 11	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. And then the proposed elevation of	2 3 4 5 6 7 8 9 10 11	MR. CARPENTER: The wall wall wall. MS. PRICE: Okay. MR. CARPENTER: The super duper wall. MS. PRICE: Okay. MR. CARPENTER: Okay. So that was what I was trying get an apples to apples comparison. MS. PRICE: Okay. MR. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest
2 3 4 5 6 7 8 9 10 11 12	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. And then the proposed elevation of the finished floor of our building and the surveyed	2 3 4 5 6 7 8 9 10 11 12 13	MR. CARPENTER: The wall wall wall. MS. PRICE: Okay. MR. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary.
2 3 4 5 6 7 8 9 10 11 12 13	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. MS. PRICE: Okay. MR. CARPENTER: The super duper wall. MS. PRICE: Okay. MR. CARPENTER: Okay. So that was what I was trying get an apples to apples comparison. MS. PRICE: Okay. MR. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the
2 3 4 5 6 7 8 9 10 11 12 13 14 15	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. And then the proposed elevation of the finished floor of our building and the surveyed elevation of the finished floor of the church. So I believe you're talking about the	2 3 4 5 6 7 8 9 10 11 12 13 14 15	MR. CARPENTER: The wall wall wall. MS. PRICE: Okay. MR. CARPENTER: The super duper wall. MS. PRICE: Okay. MR. CARPENTER: Okay. So that was what I was trying get an apples to apples comparison. MS. PRICE: Okay. MR. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. And then the proposed elevation of the finished floor of our building and the surveyed elevation of the finished floor of the church. So I believe you're talking about the the retaining wall that's between the church	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. CARPENTER: The wall wall wall. MS. PRICE: Okay. MR. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right. But even though the predominant height
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. And then the proposed elevation of the finished floor of our building and the surveyed elevation of the finished floor of the church. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right. But even though the predominant height of that structure is a lot less because it's heavily
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. And then the proposed elevation of the finished floor of our building and the surveyed elevation of the finished floor of the church. So I believe you're talking about the the retaining wall that's between the church property and the property line. We will similarly have a retaining wall	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	MR. So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right. But even though the predominant height of that structure is a lot less because it's heavily peaked for the sanctuary, it's predominantly a two
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	church versus in front of that new property, the church height is this. And the other property is this. So I believe you're talking about the the retaining wall that's between the church property and the property line. We will similarly have a retaining wall on the same property line. So we will be on the low	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MR. CARPENTER: The wall wall wall. MS. PRICE: Okay. MR. CARPENTER: The super duper wall. MS. PRICE: Okay. MR. CARPENTER: Okay. So that was what I was trying get an apples to apples comparison. MS. PRICE: Okay. MR. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right. But even though the predominant height of that structure is a lot less because it's heavily peaked for the sanctuary, it's predominantly a two a two-story property. So it's like, the dominant
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right. But even though the predominant height of that structure is a lot less because it's heavily peaked for the sanctuary, it's predominantly a two a two-story property. So it's like, the dominant thing is probably the height, so would you would
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right. But even though the predominant height of that structure is a lot less because it's heavily peaked for the sanctuary, it's predominantly a two a two-story property. So it's like, the dominant thing is probably the height, so would you would you not agree that that's a slightly misleading
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	church versus in front of that new property, the church height is this. And the other property is this. How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. CARPENTER: The super duper wall. MS. PRICE: Okay. MR. CARPENTER: Okay. So that was what I was trying get an apples to apples comparison. MS. PRICE: Okay. MR. CARPENTER: So on the on the church design, the representation here, you have that set at a 50 height, right? So would you say that that is that would be, from what you said, that's the highest point on the property, that's the the sanctuary. THE WITNESS: Well, the peak of the MR. CARPENTER: Right. But even though the predominant height of that structure is a lot less because it's heavily peaked for the sanctuary, it's predominantly a two a two-story property. So it's like, the dominant thing is probably the height, so would you would you not agree that that's a slightly misleading representation to characterize your client's property in a better light?

How does that account for the height of the hill, for lack of a better word? And how does that get back to making your apples to apples comparison in terms of relative heights and total height. THE WITNESS: Right, so so the elevations are based on actual surveyed datum of the roadway in front of the church, the roadway in front of our property. And then the proposed elevation of the finished floor of our building and the surveyed elevation of the finished floor of the church. So I believe you're talking about the the retaining wall that's between the church property and the property line. We will similarly have a retaining wall on the same property line. So we will be on the low side of the wall in the front as well as the church. So you'll have the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MR. CARPENTER: The wall wall wall. MS.
