FIRE CODE REQUIREMENTS

SMOKE DETECTOR

At the time of change of occupancy by way of sale, lease or rent of a residential dwelling, the smoke detectors shall remain in compliance from the time when the house or building was built and/or any renovations and/or additions were permitted.

Homes built prior to January 1977: Battery operated smoke detector on each level including the basement. Where there are bedrooms, the detector shall be installed within 10 feet of all bedroom doors.

Homes built from January 1977 to September 1978: Smoke detectors must be A/C powered (120 volt hardwired) on sleeping levels. Battery operated smoke detectors on all other levels. Where there are bedrooms, the detector shall be within 10 feet of all bedroom doors.

Homes built from October 1978 to January 1983: Smoke detectors must be A/C powered (120 volt hardwired) on sleeping levels and the basement. Where there are bedrooms, the detector shall be within 10 feet of all bedroom doors. Battery operated smoke detectors on all other levels.

Homes built from February 1983 to July 1984: Smoke detectors must be A/C powered (120 volt hardwired) on all levels including the basement. Where there are bedrooms, the detector shall be within 10 feet of all bedroom doors.

Homes built from August 1984 to February 1991: Smoke detectors must be A/C powered (120 volt hardwired) one on each level including the basement, interconnected*. Where there are bedrooms, the detector shall be within 10 feet of all bedroom doors.

Homes built from March 1991 to the Present: Smoke detectors must be A/C powered (120 volt hardwired) with battery back-up. There shall be one on each level including the basement and inside each bedroom. Where there are bedrooms, the detector shall be within 10 feet of all bedroom doors. Detectors shall be interconnected*.

**Interconnected: The activation of one detector sends a signal to activate all of the detectors in the same residence or dwelling unit*

CARBON MONOXIDE DETECTOR

CO Detectors are required to be installed and/or mounted in the hallway or adjacent to the sleeping areas and bedrooms within 10 feet of the bedroom doors as per the manufacture specifications, installation instructions and N.F.P.A 720. These documents shall be presented to the inspector at the time of inspection to receive a Valid Certificate of Compliance. Battery operated CO Detectors are acceptable. Bedrooms containing fuel burning appliances are also required to have a CO alarm installed in the bedroom per NJ International Residential Code

PORTABLE FIRE EXTINGUISHER

At least one 2A:10B:C portable fire extinguisher shall be installed in all one- and two-family dwellings upon change of occupancy. A portable fire extinguisher is an operable portable device, carried, and operated by hand, containing an extinguishing agent that can be expelled under pressure for the purpose of suppressing or extinguishing fire, and which is installed in accordance with the following:

1. The extinguisher shall be within 10 feet of the kitchen and located in the path of egress.
2. The extinguisher shall be readily accessible and not obstructed from view.
3. The extinguisher shall be mounted using the manufacturer's hanging bracket, so the operating instructions are clearly visible.
4. The extinguisher shall be an approved listed and labeled type with a minimum rating of 2A-10B:C and no more than 10 pounds.
5. The owner's manual or written operation instructions shall be provided during the inspection and left for the new occupant.
6. The extinguisher shall be serviced and tagged by a certified Division of Fire Safety contractor within the past 12 months, or the seller must have a receipt for the recently purchased extinguisher; and
7. The top of the extinguisher shall not be more than five feet above the floor.
